Examination Program

<i>Introduction</i>	3
Patient-Oriented Aspects	3
Examiner-Oriented Aspects	3
Examination According to the 5/5 Program	4
 <i>Structure of the Systematic Examination</i>	
Systematic History	6
Basic Physical Examination	6
Inspection	7
Conduct of Examination	8
Palpation	8
Conduct of the Examination and Findings	10
Motion Testing	11
Conduct of the Examination	12
Rationale for the Basic Physical Examination	13
Adjunctive Neurologic and Angiologic Studies	14
Neurologic Studies	14
Conduct of the Examination	14
Angiologic Studies	14
Adjunctive Special Diagnostic Procedures	15
Examination Positions	16
Body Regions Examined	17
Diagnosis	18
Disease Groups Involving the Musculoskeletal System	18
 <i>Structural Analysis of Function Using the Diagnostic Program</i> . . .	19
Structural Analysis in the Patient History with Reference to Pain .	19
Types of Pain from a Structural Perspective	19
Basic Principles in the Analysis of Pain	20
Analysis of Pain During History Taking	20
Joint Pain	20
Muscle Pain	21
Ligament Pain	21
Bursitis, Tendovaginitis	22
Nerve Pain	22
Vascular Pain	23
Vertebragenic Pain	23
Structurally Specific Findings in the Arthron	24
Examination of the Joint	24

Inspection	24
Active and Passive Motion Testing	24
Palpation	26
Joint Play	26
Examination of the Spine	32
Inspection	32
Motion Testing	32
Palpation	34
Joint Play	34
Examination of the Muscles	35
Muscle Groups	36
Findings of Muscle Examination	39
Inspection	39
Motion Testing	39
Palpation	40
Resistance Tests	41
Examination of the Nerves	42
Inspection	42
Active and Passive Motion Testing	43
Palpation	43
Muscle Tests	43
Special Neuropathologic Findings During the Basic Physical Examination	43
Inspection	43
Complex Motor Sequences	43
Spontaneous Muscular Contractions	43
Trophic Disturbances (Chiefly Involving the Hands and Feet)	44
Active and Passive Motion Testing	45
Active Motion Testing	45
Passive Motion Testing	45
Palpation	45
Autonomic Nervous Disorders	45
Nerve Pressure Points	46
Thickening of Nerve Trunks	46
Muscle Tests	46
Differential Diagnosis of Nerve Lesions	46
Symptoms of Nerve Lesions by Location	46
1. Muscular Nociceptive Symptoms (Nociceptive Reaction of Wolff)	46
2. Symptoms of Peripheral Nerve Lesions	47
3. Radicular Symptoms	47
4. Symptoms of Plexus Damage	48
5. Symptoms Due to Disturbances Involving the Neuromuscular Junction or Muscle Fiber.	48
6. Symptoms of Lesions of the Central Neuron (Central Paralysis)	48
Practical Relevance of the Structural Analysis of Function	48
How Does the Control and Warning System Function?	48
Proprioception	48

	Contents	IX
Stability		50

Location of the Irritation Zones or Irritation Points		54
Examination Technique.		55
Diagnostic Implications of Irritation Zone Testing		57

Basic Examination of the Spine and the Joints of the Extremities

Detailed Introduction

Systematic History	61
Interpretation of the History.	62
Current Pain	62
1 Location of Pain: What Hurts? Where Does it Hurt? . . .	62
1.1 Localized Pain (Monoarticular, Monosegmental)	62
1.2 Multifocal Pain (Polyarticular, Vertebral Region or Entire Spine)	62
1.3 Referred Pain (Muscle Chains, Nerve Pathways, Vessels)	63
1.4 Diffuse Pain	63
1.5 Unilateral or Bilateral Pain	63
2 Pain Occurrence: When Does It Occur and When Did It First Occur?	63
2.1 24-Hour Rhythm	63
2.2 Periodic Pain (Ovarian Cycle, Seasons, Age)	63
2.3 Episodic Pain (With or Without a Change in Pain Location)	63
3 Nature of the Pain	63
3.1 Intensity	63
3.2 Character	64
3.3 Course	64
4 What Precipitates or Changes the Pain?	64
4.1 Body Posture	64
4.2 Body Movements	64
4.3 Other Mechanical Influences	64
4.4 Miscellaneous Influences	64
5 Associated Phenomena: What Accompanies the Pain? . .	64
5.1 Sensory Disturbances	64
5.2 Motor Disturbances	64
5.3 Circulatory Disturbances	64
5.4 Trophic Disturbances	64
5.5 Psychological Disturbances	64
Previous Course, General State of Health, Other Current Diseases	64
1 What Treatments Have Been Given in the Past?	64
2 What Improved or Changed the Pain?	65
3 How Are the Vital Functions?	65

