Preface XV

List of Contributors XVII

Part I Nanostructured Devices 1

1	Modeling Quantum-Dot-Based Devices 3
	<i>Kathy Lüdge</i>
1.1	Introduction 3
1.2	Microscopic Coulomb Scattering Rates 4
1.2.1	Carrier–Carrier Scattering 5
1.2.2	Detailed Balance 8
1.3	Laser Model with Ground and Excited States in the QDs 9
1.3.1	Temperature Effects 14
1.3.2	Impact of Energy Confinement 15
1.3.3	Eliminating the Excited State Population Dynamics 17
1.4	Quantum Dot Switching Dynamics and Modulation Response 18
1.4.1	Inhomogeneous Broadening 19
1.4.2	Temperature-Dependent Losses in the Reservoir 20
1.4.3	Comparison to Experimental Results 20
1.5	Asymptotic Analysis 21
1.5.1	Consequences of Optimizing Device Performance 25
1.6	QD Laser with Doped Carrier Reservoir 26
1.7	Model Reduction 28
1.8	Comparison to Quantum Well Lasers 29
1.9	Summary 30
	Acknowledgment 30
	References 30
2	Exploiting Noise and Polarization Bistability in Vertical-Cavity Surface-Emitting Lasers for Fast Pulse Generation and Logic Operations 35
	<i>Jordi Zamora-Munt and Cristina Masoller</i>
2.1	Introduction 35

2.2	Spin-Flip Model	39
2.3	Polarization Switching	40
2.4	Pulse Generation Via Asymmetric Triangular Current Modulation	44
2.5	Influence of the Noise Strength	48
2.6	Logic Stochastic Resonance in Polarization-Bistable VCSELS	49
2.7	Reliability of the VCSEL-Based Stochastic Logic Gate	52
2.8	Conclusions	53
	Acknowledgment	54
	References	54
3	Mode Competition Driving Laser Nonlinear Dynamics	57
	<i>Marc Sciamanna</i>	
3.1	Introduction	57
3.2	Mode Competition in Semiconductor Lasers	58
3.3	Low-Frequency Fluctuations in Multimode Lasers	61
3.4	External-Cavity Mode Beating and Bifurcation Bridges	64
3.5	Multimode Dynamics in Lasers with Short External Cavity	65
3.6	Polarization Mode Hopping in VCSEL with Time Delay	67
3.6.1	Polarization Switching Induced by Optical Feedback	67
3.6.2	Polarization Mode Hopping with Time-Delay Dynamics	69
3.6.3	Coherence Resonance in a Bistable System with Time Delay	71
3.7	Polarization Injection Locking Properties of VCSELS	73
3.7.1	Optical Injection Dynamics	74
3.7.2	Polarization and Transverse Mode Switching and Locking: Experiment	76
3.7.3	Bifurcation Picture of a Two-Mode Laser	81
3.8	Dynamics of a Two-Mode Quantum Dot Laser with Optical Injection	83
3.9	Conclusions	85
	Acknowledgments	86
	References	86
4	Quantum Cascade Laser: An Emerging Technology	91
	<i>Andreas Wacker</i>	
4.1	The Essence of QCLs	92
4.1.1	Semiconductor Heterostructures	92
4.1.2	Electric Pumping	94
4.1.3	Cascading	94
4.2	Different Designs	96
4.2.1	Optical Transition and Lifetime of the Upper State	96
4.2.2	Effective Extraction from the Lower Laser Level	96
4.2.3	Injection	97
4.3	Reducing the Number of Levels Involved	98
4.4	Modeling	100

