

CONTENTS

1 BASIC ASPECTS OF INTERNAL FIXATION

Chapter Author: S.M. Perren

Group Members: M.E. Müller, R. Schenk, and R. Schneider

With 78 Figures

1.1 Aims and Principles	1
M. Allgöwer, M.E. Müller, and S.M. Perren	
1.1.1 Introduction	1
1.1.2 Life is Movement, Movement is Life	1
1.2 Basic Aspects	4
S.M. Perren (Constructive criticism of Ch. Colton and J. Schatzker is gratefully acknowledged)	
1.2.1 Bone as a Material	4
1.2.2 The Bone Fracture	6
1.2.3 Spontaneous Bone Repair: Healing Without Treatment	8
1.2.4 Basic Aims of Fracture Treatment	8
1.2.5 Aims of Operative Fracture Treatment	10
1.3 Scientific Background to Internal Fixation	12
1.3.1 Technical Background	12
1.3.1.1 Stability	12
1.3.1.2 Force, Stress, Strain, Stiffness	16
1.3.1.3 General Aspects of Load	16
1.3.1.4 Physiological Load	23
1.3.1.5 Principles of Surgical Stabilization	23
1.3.1.6 Mechanics of Interfaces	46
1.3.2 Biological Reactions	52
1.3.2.1 Stability and Compression	54
1.3.2.2 Biomechanics of Instability	56
1.3.2.3 Biomechanics of Stability	58
1.3.2.4 Reaction to Changes of Physiological Loading	58
1.3.2.5 Disturbance of Blood Supply to Bone	62
1.3.2.6 Reaction to Disturbance of the Blood Supply	64
1.3.3 Bone Healing	66
1.3.3.1 Basic Requirements	68
1.3.3.2 Type of Healing	68
1.3.3.3 Spontaneous (Indirect) Healing of Bone	68

1.3.3.4	Direct (or Primary) Bone Healing	70
1.3.3.5	Non-union	70
1.3.3.6	Relevance of Different Types of Healing	72
1.3.3.7	Controlling Mechanisms of Bone Healing	72
1.3.4	Scientific Background of Development	72
1.3.4.1	The Concept of Biological Plating: The LC-DCP	74
1.3.4.2	Improved Effectiveness of External Fixator Pins	80
1.3.4.3	The Development of “Tube-to-Tube” Clamps as an Example of the Development Within the AO Group’s Technical Commissions	82
1.3.4.4	The New Design of the Nails	84
1.3.4.5	Unreamed Intramedullary Nailing	86
1.3.4.6	Instrumented Nail for Telemetry	88
1.3.4.7	Distraction Osteogenesis	90
1.3.5	Implant Materials	94
1.3.5.1	Metals.	94
1.3.5.2	Other Implant Materials	95
1.4	AO Teaching	96
	S.M. Perren	
1.4.1	AO Courses	96
1.4.2	AO Workshops	96
1.4.3	AO Fellowships	96
1.4.4	AO Research Grants	98
1.4.5	AO Video Tapes	98
1.4.6	AO Artificial Bones and Limbs	100
1.5	Documentation	102
	P. Matter and M. Bühler	
1.6	Development	106
1.6.1	Principles and Guidelines.	106
1.6.2	Techniques	106
1.6.3	Instrumentation and Implants.	107
1.6.4	The Technical Commissions of the AO	107
1.7	Glossary	108
	References	112

Appendix A

The Comprehensive Classification of Fractures of Long Bones	118
---	-----

M.E. Müller

The Principle of the Classification	118
The Anatomic Location	120
The Fracture Types	122
The Coding of the Diagnosis	122
11– Humerus Proximal	124
12– Humerus Diaphysis	126
13– Humerus Distal	128
21– Radius/Ulna Proximal	130

22– Radius/Ulna Diaphysis	132
23– Radius/Ulna Distal	134
31– Femur Proximal	136
32– Femur Diaphysis	138
33– Femur Distal	140
41– Tibia/Fibula Proximal	142
42– Tibia/Fibula Diaphysis	144
43– Tibia/Fibula Distal	146
44– Tibia/Fibula, Malleolar Segment	148
Glossary to Appendix A	150

Appendix B

Classification of Soft Tissue Injuries	151
--	-----

Th. Rüedi, J.R. Border, and M. Allgöwer

Skin Lesions IC (Closed Fractures)	152
Skin Lesions IO (Open Fractures)	154
Muscle/Tendon Injury (MT)	156
Neurovascular Injury (NV)	156
Diagnosis of the Injury on Digitized X-Rays	158