4	When Did Previous Pain Occur Involving the Spine and Joints?	65
5	What Other Diseases or Disorders Does the Patient Have Now?	65
	The Basic Physical Examination: Preliminary Information	65
	Exceptions	65
	Abbreviations	66
	Symbols Used in the Figures on Examination Techniques	66
	Checklist for Joint Examinations	67
	Checklist for Muscle Examinations	67
	Documentation of Findings Using Symbols	68
	Ten Standard Symbols	68
	General Symbols	68
	Inspection	69
	Palpation	69
	Motion Testing	69
	Measurements	70
	Joints	70
	Muscles	70
	<i>General Inspection in the Standing Position (A)</i>	71
1	Ordinary Movements	72
1.1	Gait	72
1.2	Other Ordinary Movements	74
2	Posture	74
3	Body Contours and Proportions	74
4	Skin	82
5	Assistive Devices	82
	<i>Examination of the LPH Region in the Standing Position (A/II)</i>	83
1	Inspection (see General Inspection)	84
2	Active and Passive Trunk Movements in Three Planes (Regional Diagnosis).	84
2.1	Sagittal Plane: Forward and Backward Bending	84
2.2	Frontal Plane: Sidebending	87
2.3	Transverse Plane: Rotation	87
3	Palpation of the Pelvic Joints	88
	Palpation at Rest	88
3.1	Pelvic Position, Leg Length Discrepancy	88
	Palpation During Movement – Testing Joint Play in Both SIJs	90
3.2	Standing Flexion Test (SIJ)	90
	Unilateral Joint Play Testing	91
3.3	Recoil Phenomenon (SIJ), “Spine Test”	91
3.4	Hip Drop Test (Lumbar Spine)	92
3.5	Lateral Shift Test (SIJ)	94
4	Tests of Joint Translation	96
4.1	Traction on the Lumbar Spine	96
4.2	Compression of the Lumbar Spine	97
5	Muscle Test	97

<i>General Examination of the Lower Extremities in the Standing Position (A/I) (Supplement to Examination of the LPH Region)</i> . . .	99
1 Three-Phase Squat	100
2 Standing on the Toes	100
3 Standing on the Heels	101
4 Standing on the Outer Edge of the Foot	101
5 Muscle Tests	101
 <i>Examination of the LPH Region in the Sitting Position (B/II)</i>	103
1 Inspection	104
1.1 Relaxed and Erect Sitting Posture	104
1.2 Pelvic Position – Comparison with Findings in Standing	104
2 Active and Passive Trunk Movements in Three Planes (Regional Diagnosis).	105
Supplementary SIJ Test for Differentiating Motion Faults in the SIJ and Lumbar Spine	105
Regional Motion Testing of the Lumbar (and Thoracic) Spine in Three Planes with the Pelvis Stationary	105
3 Palpation of the SIJ and Lumbar Spine (Segmental Diagnosis)	109
Palpation at Rest	109
3.1 Pelvic Position.	109
Palpation During Movement	110
3.2 Seated Flexion Test (for Asymmetric Excursion of the Iliac Spines)	110
3.3 Segmental Motion Testing of the Lumbar Spine	111
4 Tests of Joint Translation	115
4.1 Traction	115
4.2 Compression	115
5 Muscle Tests	116
Resistance Tests of the Flexors, Rotators, Abductors, and Adductors of the Hip	116
 <i>Examination of the LPH Region in the Prone Position (C/II)</i>	118
1 Inspection	120
1.1 Pelvic Position and Gluteal Profile	120
1.2 Pelvis–Leg Angle	120
1.3 Leg Length Discrepancy	120
1.4 Asymmetric Muscle Contours	120
1.5 Alignment of the Vertebral Column.	120
2 Active and Passive Hip and Knee Movements (Regional Diagnosis	121
2.1 Hyperextension of the Hip Joint (Extension from the Neutral Position)	121
2.2 Rotation of the Hip Joint	123
2.3 Flexion, Extension, Rotation of the Knee Joint	123
3 Palpation Field of the Dorsal Pelvis: Lumbar Joints/Soft-Tissue Diagnosis (Segmental Diagnosis)	124
Palpation at Rest	124
3.1 Palpation Field of the Dorsal Pelvis	124

