Chapter I	Preliminaries on Categories, Abelian Groups, and Homotopy	1
§ 1	Categories and Functors	1
§ 2	Abelian Groups (Exactness, Direct Sums, Free Abelian Groups)	7
§ 3	Homotopy	13
Chapter II	Homology of Complexes	16
§ 1	Complexes	16
§ 2	Connecting Homomorphism, Exact Homology Sequence	19
§ 3	Chain-Homotopy	23
§ 4	Free Complexes	26
Chapter III	Singular Homology	29
§ 1	Standard Simplices and Their Linear Maps	29
§ 2	The Singular Complex	30
§ 3	Singular Homology	32
§ 4	Special Cases	33
§ 5	Invariance under Homotopy	37
§ 6	Barycentric Subdivision	40
§ 7	Small Simplices. Excision	43
§ 8	Mayer-Vietoris Sequences	47
Chapter IV	Applications to Euclidean Space	54
§ 1	Standard Maps between Cells and Spheres	54
§ 2	Homology of Cells and Spheres	55
§ 3	Local Homology	59
§ 4	The Degree of a Map	62
§ 5	Local Degrees	66
§ 6	Homology Properties of Neighborhood Retracts in \mathbb{R}^n	71

	§ 7 Jordan Theorem, Invariance of Domain	78
	§ 8 Euclidean Neighborhood Retracts (ENRs)	79
Chapter V	Cellular Decomposition and Cellular Homology	85
	§ 1 Cellular Spaces	85
	§ 2 CW-Spaces	88
	§ 3 Examples	95
	§ 4 Homology Properties of CW-Spaces	101
	§ 5 The Euler-Poincaré Characteristic	104
	§ 6 Description of Cellular Chain Maps and of the Cellular Boundary Homomorphism	106
	§ 7 Simplicial Spaces	111
	§ 8 Simplicial Homology	119
Chapter VI	Functors of Complexes	123
	§ 1 Modules	123
	§ 2 Additive Functors	127
	§ 3 Derived Functors	132
	§ 4 Universal Coefficient Formula	136
	§ 5 Tensor and Torsion Products	140
	§ 6 Hom and Ext	146
	§ 7 Singular Homology and Cohomology with General Coefficient Groups	150
	§ 8 Tensorproduct and Bilinearity	157
	§ 9 Tensorproduct of Complexes. Künneth Formula	161
	§ 10 Hom of Complexes. Homotopy Classification of Chain Maps	167
	§ 11 Acyclic Models	174
	§ 12 The Eilenberg-Zilber Theorem. Künneth Formulas for Spaces	178
Chapter VII	Products	186
	§ 1 The Scalar Product	187
	§ 2 The Exterior Homology Product	189
	§ 3 The Interior Homology Product (Pontrjagin Product)	193
	§ 4 Intersection Numbers in \mathbb{R}^n	197
	§ 5 The Fixed Point Index	202
	§ 6 The Lefschetz-Hopf Fixed Point Theorem	207
	§ 7 The Exterior Cohomology Product	214

§ 8	The Interior Cohomology Product (\sim -Product)	219
§ 9	\sim -Products in Projective Spaces. Hopf Maps and Hopf Invariant	222
§ 10	Hopf Algebras	227
§ 11	The Cohomology Slant Product	233
§ 12	The Cap-Product (\sim -Product)	238
§ 13	The Homology Slant Product, and the Pontrjagin Slant Product	245
Chapter VIII	Manifolds	247
§ 1	Elementary Properties of Manifolds	247
§ 2	The Orientation Bundle of a Manifold	251
§ 3	Homology of Dimensions $\geq n$ in n -Manifolds	259
§ 4	Fundamental Class and Degree	266
§ 5	Limits	272
§ 6	Čech Cohomology of Locally Compact Subsets of \mathbb{R}^n	281
§ 7	Poincaré-Lefschetz Duality	291
§ 8	Examples, Applications	298
§ 9	Duality in ∂ -Manifolds	303
§ 10	Transfer	308
§ 11	Thom Class, Thom Isomorphism	314
§ 12	The Gysin Sequence. Examples	325
§ 13	Intersection of Homology Classes	335
Appendix	Kan- and Čech-Extensions of Functors	348
§ 1	Limits of Functors	348
§ 2	Polyhedrons under a Space, and Partitions of Unity	352
§ 3	Extending Functors from Polyhedrons to More General Spaces	361
	Bibliography	368
	Subject Index	371