2 PREOPERATIVE PLANNING AND PRINCIPLES OF REDUCTION

Chapter Author: J. Mast

Group Members: P. Feischl, J. Funding, and D. Helfet

With 8 Figures

2.1 Preoperative Planning	159
2.1.1 Equipment Needed	159
2.1.2 Technique of Overlay Tracings	159
2.1.2.1 Planning from the Normal Side	159
2.1.2.2 Direct Overlay Technique	160
2.1.2.3 Use of Templates	160
2.1.2.4 Planning from the Physiological Axes	160
2.1.3 Additional Preoperative Planning	160
2.1.4 Conclusion	160
2.2 Principles of Reduction	170
2.2.1 What Reduction Must Achieve	170
2.2.2 Types of Operative Reduction	170
2.2.2.1 Manual Reduction	170
2.2.2.2 Mechanical Reduction	172
2.2.3 Conclusion	176
Reference	176

3 SCREWS AND PLATES AND THEIR APPLICATION

Chapter Author: J. Schatzker

Group Members: Initial input by A. Alho and J. Sheehan is gratefully acknowledged

With 58 Figures

3.1	Screws	179
3.1.1	Function of Screws	179
3.1.2	Types of Screws	179
3.1.2.1	Self-Tapping and Non-Self-Tapping Screws	179
3.1.3	Cortex and Cancellous Bone Screws	182
3.1.3.1	Cortex Screws	182
3.1.3.2	Cancellous Bone Screws	184
3.1.3.3	Malleolar Screws	186
3.1.4	Techniques of Screw Fixation	186
3.1.4.1	The Lag Screw	188
3.1.4.2	Technique of Lag Screw Fixation	188
3.1.5	Indication for Lag Screw Fixation	194
3.2	Plates	200
3.2.1	Function	200
3.2.2	Protection or Neutralization Plates	200
3.2.3	Special Protection or Neutralization Plates	202
3.2.4	Contouring of Plates	204
3.2.5	Buttress Plate	208
3.2.5.1	Technical Guidelines for the Application of a Buttress Plate	208
3.2.5.2	Plates of Special Design	210
3.3	Axial Compression and the Compression and Tension Band Plates	218
3.3.1	Compression Plates	218
3.3.2	Technique of Achieving Axial Compression	220
3.3.3	“Overbending” of Plates	222
3.3.4	Combination of Compression Plate and Lag Screw	224
3.4	Dynamic Compression	226
3.4.1	The Eccentric Loading of Bones	226
3.4.2	Tension Band Fixation	226
3.5	Bridging Plates	229
3.5.1	Bridge Plate	229
3.5.2	Wave Plate	229
3.5.3	How Many Screws?	229
3.6	Self-Compressing Plates	232
	S.M. Perren	
3.6.1	Semi-Tubular, One-Third Tubular and Quarter-Tubular Plates, Dynamic Compression Plates	232
3.6.2	Limited Contact DCP (LC-DCP)	240
3.6.2.1	Shortcomings of the DCP	240
3.6.2.2	Solutions to the Problems of the DCP	241
3.6.2.3	Clinical Application of the LC-DCP	244

3.7 Angled Plates	252
3.7.1 General Principles	252
3.7.2 Preoperative Planning	252
3.7.3 Implants and Instruments	254
3.7.4 The Angled Plates for the Proximal and Distal Femur	254
3.7.5 The Position of the Blades Within the Proximal Femur	256
3.7.6 The Instruments	258
3.7.7 Proximal Femur: Preparation of the Seat for the Blade	260
3.7.8 Insertion of the Plates into the Proximal Femur	264
3.7.9 Insertion of the Plates into the Distal Femur	266
3.8 The Dynamic Hip Screw (DHS) and Dynamic Condylar Screw (DCS)	270
P. Regazzoni	
3.9 Cannulated Cancellous Bone Screws	282
M. Allgöwer	
3.9.1 The Large Cannulated Cancellous Bone Screws	282
3.9.2 The Small Cannulated Cancellous Bone Screw	286
References	290

