|----------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Magnetic Wetting Transition</b><br>by J.C. Bacri, R. Perzynski and D. Salin .....                                             | 1   |
| <b>Recent Exact Results on Wetting</b><br>by D.B. Abraham and C.M. Newman .....                                                  | 13  |
| <b>Wetting of a Disordered Substrate</b><br>by H. Orland .....                                                                   | 23  |
| <b>An Introduction to a Mathematical Description of the Wetting Phenomena in the Ising Model</b><br>by C.-E. Pfister .....       | 29  |
| <b>Wetting at Nanoscopic Scales: Some Experiments</b><br>by F. Heslot, N. Fraysse, A.M. Cazabat, P. Levinson and P. Carles ..... | 41  |
| <b>Adsorption and Theory of Fluids</b><br>by J. Bougard and R. Jadot .....                                                       | 49  |
| <b>Front Propagation in One Dimension</b><br>by P. Collet .....                                                                  | 59  |
| <b>An Introduction to Thermocapillary Convection</b><br>by J.K. Platten and D. Villers .....                                     | 69  |
| <b>Antonov Rule and Multilayer Wetting in "q State" Models</b><br>by A. Messager .....                                           | 79  |
| <b>Random Surfaces in Statistical Mechanics</b><br>by J. Bricmont .....                                                          | 93  |
| <b>The Influence of Bulk Disorder on Wetting Phenomena in Two Dimensional Systems</b><br>by Th.M. Nieuwenhuizen .....            | 101 |
