

Table of Contents

PAC Systems

Algebraic Aspects of Designing Behaviour Based Systems <i>G. Sommer</i>	1
From Multidimensional Signals to the Generation of Responses <i>G. H. Granlund</i>	29
Perception and Action Using Multilinear Forms <i>A. Heyden, G. Sparr and K. Åström</i>	54

Low Level and Early Vision

Local Image Operators and Iconic Structure <i>J. J. Koenderink and A. J van Doorn</i>	66
On Automatic Selection of Temporal Scales in Time-Causal Scale-Space <i>T. Lindeberg</i>	94
Some Applications of Representations of Lie Algebras and Lie Groups <i>R. Lenz</i>	114

Recognition of Visual Structure

A Systematic Approach to Geometric-Based Grouping and Non-accidentalness <i>L. Van Gool</i>	126
Multi-Dimensional Signal Processing Using an Algebraically Extended Signal Representation <i>Th. Bülöw and G. Sommer</i>	148
On Hestenes' Formalization for Describing Linear Image Transforms <i>A. V. Chernov and V. M. Chernov</i>	164
Fractal Basis Functions for Pattern Recognition <i>W. Skarbek and K. Ignasiak</i>	176

Processing of the 3D Visual Space

Trilinear Tensor: The Fundamental Construct of Multiple-view Geometry and Its Applications <i>A. Shashua</i>	190
Algebraic and Geometric Tools to Compute Projective and Permutation Invariants <i>G. Csurka and O. Faugeras</i>	207
A Unified Language for Computer Vision and Robotics <i>E. Bayro-Corrochano and J. Lasenby</i>	219
Structure from Translational Observer Motion <i>A. Naeve</i>	235

Representation and Shape Perception

The Geometry of Visual Space Distortion <i>C. Fermüller, L. F. Cheong and Y. Aloimonos</i>	249
The Cascaded Hough Transform as Support for Grouping and Finding Vanishing Points and Lines <i>T. Tuytelaars, M. Proesmans and L. Van Gool</i>	278
Visual Perception Strategies for 3D Reconstruction <i>É. Marchand and F. Chaumette</i>	290

Inference and Action

Statistical Optimization and Geometric Visual Inference <i>K. Kanatani</i>	306
Path Prediction and Classification Based on Non-linear Filtering <i>S. J. Maybank and A. D. Worrall</i>	323
Bottom-up Derivation of the Qualitatively Different Behaviours of a Car across Varying Spatio-Temporal Scales: A Study in Abstraction of Goal-Directed Motion <i>L. Dorst</i>	344

Visual and Motor Signal Neurocomputation

Neural Network Approaches for Perception and Action <i>H. Ritter</i>	356
Geometric Neural Networks <i>E. Bayro-Corrochano and S. Buchholz</i>	379