3.2 Test for Functional Leg Length Discrepancy (Functionally Short Leg)	130
3.3 Segmental Palpation of the Lumbar Spine (Mobility/Pain)	131
3.4 Kibler's Skin Rolling Test	134
3.5 Connective-Tissue Stroke Test	135
4 Tests of Joint Translation	135
4.1 Lumbar Spine	135
4.2 Sacroiliac Joints	137
4.3 Hip Joints: Rotation	143
5 Muscle Tests	144
5.1 Resistance Tests of the Hip Muscles	144
5.2 Knee Muscles	145
5.3 Back Extensors	147
<i>Examination of the LPH Region in the Lateral Position (D/II)</i> . . .	148
3 Palpation of the Lumbar Spine During Movement (Segmental Mobility)	149
3.1 Forward and Backward Bending	149
3.2 Sidebending	149
3.3 Rotation	152
4 Tests of Joint Translation	152
4.1 Hypermobility Test of the SIJ	152
4.2 Hypermobility Test of the Lumbar Spine	153
5 Muscle Tests (Resistance Tests of Hip Muscles)	153
5.1 Abductors	153
5.2 Adductors	154
<i>Examination of the LPH Region in the Supine Position (E/II)</i> . . .	155
1 Inspection	156
1.1 Legs	156
1.2 Pelvic Position	157
1.3 Vertebral Column	157
1.4 Abdominal Wall	157
2 Active and Passive Motion Testing: Hip and Knee Joints, SIJ, and Lumbar Spine	157
2.1 Hip Flexion	157
2.2 Hip Rotation	160
2.3 Hip Abduction	161
2.4 Knee Joint Screening Tests	162
2.5 Differentiation of the LPH Joints: Hip Joint, SIJ, Lumbar Spine, and Muscles	163
3 Palpation Field of the Ventral Pelvis	166
Palpation at Rest	166
4 Tests of Joint Translation	169
4.1 Traction and Compression of the Lumbar Spine	169
4.2 Traction and Compression of the Hip Joint	171
4.3 SIJ Springing Test via the Thigh	172
5 Muscle Tests	173
5.1 Resistance Tests of the Hip and Abdominal Muscles . . .	173
5.2 Shortening Tests	176

Examination of the Thorax (Thoracic Spine and Ribs)

<i>in the Sitting Position (B/III)</i>	180
1 Inspection	181
1.1 Thoracic Morphology	181
1.2 Respiratory Movements	181
2 Active and Passive Trunk Movements in Three Planes (Regional Diagnosis)	183
3 Palpation of the Thoracic Joints (Segmental Diagnosis)	184
Palpation at Rest	184
3.1 Sternal and Costal Synchondroses (Sternocostal Joints 2–7), Floating Ribs	184
3.2 Costotransverse Joints	184
3.3 Segmental Muscles	186
Palpation During Movement	186
3.4 Segmental Motion Testing of the Thoracic Spine	186
3.5 Segmental Motion Testing of the Ribs (“Harp”)	190
4 Tests of Joint Translation	193
4.1 Bimanual Compression of the Thorax in the Frontal Plane	193
4.2 Bimanual Compression of the Thorax in the Sagittal Plane	193

Examination of the Thorax (Thoracic Spine and Ribs)

<i>in the Prone Position (C/III)</i>	194
1 Inspection	195
2 Active Movements: Respiratory Movements (Deep Breathing) (Regional Diagnosis)	195
3 Palpation of the Thoracic Joints (Segmental Diagnosis)	195
Palpation at Rest	195
3.1 Palpation Field of the Posterior Thorax	195
Palpation During Movement	197
3.2 Rib Movements and Intercostal Spaces	197
4 Tests of Joint Translation	199
4.1 Thoracic Segments	199
4.2 Scapula	199
5 Muscle Tests	201

Examination of the Thorax (Thoracic Spine and Ribs)

