

Contents

Preface	ix
---------	----

I Cell Physiology

1 The Cell Membrane	I
2 Neurotransmission	16
3 Muscle Cell Physiology	22
<i>Questions & Answers</i>	31

II Neurophysiology

4 Autonomic Nervous System	34
5 Sensory Systems	46
6 Motor Systems	65
7 Higher Cortical Functions	78
<i>Questions & Answers</i>	82

III Cardiovascular Physiology

8 Electrophysiology of the Heart	88
9 The Heart as a Pump	94
10 The Circulation	100
11 Response of the Cardiovascular System to Gravity, Exercise, and Hemorrhage	116
<i>Questions & Answers</i>	119

IV Respiratory Physiology

12 Ventilation and Pulmonary Blood Flow	126
13 Gas Exchange and Transport	136
14 Control of Respiration	145
<i>Questions & Answers</i>	149

V Renal Physiology and Acid–base Balance

15 Renal Anatomy, Body Fluids, Glomerular Filtration, and Renal Clearance	152
16 Renal Tubular Transport	162
17 Regulation of Water Balance and the Concentration and Dilution of Urine	177
18 Acid–base Balance	183
<i>Questions & Answers</i>	194

VI Gastrointestinal Physiology

19 Structure and Regulation of the Gastrointestinal Tract	199
20 Gastrointestinal Motility	205
21 Gastrointestinal Secretion	214
22 Digestion and Absorption	227
<i>Questions & Answers</i>	237

VII Endocrine Physiology

23 General Principles of Endocrine Physiology	242
24 The Pituitary Gland	245
25 Thyroid Hormones	252
26 Calcium Metabolism	260
27 Adrenal Hormones	269
28 Endocrine Pancreas	279
<i>Questions & Answers</i>	286

VIII Reproductive Physiology

29 Sexual Differentiation, Puberty, and Male and Female Reproduction	292
<i>Questions & Answers</i>	313

Index	317