4.5	Outlook	103
	Acknowledgments	104
4.6	Appendix: Derivation of Eq. (4.1)	104
	References	105
5	Controlling Charge Domain Dynamics in Superlattices	111
	<i>Mark T. Greenaway, Alexander G. Balanov, and T. Mark Fromhold</i>	
5.1	Model of Charge Domain Dynamics	112
5.2	Results	117
5.2.1	Drift Velocity Characteristics for $\theta = 0^\circ, 25^\circ$, and 40°	118
5.2.2	Current–Voltage Characteristics for $\theta = 0^\circ, 25^\circ$, and 40°	119
5.2.3	$I(t)$ Curves for $\theta = 0^\circ, 25^\circ$, and 40°	120
5.2.4	Charge Dynamics for $\theta = 0^\circ, 25^\circ$, and 40°	122
5.2.5	Stability and Power of $I(t)$ Oscillations for $0^\circ < \theta < 90^\circ$	128
5.2.6	Frequency of $I(t)$ for $0^\circ < \theta < 90^\circ$	130
5.3	Conclusion	132
	Acknowledgment	132
	References	132
	Part II Coupled Laser Device	137
6	Quantum Dot Laser Tolerance to Optical Feedback	139
	<i>Christian Otto, Kathy Lüdge, Evgeniy Viktorov, and Thomas Erneux</i>	
6.1	Introduction	139
6.2	QD Laser Model with One Carrier Type	141
6.3	Electron-Hole Model for QD Laser	142
6.3.1	Similar Scattering Times τ_e and τ_h	143
6.3.2	Different Scattering Times τ_e and τ_h	144
6.3.3	Small Scattering Lifetime of the Holes $a = O(1)$	144
6.3.4	Very Small Scattering Lifetime of the Holes $a = O(\gamma^{-1/2})$	144
6.4	Summary	145
	Acknowledgment	146
6.5	Appendix A: Rate Equations for Quantum Well Lasers	146
6.6	Appendix B: Asymptotic Analysis for a QD Laser Model with One Carrier Type	148
6.7	Appendix C: Asymptotic Analysis for a QD Laser Model with Two Carrier Types	153
	References	158
7	Bifurcation Study of a Semiconductor Laser with Saturable Absorber and Delayed Optical Feedback	161
	<i>Bernd Krauskopf and Jamie J. Walker</i>	
7.1	Introduction	161
7.2	Bifurcation Analysis of the SLSA	164

7.3	Equilibria of the DDE and Their Stability	168
7.4	Bifurcation Study for Excitable SLSA	171
7.5	Bifurcation Study for Nonexcitable SLSA	173
7.6	Dependence of the Bifurcation Diagram on the Gain Pump Parameter	176
7.7	Conclusions	178
	References	179
8	Modeling of Passively Mode-Locked Semiconductor Lasers	183
	<i>Andrei G. Vladimirov, Dmitrii Rachinskii, and Matthias Wolfrum</i>	
8.1	Introduction	183
8.2	Derivation of the Model Equations	184
8.3	Numerical Results	189
8.4	Stability Analysis for the ML Regime in the Limit of Infinite Bandwidth	197
8.4.1	New's Stability Criterion	197
8.4.2	Slow Stage	199
8.4.3	Fast Stage	199
8.4.4	Laser Without Spectral Filtering	200
8.5	The Q-Switching Instability of the ML Regime	203
8.5.1	Laser Without Spectral Filtering	204
8.5.2	Weak Saturation Limit	207
8.5.3	Variational Approach	209
8.6	Conclusion	212
	Acknowledgments	213
	References	213
9	Dynamical and Synchronization Properties of Delay-Coupled Lasers	217
	<i>Cristina M. Gonzalez, Miguel C. Soriano, M. Carme Torrent, Jordi Garcia-Ojalvo, and Ingo Fischer</i>	
9.1	Motivation: Why Coupling Lasers?	217
9.2	Dynamics of Two Mutually Delay-Coupled Lasers	218
9.2.1	Dynamical Instability	218
9.2.2	Instability of Isochronous Solution	220
9.3	Properties of Leader–Laggard Synchronization	224
9.3.1	Emergence of Leader–Laggard Synchronization	224
9.3.2	Control of Lag Synchronization	226
9.4	Dynamical Relaying as Stabilization Mechanism for Zero-Lag Synchronization	228
9.4.1	Laser Relay	228
9.4.2	Mirror Relay	230
9.5	Modulation Characteristics of Delay-Coupled Lasers	231
9.5.1	Periodic Modulation	231
9.5.2	Noise Modulation	235

