

Table of Contents

Invited Papers

Computational Intelligence and Image Processing Methods for Applications in Skin Cancer Diagnosis	3
<i>Maciej Ogorzałek, Grzegorz Surówka, Leszek Nowak, and Christian Merkwirth</i>	
Affective Man-Machine Interface: Unveiling Human Emotions through Biosignals	21
<i>Egon L. van den Broek, Viliam Lisý, Joris H. Janssen, Joyce H.D.M. Westerink, Marleen H. Schut, and Kees Tuinenbreijer</i>	

Part I: BIODEVICES

On-Chip Biosensors Based on Microwave Detection for Cell Scale Investigations	51
<i>Claire Dalmay, Arnaud Pothier, M. Cheray, Fabrice Lalloué, Marie-Odile Jauberteau, and Pierre Blondy</i>	
Improvements of a Brain-Computer Interface Applied to a Robotic Wheelchair	64
<i>André Ferreira, Teodiano Freire Bastos-Filho, Mário Sarcinelli-Filho, José Luis Martín Sánchez, Juan Carlos García García, and Manuel Mazo Quintas</i>	
Wavelet-Based and Morphological Analysis of the Global Flash Multifocal ERG for Open Angle Glaucoma Characterization	74
<i>J.M. Miguel-Jiménez, S. Ortega, I. Artacho, L. Boquete, J.M. Rodríguez-Ascariz, P. De La Villa, and R. Blanco</i>	
Biotin-Streptavidin Sensitive BioFETs and Their Properties	85
<i>Thomas Windbacher, Viktor Sverdlov, and Siegfried Selberherr</i>	
Improving Patient Safety with X-Ray and Anesthesia Machine Ventilator Synchronization: A Medical Device Interoperability Case Study	96
<i>David Arney, Julian M. Goldman, Susan F. Whitehead, and Insup Lee</i>	
A Ceramic Microfluidic Device for Monitoring Complex Biochemical Reactive Systems	110
<i>Walter Smetana, Bruno Balluch, Ibrahim Atassi, Philipp Kügler, Erwin Gaubitzer, Michael Edetsberger, and Gottfried Köhler</i>	

Knee Angle Estimation Algorithm for Myoelectric Control of Active Transfemoral Prostheses	124
<i>Alberto López Delis, João Luiz Azevedo de Carvalho, Adson Ferreira da Rocha, Francisco Assis de Oliveira Nascimento, and Geovany Araújo Borges</i>	
Micro Droplet Transfer between Superhydrophobic Surfaces via a High Adhesive Superhydrophobic Surface	136
<i>Daisuke Ishii, Hiroshi Yabu, and Masatusgu Shimomura</i>	
Part II: BIOSIGNALS	
Study on Biodegradation Process of Polyethylene Glycol with Exponential Growth of Microbial Population	145
<i>Masaji Watanabe and Fusako Kawai</i>	
Variable Down-Selection for Brain-Computer Interfaces	158
<i>Nuno S. Dias, Mst Kamrunnahar, Paulo M. Mendes, Steven J. Schiff, and Jose H. Correia</i>	
Effect of a Simulated Analogue Telephone Channel on the Performance of a Remote Automatic System for the Detection of Pathologies in Voice: Impact of Linear Distortions on Cepstrum-Based Assessment - Band Limitation, Frequency Response and Additive Noise	173
<i>Rubén Fraile, Nicolás Sáenz-Lechón, Juan Ignacio Godino-Llorente, Víctor Osuma-Ruiz, and Corinne Fredouille</i>	
A Biologically-Inspired Visual Saliency Model to Test Different Strategies of Saccade Programming	187
<i>Tien Ho-Phuoc, Anne Guérin-Dugué, and Nathalie Guyader</i>	
Transition Detection for Brain Computer Interface Classification	200
<i>Ricardo Aler, Inés M. Galván, and José M. Valls</i>	
Tuning Iris Recognition for Noisy Images	211
<i>Artur Ferreira, André Lourenço, Bárbara Pinto, and Jorge Tendeiro</i>	
Three-Dimensional Reconstruction of Macroscopic Features in Biological Materials	225
<i>Michal Krumnikl, Eduard Sojka, Jan Gaura, and Oldřich Motyka</i>	
Wavelet Transform Analysis of the Power Spectrum of Centre of Pressure Signals to Detect the Critical Point Interval of Postural Control	235
<i>Neeraj Kumar Singh, Hichem Snoussi, David Hewson, and Jacques Duchêne</i>	

Early Detection of Severe Apnoea through Voice Analysis and Automatic Speaker Recognition Techniques	245
<i>Ruben Fernández, Jose Luis Blanco, David Díaz, Luis A. Hernández, Eduardo López, and José Alcázar</i>	
Automatic Detection of Atrial Fibrillation for Mobile Devices	258
<i>Stefanie Kaiser, Malte Kirst, and Christophe Kunze</i>	
Speaker-Adaptive Speech Recognition Based on Surface Electromyography	271
<i>Michael Wand and Tanja Schultz</i>	
Towards the Development of a Thyroid Ultrasound Biometric Scheme Based on Tissue Echo-morphological Features	286
<i>José C.R. Seabra and Ana L.N. Fred</i>	

Part III: HEALTHINF

Collecting, Analyzing, and Publishing Massive Data about the Hypertrophic Cardiomyopathy	301
<i>Lorenzo Montserrat, Jose Antonio Cotelo-Lema, Miguel R. Luaces, and Diego Seco</i>	
BredeQuery: Coordinate-Based Meta-analytic Search of Neuroscientific Literature from the SPM Environment	314
<i>Bartłomiej Wilkowski, Marcin Szewczyk, Peter Mondrup Rasmussen, Lars Kai Hansen, and Finn Årup Nielsen</i>	
Simulation of ECG Repolarization Phase with Improved Model of Cell Action Potentials	325
<i>Roman Trobec, Matjaž Depolli, and Viktor Avbelj</i>	
Advances in Computer-Based Autoantibodies Analysis	333
<i>Paolo Soda and Giulio Iannello</i>	
Support Vector Machine Diagnosis of Acute Abdominal Pain	347
<i>Malin Björnsdotter, Kajsa Nalin, Lars-Erik Hansson, and Helge Malmgren</i>	
Near Field Communication and Health: Turning a Mobile Phone into an Interactive Multipurpose Assistant in Healthcare Scenarios	356
<i>Giuliano Benelli and Alessandro Pozzebon</i>	
Electronic Health Records: An Enhanced Security Paradigm to Preserve Patient's Privacy	369
<i>Daniel Slamanig and Christian Stingl</i>	

Augmented Feedback System to Support Physical Therapy of Non-specific Low Back Pain	381
<i>Dominique Brodbeck, Markus Degen, Michael Stanimirov, Jan Kool, Mandy Scheermesser, Peter Oesch, and Cornelia Neuhaus</i>	
Multi-analytical Approaches Informing the Risk of Sepsis	394
<i>Femida Gwadry-Sridhar, Benoit Lewden, Selam Mequanint, and Michael Bauer</i>	
Author Index	407
