

Contents

Object Models

Models and Paradigms of Interaction	1
<i>Peter Wegner</i>	
Architectural Convergence and the Granularity of Objects in Distributed Systems	33
<i>Robert J. Fowler</i>	
Separation of Distribution and Objects	47
<i>Eric Jul</i>	
Integrating Structural and Operational Programming to Manage Distributed Systems	55
<i>Christian Zeidler, Bernhard Fank</i>	
Concurrency and Communication: Choices in Implementing the Coordination Language <i>LO</i>	73
<i>Marc Bourgois, Jean-Marc Andreoli, Remo Pareschi</i>	

Object Management

Toward Languages and Formal Systems for Distributed Computing	93
<i>Mario Tokoro, Kazunori Takashio</i>	
Decomposing and Recomposing Transactional Concepts	111
<i>Jeannette M. Wing</i>	
DPL to Express a Concurrency Control Using Transaction and Object Semantics	122
<i>Andry Rakotonirainy</i>	
A Reflective Invocation Scheme to Realise Advanced Object Management	139
<i>Stijn Bijnsens, Wouter Joosen, Pierre Verbaeten</i>	

Abstractions for Distributed Programming

Abstracting Object Interactions Using Composition Filters	152
<i>Mehmet Aksit, Ken Wakita, Jan Bosch, Lodewijk Bergmans, Akinori Yonezawa</i>	
Object-Oriented Distributed Programming in BETA	185
<i>Søren Brandt, Ole Lehrmann Madsen</i>	
A Flexible System Design to Support Object-Groups and Object-Oriented Distributed Programming	213
<i>Silvano Maffei</i>	
Distributed Programming in GARF	225
<i>Benoît Garbinato, Rachid Guerraoui, Karim R. Mazouni</i>	
Object-Oriented Extendibility in Hermes/ST, a Transactional Distributed Programming Environment	240
<i>Michael Fazzolare, Bernhard G. Humm, R. David Ranson</i>	
Author Index	262