9.5.3	Application: Key Exchange Protocol	238
9.6	Conclusion	240
	Acknowledgments	240
	References	241
10	Complex Networks Based on Coupled Two-Mode Lasers	245
	<i>Andreas Amann</i>	
10.1	Introduction	245
10.2	Complex Networks on the Basis of Two-Mode Lasers	246
10.3	The Design Principles of Two-Mode Lasers	248
10.4	The Dynamics of Two-Mode Lasers Under Optical Injection	253
10.4.1	The Model Equations	253
10.4.2	The $\epsilon = 0$ Case	254
10.4.3	The Finite ϵ Case	257
10.5	Conclusions	264
	Acknowledgments	265
	References	265
	Part III Synchronization and Cryptography	269
11	Noise Synchronization and Stochastic Bifurcations in Lasers	271
	<i>Sebastian M. Wieczorek</i>	
11.1	Introduction	271
11.2	Class-B Laser Model and Landau–Stuart Model	272
11.3	The Linewidth Enhancement Factor and Shear	274
11.4	Detection of Noise Synchronization	275
11.5	Definition of Noise Synchronization	278
11.6	Synchronization Transitions via Stochastic d-Bifurcation	280
11.6.1	Class-B Laser Model Versus Landau–Stuart Equations	282
11.7	Noise-Induced Strange Attractors	285
11.8	Conclusions	289
	References	290
12	Emergence of One- and Two-Cluster States in Populations of Globally Pulse-Coupled Oscillators	293
	<i>Leonhard Lücken and Serhiy Yanchuk</i>	
12.1	Introduction	293
12.1.1	Pulse-Coupled Oscillators	294
12.1.2	Phase-Response Curve as a Parameter	295
12.1.3	System Description	298
12.2	Numerical Results	300
12.3	Appearance and Stability Properties of One-Cluster State	302
12.3.1	Inadequacy of the Linear Stability Analysis	302
12.3.2	One-Cluster State is a Saddle Point	302
12.3.2.1	Existence of a Local Unstable Direction	302

12.3.2.2	Existence of a Local Stable Direction	303
12.3.2.3	Other Stable and Unstable Local Directions	304
12.3.3	Stable Homoclinic Orbit to One-Cluster State	305
12.4	Two-Cluster States	306
12.4.1	Stability of Two-Cluster States	308
12.5	Intermediate State for Symmetric PRC with $\beta = 0.5$	309
12.6	Conclusions	310
12.7	Appendix: Existence of a Homoclinic Orbit	310
	References	315
13	Broadband Chaos	317
	<i>Kristine E. Callan, Lucas Illing, and Daniel J. Gauthier</i>	
13.1	Introduction	317
13.2	Optoelectronic Oscillators	318
13.3	Instability Threshold	323
13.4	Transition to Broadband Chaos	325
13.5	Asymptotic Analysis	327
13.6	Summary and Outlook	330
	Acknowledgments	331
	References	331
14	Synchronization of Chaotic Networks and Secure Communication	333
	<i>Ido Kanter and Wolfgang Kinzel</i>	
14.1	Introduction	333
14.2	Unidirectional Coupling	334
14.3	Transmission of Information	335
14.4	Bidirectional Coupling	336
14.5	Mutual Chaos Pass Filter	339
14.5.1	Protocol	342
14.6	Private Filters	345
14.7	Networks	346
14.8	Outlook	350
	References	350
15	Desultory Dynamics in Diode-Lasers: Drift, Diffusion, and Delay	355
	<i>K. Alan Shore</i>	
15.1	Introduction	355
15.2	Carrier Diffusion in Diode Lasers	357
15.3	Intersubband Laser Dynamics	359
15.4	Carrier Diffusion Effects in VCSELs	362
15.4.1	Transverse Mode Competition and Secondary Pulsations	362
15.4.2	VCSEL Polarization Selection	363
15.4.3	Nanospin VCSELs	363
15.5	Delayed Feedback and Control of VCSEL Polarization	364
15.6	VCSEL Chaos and Synchronization and Message Transmission	365

15.7	Delay Deletion: Nullified Time of Flight	369
15.8	Chaos Communications: Optimization and Robustness	371
15.9	Conclusion	372
	Acknowledgments	373
	References	373
	Further Reading	380
	Index	381
