

# Contents

## **Contributing authors — VII**

Samar Bandyopadhyay

### **Chapter 1**

#### **Fundamentals of rubber compounding — 1**

Soumen Chakraborty

### **Chapter 2**

#### **Carbon black morphology and its application in elastomer and polymer matrix — 53**

Dipak Kumar Setua

### **Chapter 3**

#### **Elastomer blend and compatibility: a flow visualisation study — 121**

Mrinmoy Debnath and Abhijit Adhikary

### **Chapter 4**

#### **Use of graphene in rubber nanocomposite, its processability, and commercial advantages — 151**

Asit Baran Bhattacharya and Kinsuk Naskar

### **Chapter 5**

#### **Transmission rubber V-belt technology — 197**

Timir Baran Bhattacharyya

### **Chapter 6**

#### **The Science of Rubber Conveyor Belt: A Comprehensive Guide' — 229**

Saikat Das Gupta, Hirak Satpathi, Tirthankar Bhandary,  
and Rabindra Mukhopadhyay

### **Chapter 7**

#### **Reverse engineering: a tool for the chemical composition analysis of finished rubber products — 279**

Shambhu Lal Agrawal and Abhijit Adhikary

### **Chapter 8**

#### **Thermal and mechanical analysis study of different rubber applications — 323**

Dipankar Mondal, Soumyajit Ghorai, Dipankar Chattopadhyay, and Debapriya De

**Chapter 9**

**Devulcanisation of discarded rubber: a value-added disposal method of waste rubber products — 365**

Kasilingam Rajkumar and Santosh C Jagadale

**Chapter 10**

**Cost of quality in rubber processing — 445**

Bireswar Banerjee

**Chapter 11**

**Lean productivity and cost optimisation for rubber processing industries — 469**

**Index — 501**