4 MEDULLARY NAILING OF FEMUR AND TIBIA

Chapter Authors: S. Weller and D. Höntsch

Contributors: F. Baumgart and R. Frigg

Group Members: M. Chapman, I. Kempf, and G. Ritter

With 79 Figures

4.1 Intramedullary Nailing	291
4.1.1 Indications for Intramedullary Nailing	291
4.1.2 Open Versus Closed Intramedullary Nailing	292
4.2 AO/ASIF Implants for Intramedullary Nailing	292
4.2.1 Design History of the AO/ASIF Intramedullary Nail	292
4.2.2 The AO/ASIF Universal Femoral Nail	294
4.2.3 AO/ASIF Universal Tibial Nail	296
4.2.4 The Locking Bolt	298
4.3 AO/ASIF Instruments for Intramedullary Nailing	298
4.3.1 Instruments for Reaming the Medullary Canal	298
4.3.2 Instruments for Inserting Universal Intramedullary Nails	302
4.3.3 Locking Instruments for Femoral and Tibial Intramedullary Nails	310
4.3.4 The Large Distractor	316
4.4 Intramedullary Nailing Technique for Closed Fractures of the Femur	322
4.4.1 Anatomic Considerations	322
4.4.2 Preoperative Positioning of the Patient	324
4.4.3 Choice of Nail Length	326
4.4.4 Opening the Medullary Canal	328
4.4.5 Reaming Technique	328
4.4.6 Inserting the Nail	330
4.4.7 Locking	330

4.5	Intramedullary Nailing Technique for Closed Fractures of the Tibia	332
4.5.1	Anatomic Considerations	332
4.5.2	Preoperative Positioning of the Patient	334
4.5.3	Choice of Nail Length	336
4.5.4	Opening the Medullary Canal	338
4.5.5	Reaming	340
4.5.6	Inserting the Nail	342
4.5.7	Locking of Universal Tibial and Femoral Nails	346
4.5.7.1	Distal Locking	346
4.5.7.2	Proximal Locking	354
4.5.8	General Remarks on Using the Image Intensifier	358
4.6	Complications	358
4.7	Unreamed Nailing	358
4.7.1	Introduction	358
4.7.2	History of Unreamed Nails	360
4.7.3	Design of the AO Unreamed Tibia Nail	360
4.7.4	Indications	362
4.7.5	Contraindications	362
4.7.6	Surgical Procedures	362
4.7.6.1	Preoperative Planning	362
4.7.6.2	Implantation	364
4.7.6.3	Interlocking	364
4.7.6.4	Postoperative Care	364
	References	364

5 EXTERNAL FIXATION

Chapter Author: F. Behrens
Contributors: M. Allgöwer, D.L. Fernandez, G. Hierholzer,
S.M. Perren, and P. Regazzoni
Group Members: M. Allgöwer, G. Hierholzer, and R. Masliah
With 21 Figures

5.1	Introduction	367
5.1.1	History	367
5.1.2	AO External Fixators	368
5.2	Components and Instrumentation of the Tubular External Fixator	368
5.2.1	Implants	368
5.2.2	Basic Frame Components	368
5.2.3	Additional Components and Implants	370
5.2.4	Instrumentation	372
5.3	Basic Fixator Configurations	374
5.4	Principles of External Fixation	374
5.4.1	Limb Anatomy	376
5.4.2	Injury Access	376
5.4.3	Mechanical Demands	376
5.4.4	Patient Comfort	378

5.5 Application of a Fixator Frame	378
5.5.1 Schanz Screw Insertion	378
5.5.2 Mounting of Different Fixator Frames	382
5.5.2.1 Simple Unilateral Frame	382
5.5.2.2 Modular Unilateral Frame – With Universal Joints or the Tube-Tube Clamp	384
5.5.2.3 Double-Tube Unilateral Frame	388
5.5.2.4 Two-Plane Unilateral Frame – “Delta or V-Shaped Frame”	388
5.5.3 Additional Maneuvers	388
5.6 Postoperative Treatment	390
5.7 Fracture Healing and Frame Destabilization	390
5.7.1 What Next After External Fixation?	392
5.8 Specific Locations and Indications	393
5.8.1 Lower Leg	393
5.8.2 Femur and Knee	393
5.8.3 Pelvis	394
5.8.4 Upper Extremity	396
5.8.5 Fusions and Osteotomies	398
5.8.6 Segment Transport and Bone Lengthening	406
5.9 Complications	408
References	410

