1 Scientific Talks—Effective Communication that Assists with the Conveyance of Research Results	1
1.1 The Framework Conditions for Presentations Have Changed	2
1.2 Talks Pay off Fourfold	2
1.3 Differences Between the Written and Spoken Word—Paper and Presentation	3
1.4 Scientific Talk and Business Presentation—The Distinctions and Special Features	7
References	8
2 Conference Meetings and Co.—Occasions for Scientific Presentations and Talks	9
2.1 Formats for Scientific Target Groups	9
2.1.1 Academic Conferences	9
2.1.2 Academic Workshops	10
2.1.3 Poster Session and Poster Walk	11
2.1.4 Brown Bag Events	12
2.1.5 BarCamp	13
2.1.6 Lightning Talks	14
2.1.7 Research Pitch	14
2.2 Formats for Target Groups from the General Public	16
2.2.1 Science Slam	16
2.2.2 Science Cafe	17
2.2.3 Science Speed Dating	18
References	19
3 From the Collation of Material to the Scientific Talk—Preparation as the Key to Success	21
3.1 Research Results, Papers, Articles and Additional Information—Collation of Material for Scientific Presentations	22
3.2 Classical Structure of Scientific Talks	23
3.3 General Conditions of the Talk—Audience, Goal and Time Limit	25
3.3.1 The Audience—The Decisive People for a Talk	25
	ix

3.3.2	Goal—What Should the Talk Set Out to Achieve?	28
3.3.3	Time Management—(Not) a Problem	30
3.4	Designing the Dramaturgy of the Talk—Defining the Content and the Central Theme	31
3.4.1	Types of Information for the Presentation	32
3.4.2	Using Scientific Storylining to Identify the Core Information for the Talk	33
3.5	Visualisation in the Talk—Selecting and Using Media in a Targeted Manner	34
3.5.1	Making Proper Use of the Media	34
3.5.2	Main, Spontaneous and Permanent Media	38
3.6	Poster—Illustrated Summary of Research	41
3.6.1	Planning and Preparing Scientific Posters	42
3.6.2	Use Four Important Design Elements	46
3.6.3	Considering the Design Principles of Proximity, Alignment, Repetition and Contrast	49
3.6.4	Designing Scientific Posters	50
3.6.5	Tips for Poster Presentations	51
	References	54
4	Visualisation in the Talk—Design Slides in a Professional Manner	55
4.1	Fundamentals of Design—Nine Rules for Better Slides	56
4.2	Classical and Illustrative Visualisation Elements	57
4.2.1	Classic Visualisation Elements	58
4.2.2	Illustrative Visualisation Elements	60
4.3	Five Principles for Effective Slides in Academic Talks	63
4.3.1	Create a Separate Slide for Each Core Message and Vice Versa	64
4.3.2	Arranging Text Boxes and Numbers in Tabular Form	69
4.3.3	Show Charts and Other Forms of Illustrations	74
4.3.4	Avoid the Use of Confusing and Unnecessary Elements	99
4.3.5	Make Use of Animations	103
	References	105
5	Communicating Methods, Results and Knowledge Gains—The Talk and Presentation	107
5.1	Final Preparation Activities at Home and in the Conference Room	107
5.1.1	Preparatory Activities from Home	108
5.1.2	Preparatory Work in the Conference Room	111
5.2	Introduction—First Impression, Lead-Up to the Topic and Increasing People's Attention	114
5.2.1	Three Elements Form the Basis for a Classic Introduction	115

5.2.2	Tailor the Introduction with “Hooks”	120
5.2.3	Starting With and Without Visualisation	127
5.3	Main Part—The Actual Presentation	128
5.3.1	Classic Structure	128
5.3.2	A Results-First Structure	129
5.3.3	Hourglass Structure	130
5.3.4	Keeping the Audience’s Level of Attention High	131
5.4	Conclusion—Anchoring Core Theses and Knowledge Gain	132
5.4.1	Summary and Visualisation of the Important Contents of the Talk	132
5.4.2	Conclusions and Future Research	134
5.4.3	Closing Point and Transition to the Q&A Session	134
5.5	Question and Answer Session and Discussion	135
5.5.1	Chairperson—Moderator and Timekeeper	135
5.5.2	Discussant—Critic and Promoter of Understanding	136
5.6	Follow-Up After a Scientific Presentation	137
	References	138
6	Remarkable and Useful Things—A Toolbox for Scientific Talks	139
6.1	Communication and Its Impact at Talks	139
6.1.1	Body Language in Lectures—Eye Gaze Behaviour, Facial Expressions, Gestures and Posture	141
6.2	Stage Fright—A Human Survival Programme Between Brilliant Performance and a Mental Block	150
6.2.1	Negative and Positive Effects of Nervousness	151
6.2.2	Classic Techniques to Reduce Nervousness	152
6.2.3	Techniques to Reduce Nervousness Just Before the Talk	153
6.2.4	Techniques to Reduce Nervousness During the Talk	157
6.2.5	Slips of the Tongue, Forgotten Points and Losing the Thread	157
6.3	Recite the Talk Freely, Read It Out or Learn It off by Heart	159
6.3.1	Reciting Freely	159
6.3.2	Reading Aloud in a Talk	160
6.3.3	Reciting from Memory	160
6.4	Guiding the Audience’s Gaze—Using Laser Pointers, Animations and Your Hands	161
6.4.1	Guiding the Audience’s Gaze Using the Laser Pointer	161
6.4.2	Guiding the Audience’s Gaze Using Animations	162
6.4.3	Guiding the Audience’s Gaze with Your Hands	162
6.5	Hyperlinks—Provide Additional Information or Abbreviate the Talk if Necessary	163
6.5.1	Provide Additional In-Depth Information	163
6.5.2	Dealing with Time Constraints	163
6.6	Steering the Discussion and the Audience	164

6.6.1	Answering Constructive Questions and Responding to Factual Statements	165
6.6.2	Dealing with Unfair Criticism, Killer Arguments and Deadlocked Situations	168
6.6.3	Interrupt Deadlocked Discussions with Metacommunication	169
6.6.4	4 Strategies for Different Situations in the Discussion	170
