1	Introduction	1
2	Light	9
2.1	What is light?	9
2.2	Particle or Wave—Duality of Waves and Particles	11
2.2.1	Wave Viewpoint	12
2.2.2	Ray Viewpoint	15
2.3	Power and Energy of Electromagnetic Waves	17
2.4	Analogue or Digital, Bandwidth or Bit Rate	19
2.5	Bits and Bytes, Bit Sequences	20
3	Glass Fibers	25
3.1	Light Guiding in Waveguide Structures	25
3.1.1	Wave Guiding in Layers	26
3.1.2	Wave Guiding in Glass Fibers	28
3.2	Light Guiding in Glass Fibers, Multi-Mode, and Single-Mode Fibers	30
3.2.1	Light Propagation in Glass Fibers, Angle of Acceptance, Numerical Aperture	30
3.2.2	Transversal Modes in Glass Fibers, Mode Mixing	32
3.2.3	Single-Mode-Condition, Cut-Off-Wavelength in Glass Fibers	39
3.2.4	Mode Field Diameter	40
3.3	Attenuation in Glass Fibers	41
3.3.1	UV Absorption	42
3.3.2	Rayleigh Scattering	42
3.3.3	Absorption in Water	43
3.3.4	IR Absorption	44
3.3.5	Attenuation Coefficient Versus Wavelength in Glass Fibers	45

3.4	Dispersion in Glass Fibers	46
3.4.1	Concept and Impact of Dispersion Glass Fibers	46
3.4.2	Mechanisms of Dispersion	49
3.5	Special Glass Fibers and Fiber Cables.	58
3.5.1	Special Fibers.	58
3.5.2	Types of Glass Fibers.	59
3.5.3	Glass Fiber Cables.	62
4	Fiber Optic Connections and Couplers.	67
4.1	Plugs and Splices	67
4.1.1	Splices	67
4.1.2	Plugs	68
4.1.3	Examples of Optical Fiber Connectors	73
4.2	Functionality of Couplers and Switches	75
4.2.1	Coupling Elements.	75
4.2.2	Types of Couplers	77
5	Optical Transmitters.	81
5.1	Main Elements of Semiconductor Lasers	81
5.2	Active Element.	83
5.2.1	Lattice Structure of Semiconductors	83
5.2.2	Band Structure of Semiconductors, Direct and Indirect Transitions	86
5.2.3	Choice of Material.	88
5.2.4	Light Emission in Semiconductors, LED	91
5.2.5	Semiconductor Transmitters—Basic Structure	95
5.3	Resonators	98
5.3.1	Fabry-Perot Laser	98
5.3.2	Dynamical Single-Mode Laser (DSM)	101
5.4	Laser Properties	103
5.4.1	P-I Characteristic, Temperature Behavior, Degradation	103
5.4.2	Spectrum of Semiconductor Lasers.	104
5.4.3	Radiation Characteristics.	105
5.5	Selected Laser Types for Optical Networks.	105
5.5.1	MQW Laser with DFB Resonator as Edge-Emitting Diode	106
5.5.2	Vertical Cavity Surface Emitting Laser (VCSEL) as Surface-Emitting Diode.	108
6	Modulation of Laser Light.	111
6.1	Task and Problems of Laser Modulation	111
6.2	Modulation Methods in Optical Communications Engineering	112
6.2.1	Amplitude Modulation, Power Modulation (AM, PM).	112
6.2.2	Pulse-Amplitude Modulation (PAM).	113
6.2.3	Pulse Position Modulation (PPM).	114

6.2.4	Pulse-Code Modulation (PCM)	114
6.3	Direct Modulation of Semiconductor Lasers	115
6.4	External Modulation of Semiconductor Lasers	120
6.4.1	Phase and Frequency Modulation	120
6.4.2	Power Modulation	121
7	Optical Receivers.	125
7.1	Receiver Principles.	125
7.2	pin Diode	127
7.3	Avalanche Photo Diode (APD)	128
7.4	Noise in Receivers, Bit-Error Rate (BER).	130
7.4.1	Shot Noise	131
7.4.2	Intensity Noise	132
7.4.3	Thermal noise, Nyquist noise	132
7.4.4	Multiplication Noise	134
7.4.5	Bit-Error Ratio	135
7.4.6	Optical heterodyne.	136
8	Compounds of Optical Networks	139
8.1	Switches in Optical Networks	139
8.1.1	Mechanical Switches	140
8.1.2	Electro-Optical Switches	140
8.1.3	Mechano-Optical Switches	145
8.1.4	Micro-Electromechanical Systems (MEMS).	146
8.1.5	Thermal Switches	147
8.2	Filter in Optical Networks	148
8.2.1	Interference Filters (Thin-Layer Filter)	148
8.2.2	Fabry-Perot Filters	149
8.2.3	Fiber-Bragg-Gratings	150
8.2.4	Phased-Array Routers	150
8.2.5	Application of Optical Filters	151
8.3	Signal Regeneration	156
8.4	Optical Amplifier (Re-Amplification)	158
8.4.1	Erbium-Doped Fiber Amplifier (EDFA)	158
8.4.2	Raman Amplifier	165
8.4.3	Semiconductor Optical Amplifiers (SOA).	175
8.5	Dispersion Compensation (Re-Shaping)	178
8.5.1	Application of Dispersion Compensating Fibers.	178
8.5.2	Dispersion Compensation with Fiber-Bragg-Gratings	181
8.6	Clock Recovery (Re-Timing).	182
8.6.1	Clock Recovery by Using Nonlinear Methods	183
8.6.2	Clock Recovery by Decision Feedback.	184

9	Measurement Technology in Optical Fibers and Optical Transmission Systems	187
9.1	Measurement Technology in Glass Fibers	187
9.1.1	Measurement of Index Profile	187
9.1.2	Measurements of Losses	189
9.1.3	Dispersion Measurement	193
9.2	Measurement of Quality of Data Transfer	195
9.2.1	Measurements of the Bit-Error Ratio, Receiver Sensitivity	195
9.2.2	Eye Diagram	196
10	Nonlinearities in Glass Fibers	199
10.1	Nonlinear Effects in Glass Fibers	202
10.1.1	Nonlinear Scattering in Glass Fibers	202
10.1.2	Third-Order Nonlinearities in Glass Fibers, Four-Wave Mixing, Self-Phase Modulation, Cross-Phase Modulation	203
10.1.3	Intensity with third-order nonlinear effects in optical fibers	205
10.2	Chirp in Glass Fibers	206
10.3	Polarization Dispersion Management with Nonlinearities	208
10.3.1	Reduction of Chirp	208
10.3.2	Using the Chirp	209
10.4	Active Compensation of Dispersion	211
10.5	Solitons	213
11	Optical Networks	215
11.1	Global Networks	215
11.1.1	Transport Networks	217
11.1.2	Access Networks, FTTX	219
11.2	Communication Topologies	222
11.3	Optical Multiplexing	224
11.3.1	Space Division Multiplexing (SDM)	225
11.3.2	Time Division Multiplexing (TDM)	226
11.3.3	Wavelength Division Multiplexing (WDM)	228
11.4	WDM Systems	235
12	Help and Solutions	239
12.1	Help	239
12.2	Solutions	242