6 PRE-, INTRA- AND POSTOPERATIVE GUIDELINES

Chapter Author: P. Matter

Group Members: J. Border, F. Harder, and M. Horowitz

With 3 Figures

6.1 The Timing of Surgery	411
6.2 Organizational Prerequisites	412
6.3 Preventing Wound Infection	413
6.4 General Guidelines for Operative Procedures	413
6.4.1 Preoperative Planning	413
6.4.2 Preparation of the Operative Field	413
6.4.3 Preoperative Instructions and Preparation of Instruments and Implants	414
6.4.4 The Operation	414
6.4.5 Cancellous Bone Grafts	415
6.4.6 Wound Closure	415
6.5 Antibiotics	420
6.6 Prevention of Thromboembolism	420
6.7 Radiological Follow-Up of Bone Healing	421
6.7.1 General Remarks	421
6.7.2 X-Ray Assessment of Fractures Stabilized by Lag Screws and Plates	422
6.8 Special Guidelines for Postoperative Treatment and Patient Guidance in the Most Common Fractures	423
6.8.1 General Recommendations	423
6.8.1.1 Plan for Weight-Bearing and X-Ray Controls of the Fractures of the Lower Extremity	423

6.8.2	Scheme of Gradually Increasing Functional and Weight-Bearing Challenge to Typical Fractures of the Lower Extremity	424
6.8.2.1	Schedule Following “State of the Art ORIF”	424
6.9.	Metal Removal	424
6.9.1	Upper Limb	424
6.9.2	Lower Limb	424
	References	426
7	SCAPULA, CLAVICLE, HUMERUS	
	Chapter Authors: Th. Rüedi and L. Schweiberer	
	Group Members: W. Bandi and U. Holz	
	With 20 Figures	
7.1	Fractures of the Scapula	427
7.1.1	Classification of Scapula Fractures	427
7.1.2	Indications for Surgery	427
7.1.3	Approach to the Shoulder Joint	430
7.1.3.1	Dorsal Access	430
7.1.3.2	Ventral Access	432
7.1.4	Postoperative Treatment	432
7.2	Clavicular Fractures (Including Luxation of Adjacent Joints)	434
7.2.1	Indications for Surgery	434
7.2.2	Approach to the Clavicle	434
7.2.3	Choice of Implant	434
7.2.4	Dislocation of the Sternoclavicular Joint	436
7.2.5	Dislocation of the Acromioclavicular Joint	436
7.2.6	Indications for Surgery	436
7.3	Fractures of the Humerus	438
7.3.1	Fractures of the Proximal Humerus	438
7.3.1.1	Classification	438
7.3.1.2	Indications for Surgery	438
7.3.1.3	Approach	440
7.3.1.4	Postoperative Treatment	440
7.3.2	Fractures of the Humeral Shaft	442
7.3.2.1	Classification	442
7.3.2.2	Indications for Surgery	442
7.3.2.3	Approach	442
7.3.2.4	Choice of Implant	444
7.3.2.5	Postoperative Treatment	444
7.3.3	Fractures of the Distal Humerus	446
7.3.3.1	Classification	446
7.3.3.2	Approach	446
7.3.3.3	Fractures of the Distal Extra-articular Humerus (Type A)	448
7.3.3.4	Fractures of the Distal Intra-articular Humerus (Types B and C)	448
7.3.3.5	Postoperative Treatment	450
	References	452

