Contents

Preface — V		
Acknowle	dgments —— VII	
Part 1: Engineering thermodynamics		
Chapter 1		
Introducti		
1.1	Energy —— 3	
1.2	Energy source —— 5	
1.3	Conversion and utilization of energy —— 16	
1.4	Research contents of fundamentals of thermal engineering —— 18	
	Exercises —— 19	
	Answers —— 20	
Chapter 2		
Basic cond	cepts —— 21	
2.1	Review: introduction —— 21	
2.2	Introduction to the basic concept —— 21	
2.3	Thermodynamic system —— 21	
2.4	Equilibrium state and state parameters —— 23	
2.5	Equation of state and state parameter coordinate diagram —— 26	
2.6	Quasi-static process and reversible process —— 27	
2.7	Work and heat —— 31	
2.8	Summary —— 35	
	Exercises —— 36	
	Answers —— 37	
Chapter 3		
First law o	of thermodynamics —— 39	
3.1	Review: basic concepts —— 39	
3.2	Introduction to the first law of thermodynamics —— 39	
3.3	Storage energy of thermal system —— 39	
3.4	The essence of the first law of thermodynamics —— 40	
3.5	The expression of the first law of thermodynamics for closed system —— 41	
3.6	Stable flow energy equation of open system —— 44	
3.7	The application of stable flow energy equation —— 50	

3.8	Summary —— 57
	Exercises —— 60
	Answers —— 61
Chapter 4	
Property ar	nd process of the ideal gas —— 63
4.1	Review: first law of thermodynamics —— 63
4.2	Introduction to property and process of the ideal gas —— 63
4.3	Ideal gas state equation —— 63
4.4	Thermal capacity, thermodynamic energy, entropy, and enthalpy of ideal gases —— 65
4.5	Thermodynamics, entropy, and enthalpy of ideal gases —— 70
4.6	Ideal gas mixture —— 72
4.7	Purpose of thermal process of ideal gas —— 76
4.8	Summary —— 91
	Exercises —— 93
	Answers —— 94
Chapter 5	
	of thermodynamics —— 99
5.1	Review: the first law of thermodynamics —— 99
	Introduction to the second law of thermodynamics —— 99
5.3	The direction of spontaneous process and the expression of the
- 4	second law of thermodynamics —— 99
5.4	Carnot cycle and Carnot theorem —— 104
5.5 5.6	Entropy —— 111
5.0	Summary —— 118 Exercises —— 118
	Answers —— 119
	, institute of the state of the
Chapter 6	
-	r and wet air —— 121
6.1	Review: gaseous working medium —— 121
6.2	Review: water vapor —— 121
	Water vapor generation process —— 121
6.4	State parameters of water vapor —— 126
6.5	Basic thermal process of water vapor —— 131
6.6	The nature of wet air —— 134
6.7	Summary —— 136
	Exercises — 137
	Answers —— 137

Steam and gas power cycles — 141 7.1 Review: power cycle — 141 7.2 Steam power plant cycles — 141 7.3 Piston internal combustion engine cycle — 151 7.4 Ideal cycle of gas turbine plant — 153 7.5 Summary — 156 Exercises — 156 Answers — 157 Chapter 8 Refrigeration equipment and cycle — 161 8.1 Refrigeration — 161 8.2 Air compression refrigeration cycle — 164 8.3 Vapor compression refrigeration cycle — 164 8.4 Absorption refrigeration cycle — 166 8.5 Heat pump — 168 Exercises — 169 Answers — 169 Part 2: Heat transfer Chapter 9 Basic ways of heat transfer — 177 9.1 Thermal conduction — 178 9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10		Chapter 7		
7.2 Steam power plant cycles — 141 7.3 Piston internal combustion engine cycle — 151 7.4 Ideal cycle of gas turbine plant — 153 7.5 Summary — 156 Exercises — 156 Answers — 157 Chapter 8 Refrigeration equipment and cycle — 161 8.1 Refrigeration — 161 8.2 Air compression refrigeration cycle — 161 8.3 Vapor compression refrigeration cycle — 164 8.4 Absorption refrigeration cycle — 166 8.5 Heat pump — 168 Exercises — 169 Answers — 169 Part 2: Heat transfer Chapter 9 Basic ways of heat transfer — 177 9.1 Thermal conduction — 178 9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10	Steam and gas power cycles —— 141			