<i>in the Lateral Position (D/III)</i>	202
3 Palpation of the Thoracic Joints During Movement (Segmental Diagnosis)	203
3.1 Segmental Mobility Testing of the Thoracic Spine	203
3.2 Segmental Mobility Testing of the Cervicothoracic Junction (C6–T3)	204
3.3 Segmental Mobility Testing of the Lower (6th–12th) Ribs	205

Examination of the Thorax (Ribs) in the Supine Position (E/III)

1 Inspection	208
2 Active Movements: Respiratory Movements (Deep Breathing) (Regional Diagnosis)	208
3 Palpation of the Ribs (Segmental Diagnosis)	208

Palpation at Rest	208
3.1 Palpation Field of the Anterior Thorax	208
Palpation During Movement	209
3.2 Rib Movements and Intercostal Spaces	209
3.3 Segmental Mobility Testing of the Upper (2nd–6th) Ribs	210
4 Tests of Joint Translation	211
4.1 Costal Joints	211
4.2 Sternoclavicular and Acromioclavicular Joint	211
5 Muscle Test: Test for Shortening of the Pectoralis Major	211
 <i>Examination of the Cervical Spine in the Sitting Position (B/V) . . .</i>	 213
1 Inspection	214
2 Active and Passive Movements of the Cervical Spine and Head in Three Planes (Regional Diagnosis)	214
2.1 Sagittal Plane: Backward and Forward Bending	214
2.2 Frontal Plane: Sidebending	214
2.3 Transverse Plane: Rotation	215
2.4 Provocative Testing of the Vertebral Segments (Modified from de Kleyn)	215
2.5 Provocative Test for Motion Segment Laxness (Hypermobility)	215
3 Palpation of the Cervical Spine During Movement (Segmental Diagnosis)	216
3.1 Mobility Testing of the Occiput/Atlas (C0/C1)	216
3.2 Mobility Testing of the Atlas/Axis (C1/C2)	220
3.3 Mobility Testing of the C2/C3 Segment	225
3.4 Mobility Testing of the C3–C5 Segments	226
3.5 Mobility Testing of the C5–T3 Segments (Cervicothoracic Junction)	229
4 Tests of Joint Translation	231
4.1 Traction	231
4.2 Compression	232
4.3 Tests of Facet Joint Gliding	233
5 Muscle Tests – Resistance Tests of the Cervical Muscles (Synergists)	235
 <i>Examination of the Head (Temporomandibular Joints, Sensory Organs) in the Sitting Position (B/V)</i>	 238
1 Inspection	239
1.1 Facial Asymmetries	239
1.2 Mimetic Activity	239
1.3 Sensory Organs: Eyes	239
2 Jaw Movements and Swallowing	240
2.1 Opening and Closing of the Jaw	240
2.2 Protraction and Retraction of the Jaw	240
2.3 Lateral Jaw Movements (Grinding Movements)	240
3 Palpation Field of the Face	240
3.1 Trigeminal Pressure Points	240
3.2 Corneal Reflex (First Division of the Trigeminal Nerve)	240

3.3 Pressure on the Tragus	241
3.4 Palpation of the Temporomandibular Joints	241
3.5 Percussion of the Frontal and Maxillary Sinuses	241
4 Passive Testing of Temporomandibular Joint Motion and Play	241
5 Muscle Tests	242
5.1 Mimetic Muscles	242
5.2 Masticatory Muscles	243
5.3 Lingual Muscles	243
5.4 Ocular Muscles	243
<i>Examination of the Cervical Spine in the Supine Position (E/V)</i>	<i>244</i>
1 Inspection	245
2 Active and Passive Movements of the Cervical Spine and Head in Three Planes (Regional Diagnosis)	245
2.1 Forward Bending, Backward Bending, Sidebending, and Rotation.	245
2.2 Side-to-Side Head Movement	245
2.3 Provocative Test for the Vertebral Artery (De Kleyn's Hanging Test)	247
3 Palpation of the Cervical Spine During Movement (Segmental Diagnosis)	248
3.1 Forward Bending	248
3.2 Backward Bending	248
3.3 Sidebending	248
3.4 Rotation	248
4 Tests of Joint Translation	250
4.1 Three-Dimensional Traction on All Cervical Segments	250
4.2 C0/C1 Segment: Backward and Forward Gliding of the Occipital Condyles on the Atlas (Forward and Backward Nodding)	250
4.3 C0/C1/C2 Segment: Combined Movements in the Craniovertebral Joints	250
4.4 C1/C2 Segment: Atlas Traction	252
4.5 C1/C2 Segment: Lateral Gliding of the Atlas on the Axis (Hypermobility Test)	252
4.6 C2–C7 Segments: Convergent/Divergent Gliding in the Facet Joints	254
5 Muscle Tests – Resistance Testing of the Cervical Muscles	255
<i>Examination of the Upper Extremities in the Sitting Position (B/IV)</i>	
<i>Shoulder Joint</i>	<i>256</i>
1 Inspection	257
1.1 Shoulder Position	257
1.2 Shoulder Contours	258
2 Active and Passive Movements of the Shoulder Joint	258
2.1 General Active Tests	258
2.2 Frontal Plane: Abduction/Adduction and Rotation of the Arms	259
2.3 Sagittal Plane: Raising the Arms Forward and Behind	262