8 FOREARM AND HAND/MINI-IMPLANTS

Chapter Author: U. Heim

Group Members: J.M. Ortega, A. Pannike, and B. Spiessl

With 22 Figures

8.1	Introduction	453
8.2	Proximal Lesions	453
8.2.1	Proximal Ulna (Olecranon)	453
8.2.1.1	Positioning and Approach	454
8.2.1.2	Tension Band Technique in Transverse Olecranon Fractures	460
8.2.1.3	Internal Fixation in Oblique Fractures	462
8.2.1.4	Stable Internal Fixation in Comminuted Fractures	462
8.2.1.5	Screw Fixation of the Coronoid Process of the Ulna	462
8.2.1.6	Fracture Dislocations of the Elbow	462
8.2.2	Fractures of the Radial Head	464
8.2.2.1	Classification	464
8.2.2.2	Positioning and Approach	464
8.2.2.3	Internal Fixation	464
8.2.2.4	Postoperative Treatment	466
8.2.3	Posterior Fracture Dislocations of the Elbow (Posterior Monteggia Injury).	466
8.3	Forearm Shaft	466
8.3.1	Approaches to Forearm Bones	466
8.3.1.1	Shaft of the Ulna	467
8.3.1.2	Shaft of the Radius	467
8.3.1.3	Proximal Shaft of Both Forearm Bones (Boyd)	468
8.3.2	Reduction	469
8.3.2.1	General Considerations	469
8.3.2.2	Reduction Tactics in Fractures of Both Bones	469
8.3.3	Internal Fixation	470
8.3.3.1	Implants	470
8.3.3.2	Bone Graft	470
8.3.3.3	Wound Closure	470
8.3.4	Postoperative Treatment	472
8.3.5	Particular Situations and Special Osteosyntheses	472
8.3.5.1	Open Fractures Grades 2 and 3	472
8.3.5.2	Application of the External Fixator	472
8.3.6	Fracture Dislocation of the Forearm Bones	474
8.3.6.1	Monteggia Fractures	474
8.3.6.2	Galeazzi Fractures	474
8.4	Distal Forearm	476
8.4.1	Fractures of the Distal Radius	476
8.4.2	Approaches to the Distal Radius	478
8.4.2.1	Dorsal Approach	478
8.4.2.2	Volar Approach	478
8.4.2.3	Implants	478
8.4.2.4	Distal Ulna	480

8.5 Internal Fixation in the Hand Skeleton	480
8.5.1 Fractures of the Hand Skeleton	480
8.5.2 Approaches	480
8.5.3 Postoperative Treatment	482
References	484

9 PELVIS

Chapter Author: M. Tile

Group Members: C. Burri and J. Poigenfürst

With 11 Figures

9.1 Introduction	485
9.2 Pelvic Stability	486
9.3 Classification	488
9.3.1 Type A – Stable, Minimally Displaced	488
9.3.2 Type B – Rotationally Unstable, Vertically Stable	488
9.3.2.1 Type B1 – Open Book Injury, External Rotation	488
9.3.2.2 Type B2 – Lateral Compression Injury, Internal Rotation	488
9.3.2.3 Type B3 – Bilateral B-Type Injury	490
9.3.3 Type C – Rotationally and Vertically Unstable (Vertical Shear)	490
9.4 Decision-Making and Indications for Surgery	492
9.5 Approaches	492
9.5.1 Anterior Pelvis	492
9.5.2 Posterior Pelvis	494
9.5.2.1 Anterior Approach	494
9.5.2.2 Posterior Approach	494
9.6 Reduction	494
9.7 Methods of Internal Fixation	494
9.7.1 Anterior Pelvis: Symphysis Pubis	494
9.7.2 Posterior Pelvis: Sacral Fracture	496
9.7.3 Sacroiliac Dislocation	498
9.7.3.1 Anterior Approach	498
9.7.3.2 Posterior Approach	498
9.7.4 Iliac Fractures	498
References	500

10 ACETABULUM

Chapter Author: J.M. Matta

Group Members: J. Cockin, E. Letournel and Th. Rüedi

With 17 Figures

10.1 Introduction	501
10.2 Diagnosis	501
10.3 Fracture Classification	504
10.4 Surgical Approaches	506

10.5	Timing and Planning	514
10.6	Reduction and Fixation Techniques	514
10.7	Postoperative Treatment	516
	References	518

11 PROXIMAL FEMUR

Chapter Author: R. Ganz

Group Members: N.J. Canha, F. Gonzalo-Vivar, and E. Trojan

With 16 Figures

11.1	Fractures of the Femoral Head	519
11.2	Femoral Neck Fractures	522
11.3	Fractures of the Trochanteric Region	528
11.3.1	Subtrochanteric Fractures	532
11.3.2	Fractures of the Proximal End of the Femur Combined with Ipsilateral Shaft Fractures	532
11.3.3	Metastatic Fractures of the Proximal Femur	532
11.4	Aftercare of Proximal Femur Fractures	534
	References	534

12 FEMORAL SHAFT AND DISTAL FEMUR

Chapter Author: H. Tscherne

Group Members: E. Beck and B. Mallin

With 12 Figures

12.1	Introduction	535
12.2	Subtrochanteric Fractures of the Femoral Shaft	536
12.2.1	Technique of Condylar Plate Fixation of the Proximal Femoral Shaft	536
12.2.2	Fixation of Subtrochanteric Fractures with the Dynamic Condylar Screw (DCS)	540
12.2.3	Technique of Inserting the Universal Interlocking Nail	542
12.3	Fractures of the Middle Third of the Femoral Shaft	546
12.4	Extra-Articular Fractures of the Distal Femur	548
12.5	Postoperative Treatment	552
	References	552