7.3 Piston internal combustion engine cycle — 151 7.4 Ideal cycle of gas turbine plant — 153 7.5 Summary — 156 Exercises — 156 Answers — 157 Chapter 8 Refrigeration equipment and cycle — 161 8.1 Refrigeration — 161 8.2 Air compression refrigeration cycle — 161 8.3 Vapor compression refrigeration cycle — 164 8.4 Absorption refrigeration cycle — 166 8.5 Heat pump — 168 Exercises — 169 Answers — 169 Part 2: Heat transfer Chapter 9 Basic ways of heat transfer — 177 9.1 Thermal conduction — 178 9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10	7.1	Review: power cycle —— 141		
7.4 Ideal cycle of gas turbine plant — 153 7.5 Summary — 156 Exercises — 156 Answers — 157 Chapter 8 Refrigeration equipment and cycle — 161 8.1 Refrigeration — 161 8.2 Air compression refrigeration cycle — 164 8.3 Vapor compression refrigeration cycle — 164 8.4 Absorption refrigeration cycle — 166 8.5 Heat pump — 168 Exercises — 169 Answers — 169 Part 2: Heat transfer Chapter 9 Basic ways of heat transfer — 177 9.1 Thermal conduction — 178 9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10	7.2	Steam power plant cycles —— 141		
7.5 Summary — 156 Exercises — 156 Answers — 157 Chapter 8 Refrigeration equipment and cycle — 161 8.1 Refrigeration — 161 8.2 Air compression refrigeration cycle — 164 8.3 Vapor compression refrigeration cycle — 164 8.4 Absorption refrigeration cycle — 166 8.5 Heat pump — 168 Exercises — 169 Answers — 169 Part 2: Heat transfer Chapter 9 Basic ways of heat transfer — 177 9.1 Thermal conduction — 178 9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10	7.3	Piston internal combustion engine cycle —— 151		
Exercises — 156 Answers — 157 Chapter 8 Refrigeration equipment and cycle — 161 8.1 Refrigeration — 161 8.2 Air compression refrigeration cycle — 161 8.3 Vapor compression refrigeration cycle — 164 8.4 Absorption refrigeration cycle — 166 8.5 Heat pump — 168 Exercises — 169 Answers — 169 Part 2: Heat transfer Chapter 9 Basic ways of heat transfer — 177 9.1 Thermal conduction — 178 9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10	7.4	· · · · · · · · · · · · · · · · · · ·		
Chapter 8 Refrigeration equipment and cycle — 161 8.1 Refrigeration — 161 8.2 Air compression refrigeration cycle — 161 8.3 Vapor compression refrigeration cycle — 164 8.4 Absorption refrigeration cycle — 166 8.5 Heat pump — 168 Exercises — 169 Answers — 169 Part 2: Heat transfer Chapter 9 Basic ways of heat transfer — 177 9.1 Thermal conduction — 178 9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10	7.5			
Chapter 8 Refrigeration equipment and cycle — 161 8.1 Refrigeration — 161 8.2 Air compression refrigeration cycle — 161 8.3 Vapor compression refrigeration cycle — 164 8.4 Absorption refrigeration cycle — 166 8.5 Heat pump — 168 Exercises — 169 Answers — 169 Part 2: Heat transfer Chapter 9 Basic ways of heat transfer — 177 9.1 Thermal conduction — 178 9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10				
Refrigeration equipment and cycle — 161 8.1 Refrigeration — 161 8.2 Air compression refrigeration cycle — 161 8.3 Vapor compression refrigeration cycle — 164 8.4 Absorption refrigeration cycle — 166 8.5 Heat pump — 168 Exercises — 169 Answers — 169 Part 2: Heat transfer Chapter 9 Basic ways of heat transfer — 177 9.1 Thermal conduction — 178 9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10		Answers —— 157		
Refrigeration equipment and cycle — 161 8.1 Refrigeration — 161 8.2 Air compression refrigeration cycle — 161 8.3 Vapor compression refrigeration cycle — 164 8.4 Absorption refrigeration cycle — 166 8.5 Heat pump — 168 Exercises — 169 Answers — 169 Part 2: Heat transfer Chapter 9 Basic ways of heat transfer — 177 9.1 Thermal conduction — 178 9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10	Chapter 8			
