

TABLE OF CONTENTS

Lerner, David,	
Techniques of Topology and Differential Geometry in General Relativity	1
Brill, Dieter R.,	
A Simple Derivation of the General Redshift Formula	45
Walker, M. and Kinnersley, W.,	
Some Remarks on a Radiating Solution of the Einstein-Maxwell Equations	48
Stone, A. P.,	
Conservation Laws on Manifolds	86
Demianski, M.,	
Structure of Singularities	92
Humi, Mayer,	
Lattice Transformations and Charge Quantization	113
Hughston, Lane P.,	
On an Einstein-Maxwell Field with a Null Source	121
Dwivedi, Pt. I. H. and Kantowski, R.,	
The Luminosity of a Collapsing Star	126
Vorhees, Burton H.,	
A Class of Inextendible Weyl Solutions	137
Winicour, Jeffrey,	
Scaling in Function Spaces	145
Künzle, H. P.,	
On the Spherical Symmetry of a Static Perfect Fluid	157
Reynolds R.,	
Differentiable Manifolds with Singularities	165

VI

Schutz, Bernard F., Jr.,

Non-Vacuum ADM Field Equations 171

Fischer, Arthur E. and Marsden, Jerrold E.,

General Relativity as a Dynamical System on the Manifold *a*
of Riemannian Metrics Which Cover Diffeomorphisms 176
