

CONTENTS

Chapter 1. Convex Cones and linear Inequalities -----	1
1. Separation theorems -----	1
2. Cones and duals -----	5
3. Linear inequalities over cones -----	13
4. Theorems of the alternative -----	22
 Chapter 2. Mathematical Programming over Cones -----	 28
5. Linear programming -----	28
6. Quadratic programming -----	35
7. The complementarity problem -----	40
8. Non-linear programming -----	45
 Chapter 3. Cones in Matrix Theory -----	 49
9. Cones of matrices -----	50
10. Lyapunov type theorems -----	58
11. Cone monotonicity -----	70
12. Iterative methods for linear systems -----	79
References -----	85
Glossary of Notations -----	95
