List of Contributors	IX
List of Invited Active Participants	X
1 Methods for Detection of Tumor-Specific Sensitized Lymphocytes	1
1.1 Grundmann, E.: Tumor-Specific and Cell-Mediated Immune Reactions Expressed in Pathomorphological Findings	3
1.2 Bansal, S. C.: Problems in Identifying Tumor-Specific Sensitized Lymphocytes	21
1.3 Nagel, G. A., E. Nagel, R. Albrecht and E. L. Bauder: The Mixed Lymphocyte Tumor Cell Culture (MLTC) Test: Review of a Method	47
1.4 Pappas, A. and P. G. Scheurlen: Lymphocyte Transformation in Malignant Diseases. Communication I: Methodologic Problems	59
1.5 Diehl, V.: Microcytotoxicity Test for Detection of Cellular Immunity to Nephroblastoma in Man	87
1.6 Warnatz, H.: Comparative Tumorimmunological Studies with the Microcytotoxicity Test and the DNA-Synthesis Inhibition Test	95
1.7 Lampert, F. and E. Dietmar: The Leukocyte Adherence Inhibition Test for Detection of Tumor-Specific Sensitized Lymphocytes and Serum Blocking Factors	101
2 Methods for Detection of Molecular Antibodies against Tumor Proteins	109
2.1 Lovisetto, P., G. Guarini, G. Molfese and V. Biarese: A Special Aspect of the Complement Fixation Test Applied to the Study of Tumors	111
2.2 Schneider, C. C. and H. Uebel: Principle and Technique of the "Lewis-3 D Test" for the Serological Diagnosis of Malignancy – A Critical Evaluation of the Results	119
3 Methods for Detection of Tumor Cell Surface Antigens	129
3.1 Gelderblom, H.: The Preparation and Application of Hybrid Antibody for the Detection of Tumor-Specific Cell Surface Antigens	131
3.2 Kurth, R., H. Gelderblom and H. Bauer: In vitro Characterization of Avian Oncornavirus Directed Tumor Antigens	155

VIII

3.3	Prokop, O., A. Rothe and G. Uhlenbruck: Tumor-Cell Membrane Antigens Related to Blood Group A Substances	173
3.4	Fischer, K. and A. Poschmann: Erythrocyte ABH-Receptors in Leukemia — An Immunofluorescence Study	185
3.5	Robinson, E.: Immunological Aspects of Placental Choriocarcinoma	195
4	Methods for Detection of Non Tumor Antigens and Fetal Proteins	205
4.1	Koldovský, P., J. Weinstein and H. Lischner: Non Tumor Antigens in Human Tumors	207
4.2	Smith, J. B. and R. A. Knight: Detection of Alpha-1 Fetoprotein in Human Serum	219
4.3	Kleist von, S.: Demonstration of Carcinoembryonic Antigens in Tumors of the Gastrointestinal Tract	233
4.4	Pusztaszeri, G. and J.-P. Mach: Radioimmunoassay of CEA: Its Use in Diagnosis and Prognosis of Human Carcinoma	241
4.5	Schultze-Mosgau, H. and K. Fischer: A Contribution for the Detection of Fetal Antigens in Serum of Tumor Patients	245
5	Methods for Detection of Proteins Excreted by Tumor Cells	251
5.1	Hermann, G.: Experiments to Induce Myeloma Protein-Forming Neoplasma in Rodents	253
5.2	Götz, H.: Immunological Differentiation of Monoclonal Immunoglobulins	271
5.3	Ricci, C., C. Baldi and R. Bonardi: Lung Neoplasia and Paraproteinemia	287
6	Some Clinical Aspects	303
6.1	Pappas, A. and P. G. Scheurlen: Lymphocyte Transformation in Malignant Diseases. Communication II: Results in Reticulo- and Lymphoproliferative Diseases as well as in Carcinomas	305
6.2	Brendel, W. and J. Ring: Immunosuppressive Therapy with Anti-lymphocytic Globulin and Tumor Formation	333
6.3	Benso, L., N. Nigro, P. Iudicello, R. M. Brunet and R. M. Jacob: Behaviour of Guarini Reaction in Children with Hemolymphoblastoses and non Tumoral Diseases	351