8.1 Refrigeration — 161 8.2 Air compression refrigeration cycle — 161 8.3 Vapor compression refrigeration cycle — 164 8.4 Absorption refrigeration cycle — 166 8.5 Heat pump — 168 Exercises — 169 Answers — 169 Part 2: Heat transfer Chapter 9 Basic ways of heat transfer — 177 9.1 Thermal conduction — 178 9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10	•	ion equipment and cycle —— 161		
8.3 Vapor compression refrigeration cycle — 164 8.4 Absorption refrigeration cycle — 166 8.5 Heat pump — 168 Exercises — 169 Answers — 169 Part 2: Heat transfer Chapter 9 Basic ways of heat transfer — 177 9.1 Thermal conduction — 178 9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10	_	• •		
8.4 Absorption refrigeration cycle — 166 8.5 Heat pump — 168 Exercises — 169 Answers — 169 Part 2: Heat transfer Chapter 9 Basic ways of heat transfer — 177 9.1 Thermal conduction — 178 9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10	8.2	Air compression refrigeration cycle —— 161		
8.5 Heat pump — 168 Exercises — 169 Answers — 169 Part 2: Heat transfer Chapter 9 Basic ways of heat transfer — 177 9.1 Thermal conduction — 178 9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10	8.3	Vapor compression refrigeration cycle —— 164		
Exercises — 169 Answers — 169 Part 2: Heat transfer Chapter 9 Basic ways of heat transfer — 177 9.1 Thermal conduction — 178 9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10	8.4	Absorption refrigeration cycle —— 166		
Answers — 169 Part 2: Heat transfer Chapter 9 Basic ways of heat transfer — 177 9.1 Thermal conduction — 178 9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10	8.5	Heat pump —— 168		
Part 2: Heat transfer Chapter 9 Basic ways of heat transfer — 177 9.1 Thermal conduction — 178 9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10		Exercises —— 169		
Chapter 9 Basic ways of heat transfer — 177 9.1 Thermal conduction — 178 9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10		Answers —— 169		
9.1 Thermal conduction — 178 9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10	Part 2: Heat transfer			
9.1 Thermal conduction — 178 9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10				
9.2 Thermal convection — 181 9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10	Chapter 9			
9.3 Thermal radiation — 184 9.4 Heat transfer process — 186 9.5 Summary — 190 Exercises — 190 Answers — 191 Chapter 10	-			
9.4 Heat transfer process —— 186 9.5 Summary —— 190 Exercises —— 190 Answers —— 191 Chapter 10	Basic way	s of heat transfer —— 177		
9.5 Summary —— 190 Exercises —— 190 Answers —— 191 Chapter 10	Basic way 9.1	s of heat transfer —— 177 Thermal conduction —— 178		
Exercises —— 190 Answers —— 191 Chapter 10	Basic way 9.1 9.2	s of heat transfer —— 177 Thermal conduction —— 178 Thermal convection —— 181		
Answers —— 191 Chapter 10	9.1 9.2 9.3	s of heat transfer —— 177 Thermal conduction —— 178 Thermal convection —— 181 Thermal radiation —— 184		
Chapter 10	9.1 9.2 9.3 9.4	s of heat transfer —— 177 Thermal conduction —— 178 Thermal convection —— 181 Thermal radiation —— 184 Heat transfer process —— 186 Summary —— 190		
•	9.1 9.2 9.3 9.4	s of heat transfer —— 177 Thermal conduction —— 178 Thermal convection —— 181 Thermal radiation —— 184 Heat transfer process —— 186 Summary —— 190		
The more beautiful 403	9.1 9.2 9.3 9.4	s of heat transfer — 177 Thermal conduction — 178 Thermal convection — 181 Thermal radiation — 184 Heat transfer process — 186 Summary — 190 Exercises — 190		
