

Contents

Preface	vii
Acknowledgments	xi
A Note on Sources	xi

Part I *Disputes with Einstein*

Einstein and Nordström: Some Lesser-Known Thought Experiments in Gravitation	3
JOHN D. NORTON	
Out of the Labyrinth? Einstein, Hertz, and the Göttingen Answer to the Hole Argument	30
DON HOWARD AND JOHN D. NORTON	
Conservation Laws and Gravitational Waves in General Relativity (1915–1918)	63
CARLO CATTANI AND MICHELANGELO DE MARIA	
The General-Relativistic Two-Body Problem and the Einstein–Silberstein Controversy	88
PETER HAVAS	

Part II *The Empirical Basis of General Relativity*

Einstein's Explanation of the Motion of Mercury's Perihelion	129
JOHN EARMAN AND MICHEL JANSSEN	
Pieter Zeeman's Experiments on the Equality of Inertial and Gravitational Mass	173
A.J. KOX	

Part III *Variational Principles in General Relativity*

Variational Derivations of Einstein's Equations	185
S. KICHENASSAMY	

Levi-Civita's Influence on Palatini's Contribution to General Relativity	206
CARLO CATTANI	

Part IV *The Reception and Development of General Relativity*

The American Contribution to the Theory of Differential Invariants, 1900–1916	225
KARIN REICH	

The Reaction to Relativity Theory in Germany, III: "A Hundred Authors against Einstein"	248
HUBERT GOENNER	

Attempts at Unified Field Theories (1919–1955). Alleged Failure and Intrinsic Validation/Refutation Criteria	274
SILVIO BERGIA	

Vladimir Fock: Philosophy of Gravity and Gravity of Philosophy	308
GENNADY GORELIK	

S. Chandrasekhar's Contributions to General Relativity	332
KAMESHWAR C. WALI	

Part V *Cosmology and General Relativity*

Lemaître and the Schwarzschild Solution	353
JEAN EISENSTAEDT	

E.A. Milne and the Origins of Modern Cosmology: An Essential Presence	390
JOHN URANI AND GEORGE GALE