3	Palpation Field of the Shoulder	263
4	Tests of Joint Translation (Humeral Head)	267
5	Resistance Testing of the Shoulder Muscles	269
5.1	Synergists (2x4)	269
5.2	Differentiating Tests (3x5)	272
<i>Joints of the Shoulder Girdle</i>		<i>277</i>
1	Inspection (See B/Shoulder/Sect. 1)	278
2.1	Raising and Lowering the Shoulder Girdle	278
2.2	Advancing and Retracting the Shoulder Girdle	278
3	Palpation Field of the Shoulder Girdle	278
3.1	Palpation of the Shoulder Girdle at Rest	280
3.2	Palpation of the Shoulder Girdle During Movement	283
4	Tests of Joint Translation – Clavicle and Scapula	285
Sternoclavicular Joint		285
Acromioclavicular Joint		288
Alternative Techniques		288
5	Resistance Testing of the Muscles of the Shoulder Girdle	291
5.1	Synergists	291
5.2	Scapular Rotators	291
6	Examination of the Cervical Spine	293
<i>Elbow Joint, Upper Arm, and Forearm</i>		<i>296</i>
1	Inspection	297
1.1	Joint Position	297
1.2	Joint Contours	297
1.3	Changes in the Muscle Contours of the Upper Extremity	299
2	Active and Passive Elbow Movements	299
2.1	Flexion/Extension	299
2.2	Pronation/Supination	299
2.3	Abduction/Adduction (Collateral Ligament Stability Test)	300
3	Palpation Field of the Elbow/Arm	300
3.1	Extensor Side of the Elbow	300
3.2	Lateral (Radial) Epicondyle	301
3.3	Medial (Ulnar) Epicondyle	302
3.4	Flexor Side of the Elbow	304
3.5	Upper Arm and Forearm	305
4	Tests of Joint Translation	305
4.1	Humeroradial Joint	305
4.2	Proximal and Distal Radioulnar Joints	305
4.3	Humeroulnar Joint	309
5	Resistance Testing of the Muscles of the Elbow Joint	310
5.1	Flexors and Extensors	310
5.2	Pronators and Supinators	311
<i>Hand and Finger Joints</i>		<i>314</i>
1	Inspection	315
1.1	Shape and Position	315
1.2	Contour Changes	316

1.3 Skin and Nail Changes	317
Skin Changes	317
Nail Changes	318
2 Active and Passive Wrist and Finger Movements	318
2.1 Wrist Movements in Two Planes	318
2.2 Finger Movements in two Planes	319
2.3 Thumb Movements	319
3 Palpation Field of the Hand	320
3.1 Radial Border of the Hand	320
3.2 Ulnar Border of the Hand	322
3.3 Dorsum of the Hand	323
3.4 Palm of the Hand	325
3.5 Fingers and Thumb	327
4 Tests of Joint Translation	328
4.1 Wrist Joint (Five Tests)	328
4.2 Intercarpal Joints (Ten Tests)	330
4.3 Carpometacarpal Joint of the Thumb (Five Tests)	335
4.4 Second to Fifth Carpometacarpal and Intercarpal Joints (Five Tests)	337
4.5 Phalangeal Joints (Five Tests)	341
5 Resistance Testing of the Hand and Finger Muscles	344
5.1 Wrist Muscles	344
5.2 Finger Muscles	346
5.3 Thumb Muscles	347