13 PATELLA AND TIBIA

Chapter Author: R. Szyszkowitz

Group Members: M. Allgöwer, H.P. Burch, R. Teitge, and H. Vasey

With 30 Figures

13.1	General Considerations	553
13.2	Surgical Approach to the Patella	554
13.3	Surgical Approach to the Tibia	554
13.3.1	Surgical Approach to the Tibial Plateau	554
13.3.2	Surgical Approach to the Shaft of the Tibia	556
13.3.3	Surgical Approach to the Distal Third of the Tibia Including Pilon Fractures	562

13.4	Fractures of the Patella	564
13.4.1	Tension Band Wiring of the Patella	564
13.4.2	Internal Fixation of the Patella with Two Kirschner Wires and Tension Band	566
13.4.3	Postoperative Treatment	566
13.5	Fractures of the Tibia	568
13.5.1	Tibial Plateau Fractures	568
13.5.1.1	Concomitant Injuries	568
13.5.1.2	Internal Fixation of Different Types of Tibial Plateau Fracture	568
13.5.1.3	Monocondylar Fractures (Type B)	569
13.5.1.4	Bicondylar Fractures (Type C)	572
13.5.1.5	Postoperative Treatment	574
13.5.2	Tibial Shaft Fractures	574
13.5.2.1	Principles of Treatment	574
13.5.2.2	Indications for Open Reduction and Internal Fixation	574
13.5.2.3	Guidelines for the Selection of Stabilization Procedures for Shaft Fractures	575
13.5.2.4	Fracture Types	576
13.5.3	Fractures of the Distal Third of the Tibia with Extension into the Ankle Joint: “Pilon Fractures”	586
13.5.3.1	Operative Procedures with Fibula Fracture Present	588
13.5.3.2	Operative Procedure with an Intact Fibula	592
	References	594

14 MALLEOLAR FRACTURES

Chapter Authors: B.G. Weber and Ch. Colton

Group Members: J. Hughes and K.H. Jungbluth

With 10 Figures

14.1	Introduction	595
14.2	Significant Anatomic and Functional Features	595
14.3	Classification of Malleolar Fractures According to Weber and Danis	598
14.3.1	Type A (44-A1-3)	598
14.3.2	Type B (44-B1-3)	598
14.3.3	Type C (44-C1-3)	600
14.4	Timing of Surgery	600
14.5	Technique of Radiological Diagnosis of Ankle Injuries	602
14.6	Steps in Open Reduction and Internal Fixation	604
14.6.1	Type 44-A1-3 Malleolar Fractures	606
14.6.2	Type 44-B1-3 Malleolar Fractures	608
14.6.3	Type 44-C1-3 Malleolar Fractures	610
14.7	Postoperative Treatment	612
	References	612

15 FOOT

Chapter Author: S.T. Hansen

Group Members: H. Bèzes, G. Friedebold and M. Landolt

With 7 Figures

15.1 Introduction	613
15.2 Individual Bones	613
15.2.1 Talus Fractures	613
15.2.2 Calcaneus Fractures	614
15.2.3 Navicular Fractures	618
15.2.4 Cuboid Fractures	620
15.2.5 Tarsometatarsal Fracture Dislocations	622
15.2.6 Metatarsal Fractures	624
15.2.7 Metatarsophalangeal Joint Fractures	626
References	626

16 THE SPINE

Chapter Authors: M. Aebi and J.K. Webb

Contributors: W. Dick, S. Gertzbein, F. Magerl, and E. Morscher

Group Members: H. Cotta, F. Magerl, E. Morscher,

S. Olerud, and J.K. Webb

With 41 Figures

16.1 Introduction	627
16.2 Upper Cervical Spine	628
16.2.1 Stabilization	628
16.2.1.1 Posterior Wiring Techniques	628
16.2.1.2 Transarticular Screw Fixation C1–2	634
16.2.1.3 Anterior Screw Fixation of Odontoid (Dens) Fractures	636
16.3 Lower Cervical Spine (C2–T1)	642
16.3.1 Posterior Techniques	642
16.3.1.1 Wiring Techniques	642
16.3.1.2 Plating Techniques	644
16.3.2 Anterior Techniques	652
16.3.2.1 Plating	652
16.4 Thoracolumbar Spine	657
16.4.1 Anterior Technique: Fixation with the Large DCP	657
16.4.2 Posterior Techniques	660
16.4.2.1 Translaminar Screw Fixation	660
16.4.2.2 Locking Hook Spinal Rod System	662
16.4.2.3 Pedicle Fixation	666
References	682