inermal conduction —— 193	9.1 9.2 9.3 9.4 9.5	Thermal conduction — 178 Thermal convection — 181 Thermal radiation — 184 Heat transfer process — 186 Summary — 190 Exercises — 190 Answers — 191		
10.1 The theoretical basis of thermal conduction —— 194	9.1 9.2 9.3 9.4 9.5	Thermal conduction — 178 Thermal convection — 181 Thermal radiation — 184 Heat transfer process — 186 Summary — 190 Exercises — 190 Answers — 191		
	9.1 9.2 9.3 9.4 9.5 Chapter 1 Thermal c	s of heat transfer — 177 Thermal conduction — 178 Thermal convection — 181 Thermal radiation — 184 Heat transfer process — 186 Summary — 190 Exercises — 190 Answers — 191		
10.2 Steady-state heat conduction —— 203	9.1 9.2 9.3 9.4 9.5 Chapter 1 Thermal c	Thermal conduction — 178 Thermal convection — 181 Thermal radiation — 184 Heat transfer process — 186 Summary — 190 Exercises — 190 Answers — 191 O onduction — 193 The theoretical basis of thermal conduction — 194		
10.2 Steady-state heat conduction — 20310.3 Summary — 209	9.1 9.2 9.3 9.4 9.5 Chapter 1 Thermal of 10.1 10.2	Thermal conduction — 178 Thermal convection — 181 Thermal radiation — 184 Heat transfer process — 186 Summary — 190 Exercises — 190 Answers — 191 O onduction — 193 The theoretical basis of thermal conduction — 194 Steady-state heat conduction — 203		
	9.1 9.2 9.3 9.4 9.5 Chapter 1 Thermal of 10.1 10.2	s of heat transfer — 177 Thermal conduction — 178 Thermal convection — 181 Thermal radiation — 184 Heat transfer process — 186 Summary — 190 Exercises — 190 Answers — 191 onduction — 193 The theoretical basis of thermal conduction — 194 Steady-state heat conduction — 203 Summary — 209		
10.2 Steady-state heat conduction —— 203	9.1 9.2 9.3 9.4 9.5 Chapter 1 Thermal c	Thermal conduction — 178 Thermal convection — 181 Thermal radiation — 184 Heat transfer process — 186 Summary — 190 Exercises — 190 Answers — 191 O onduction — 193 The theoretical basis of thermal conduction — 194		
10.3 Summary —— 209	9.1 9.2 9.3 9.4 9.5 Chapter 1 Thermal of 10.1 10.2	s of heat transfer — 177 Thermal conduction — 178 Thermal convection — 181 Thermal radiation — 184 Heat transfer process — 186 Summary — 190 Exercises — 190 Answers — 191 onduction — 193 The theoretical basis of thermal conduction — 194 Steady-state heat conduction — 203 Summary — 209		
10.3 Summary —— 209	9.1 9.2 9.3 9.4 9.5 Chapter 1 Thermal of 10.1 10.2	s of heat transfer — 177 Thermal conduction — 178 Thermal convection — 181 Thermal radiation — 184 Heat transfer process — 186 Summary — 190 Exercises — 190 Answers — 191 onduction — 193 The theoretical basis of thermal conduction — 194 Steady-state heat conduction — 203 Summary — 209 Exercises — 209		

Convection heat transfer —— 213		
11.1	Convective heat transfer —— 213	
11.2	Newton's cooling law —— 214	
11.3	Influence factors on convective heat transfer —— 217	
11.4	Summary —— 220	
	Exercises —— 220	
	Answers —— 222	
Chapter 1	2	
Radiative	heat transfer —— 225	
12.1	Basic concepts of thermal radiation —— 225	
12.2	The basic law of blackbody radiation —— 231	
12.3	Emission characteristics of actual objects —— 234	
12.4	Atmospheric greenhouse effect and greenhouse effect —— 236	
	Exercises —— 238	
	Answers —— 239	
Chapter 1	3	
-	sfer process and heat exchanger —— 241	
13.1	Heat transfer process —— 241	
13.2	Heat exchanger —— 247	
13.3	Enhancing and weakening of heat transfer —— 256	
13.4	Summary —— 259	
	Exercises — 259	
	Answers —— 259	
Appendix Table A1: Saturated and unsaturated vapor (by temperature) —— 261		
	, , , , , , , , , , , , , , , , , , , ,	
Appendix Table A2: Saturated and unsaturated vapor (by pressure) — 265 Appendix Table A3: Unsaturated water and superheated water vapor — 269
