

Table of Contents

Invited Papers

- Vision-Realistic Rendering: Simulation of the Scanned Foveal Image
with Elimination of Artifacts due to Occlusion and Discretization 3
Brian A. Barsky
- Fisher Vectors: Beyond Bag-of-Visual-Words Image Representations 28
Gabriela Csurka and Florent Perronnin

Part I: Computer Vision Theory and Applications (VISAPP)

- Decoding 1-D Barcode from Degraded Images Using a Neural
Network 45
A. Zamberletti, I. Gallo, M. Carullo, and E. Binaghi
- Perspective Two-Frame-Theory for Shape Recovery under Turntable
Motion 56
Miaomiao Liu and Kwan-Yee K. Wong
- Expanding the Local Binary Pattern to Multispectral Images Using
Total Orderings 67
Vincent Barra
- A Deformable Model for Bringing Particles in Focus 81
*Anders Lindbjerg Dahl, Thomas Martini Jørgensen, and
Rasmus Larsen*
- Automatic Wood Log Segmentation Using Graph Cuts 96
*Enrico Gutzeit, Stephan Ohl, Jörg Voskamp, Arjan Kuijper, and
Bodo Urban*
- Image Block Error Recovery Using Adaptive Patch-Based Inpainting ... 110
Yunqiang Liu, Jin Wang, and Huanhuan Zhang
- On Euclidean Metric Approximation via Graph Cuts 125
Ondřej Daněš and Pavel Matula

Gabor-Like Image Filtering for Transient Feature Detection and Global Energy Estimation Applied to Multi-expression Classification	135
<i>Zakia Hammal and Corentin Massot</i>	

Adaptive Segmentation of Particles and Cells for Fluorescent Microscope Imaging	154
<i>Birgit Möller, Oliver Greß, Nadine Stöhr, Stefan Hüttelmaier, and Stefan Posch</i>	

Improving Ventricle Detection in 3-D Cardiac Multislice Computerized Tomography Images	170
<i>Miguel Vera, Antonio Bravo, and Rubén Medina</i>	

Part II: Imaging Theory and Applications (IMAGAPP)

Closing the Gap: From Planning to Intervention in Cardiology	187
<i>Klaus Drechsler and Cristina Oyarzun Laura</i>	

Part III: Computer Graphics Theory and Applications (GRAPP)

Data-Driven Progressive Mesh Compression Using Associated Properties	203
<i>Gabriel Cirio, Guillaume Lavoué, and Florent Dupont</i>	

Interactive Rigid Body Dynamics Using a Projected Gauss-Seidel Subspace Minimization Method	218
<i>Morten Silcowitz, Sarah Niebe, and Kenny Erleben</i>	

Change-Point Detection on the Lie Group $SE(3)$	230
<i>Loic Merckel and Toyooki Nishida</i>	

Slab-Based Raycasting: Exploiting GPU Computing for Volume Visualization	246
<i>Jörg Mensmann, Timo Ropinski, and Klaus Hinrichs</i>	

Non-linear Particle Systems for Scalable Simulation of Deformable Models	260
<i>Athanasios Vogiannou, Konstantinos Moustakas, Dimitrios Tzovaras, and Michael G. Strintzis</i>	

Photon Differentials in Space and Time	274
<i>L. Schjøth, J.R. Frisvad, K. Erleben, and J. Sporring</i>	

Part IV: Information Visualization Theory and Applications (IVAPP)

Improving Audio Information Visualization by Showing Melodic Content.....	289
<i>Marcelo Cicconet and Paulo Cezar Carvalho</i>	
ZoomTree: Unrestricted Zoom Paths in Multiscale Visual Analysis of Relational Databases	299
<i>Baoyuan Wang, Gang Chen, Jiajun Bu, and Yizhou Yu</i>	
Author Index	319