Examination of the Lower Extremities in the Supine Position (E/I)

<i>Hip Joint (LPH Region)</i>	349
<i>Knee Joint, Upper Leg, Lower Leg.</i>	351
1 Inspection: Abnormalities of Shape and Position, Contours of the Upper and Lower Leg	352
1.1 Anterior Aspect	352
1.2 Lateral Aspect	353
1.3 Posterior Aspect	354
2 Active and Passive Motion Testing of the Knee Joint and Femoropatellar Joint	355
2.1 Knee Joint	355
2.2 Patellar Tracking	356
3 Palpation Field of the Knee Joint and Lower Extremity	356
Palpable Findings.	357
3.1 Anterior Side of the Knee (Patellar Region)	357
3.2 Medial Side of the Knee (Medial Condyle)	359
3.3 Lateral Side of the Knee (Lateral Condyle)	361
3.4 Popliteal Fossa	363
3.5 Upper and Lower Leg Contours	364
4 Tests of Joint Translation	364
4.1 Mediolateral and Caudal Gliding Movements of the Patella.	364

4.2	Traction on the Meniscotibial Joint	366
4.3	Mediolateral Gliding Movements in the Meniscotibial Joint (Shear Test)	366
4.4	Anteroposterior Gliding Movements in the Meniscotibial Joint (Drawer Test)	367
4.5	Mobility in the Superior Tibiofibular Joint	369
5	Tests of the Menisci and Ligaments	369
	Testing of the Menisci	370
	Testing of the Capsule and Ligaments	371
	Examination Technique	371
5.1	Test Group: Sagittal Plane (Tests 1–3)	371
	Testing of the Menisci	371
	Testing of the Capsule and Ligaments	371
5.2	Test Group: Frontal Plane (Tests 4–7)	372
	Testing of the Menisci	372
	Testing of the Capsule and Ligaments	373
5.3	Test Group: Transverse Plane	375
	Testing of the Menisci	375
	Testing of the Capsule and Ligaments	375
5.4	Testing the Posterior Horns of the Menisci by a Combination of Flexion, Lateroduction, and Rotation (Test 12)	377
5.5	Specific Tests for Rotary Instability	378
	<i>Joints of the Feet and Toes</i>	383
1	Inspection	384
1.1	Shape and Position of the Foot	384
1.2	Contour Changes	386
1.3	Skin Changes	387
2	Active and Passive Motion Testing of the Pedal Joints	387
2.1	Active Movements	387
2.2	Passive Movements	388
3	Palpation Field of the Foot	390
3.1	Medial Border of the Foot	390
3.2	Lateral Border of the Foot	393
3.3	Dorsum of the Foot	396
3.4	Sole of the Foot	398
4	Tests of Joint Translation	400
4.1	Inferior Tibiofibular Joint (Distal Tibiofibular Syndesmosis)	400
4.2	Tarsal Joints (Ten Tests)	400
4.3	Metatarsal Joints (Five Tests)	406
4.4	Phalangeal Joints: Five Tests	409
5	Resistance Testing of the Foot and Toe Muscles	411
5.1	Foot Muscles	411
5.2	Toe Muscles	413

Radiography

Special Diagnostic Procedures	416
<i>Radiography</i>	417
1 Rules for the Radiographic Examination of the Vertebral Column and the Joints of the Extremities	418
2 Analysis of the X-Ray Image	418
Practical Approach to the Analysis of X-Ray Films	419
3 Techniques for the Radiographic Examination of the Vertebral Column	420
3.1 Anteroposterior Projection of the LPH Region (After Gutmann)	420
3.2 Lateral Projection of the Lumbar Spine	426
3.3 Thoracic Spine	430
3.4 Anteroposterior Projection of the Cervical Spine (After Sandberg-Gutmann)	431
3.5 Anteroposterior Functional Views of the Cervical Spine (with Sidebending)	434
3.6 Lateral Projection of the Cervical Spine	436
3.7 Lateral Functional Views of the Cervical Spine (Forward and Backward Bending)	438
3.8 Arlen's Quantitative Technique for the Functional Evaluation of the Cervical Spine	440
<i>References</i>	453
<i>Subject Index</i>	459