17 COMPOUND FRACTURES

Chapter Authors: W.W. Rittmann and J.K. Webb

Group Members: A. Appley and E. Zerbi

17.1	General Remarks	683
17.2	Grading of Open Fractures	683
17.2.1	First-Degree Open Fractures IO1 (MT1-4, NV1-4)	683
17.2.2	Second-Degree Open Fractures IO2 (MT1-5, NV1-4)	684
17.2.3	Third-Degree Open Fractures IO3 (MT2-5, NV2-5)	684
17.3	Management	684
17.3.1	Prevention of Further Contamination	684
17.3.2	Excision of Dead Material and Devitalized Material	684
17.3.2.1	Skin	685
17.3.2.2	Fascia	685
17.3.2.3	Muscle	685
17.3.2.4	Blood Vessels	685
17.3.2.5	Nerves	685
17.3.2.6	Bone	686
17.3.3	Stabilization of the Fracture	686
17.3.3.1	Moderate Soft Tissue Injuries	686
17.3.3.2	Severe Soft Tissue Injuries	687
17.3.3.3	Wound Closure	687
17.3.3.4	Antibiotics	687
17.3.3.5	Postoperative Treatment	687
17.3.3.6	Subsequent Fracture Treatment	688
17.4	Conclusion	688
	References	688

18 FRACTURES IN CHILDREN

Chapter Authors: Ch. Colton and R.K. Marti

Group Members: P. Optecam, E. Sander, and Ph. Spiegel

With 26 Figures

18.1	General Principles	689
18.2	Diaphyseal Fractures	689
18.2.1	Indications for Internal Fixation	689
18.2.2	Methods of Internal Fixation	690
18.3	Periarticular and Articular Fractures	690
18.3.1	General Principles/Classification	690
18.3.2	Indications for Internal Fixation	692
18.3.3	Methods of Internal Fixation	694
18.4	Fractures of the Humerus	694
18.4.1	Proximal Humerus and Humeral Shaft	694
18.4.2	Distal Humerus	696

18.5	Fractures of the Forearm	700
18.5.1	Proximal Forearm, Radial Head and Neck	700
18.5.2	Monteggia Fracture	702
18.5.3	Shaft Fractures	702
18.6	Fractures of the Femur	704
18.6.1	Proximal Femur	704
18.6.1.1	The Technique of Open Reduction and Internal Fixation (ORIF).	704
18.6.2	Femoral Shaft	706
18.6.3	Distal Femur	706
18.7	Fractures of the Tibia	708
18.8	Distal Tibial Growth-Plate Fractures.	710
18.9	Other Fractures	710
	References	712
19	PSEUDARTHROSES	
	Chapter Author: H. Rosen	
	Group Members: B. Friedrich, E. Kuner, and F.F. Vrevc	
	With 40 Figures	
19.1	Definitions	713
19.1.1	Delayed Union	713
19.1.2	Non-Union	713
19.1.2.1	Reactive Non-Union	713
19.1.2.2	Nonreactive, Atrophic, More or Less Avascular Non-Union	714
19.1.3	Pseudarthrosis	714
19.2	Etiology of Delayed Unions, Non-Unions and Pseudarthroses	716
19.3	Objectives of Non-Union Therapy	716
19.4	Rationale of Non-Union Therapy	717
19.4.1	Nonoperative Rationale	717
19.4.1.1	Immobilization	717
19.4.1.2	Electrical Stimulation	717
19.4.2	Operative Rationale	718
19.5	Principles of the Operative Treatment	720
19.5.1	Noninfected	720
19.5.2	Infected	722
19.6	Preoperative Planning	723
19.7	Operative Techniques to Achieve Union	726
19.8	Postoperative Treatment	740
	References	742

20 INFECTIONS

Chapter Author: H. Willenegger

Group Members: F. Brussatis, H. Grove, and K. Korzinek

20.1 Prophylaxis of Infection	743
20.1.1 Indication for Antibiotic Prophylaxis	743
20.1.2 Selection of Antibacterial Agents	744
20.2 Postoperative Hematoma	744
20.3 Infection	744
References	746
 SUBJECT INDEX	 747
