Foreword v

Introduction 1

1 Strip-method of signal transformation 12
1.1 Strip-method of linear pre-distortions and problems it solves 12
1.2 Assurance of the transformed signal continuity 22
1.3 Equalization of non-stationary signal variance. 27
1.4 Equalization of the "informative ability" of a non-stationary signal. . 32
1.5 Narrowing of the pre-distorted signal frequency spectrum. 36

2 Optimal Chebyshev pre-distortion and filtration 41
2.1 Preliminaries 41
2.2 Problem statement 44
2.3 Estimation of the potential noise immunity in case of single noise . . . 47
2.4 Estimation of the potential noise immunity in the case of multiple noises 49
2.5 Synthesis of the optimal Chebyshev filter 51
2.6 Quasioptimal pre-distortions 58
2.7 Introduction of redundancy in the strip-method of linear pre-distortions 63
2.7.1 Decreasing the noise power in a reconstructed signal 64
2.7.2 Detection, localization, identification and correction of pulse noise 65
2.7.3 Possibilities for applying the strip-method in steganography . . 77

3 Strip-method of image transformation 79
3.1 Two-dimensional strip-transformation 79
3.2 Choice of optimal transformation matrices 84
3.3 Examples of the strip-transformation of images 87
3.4 Determination of critical multiplicity of noise 97
3.5 Root images of the two-sided strip-transformation. 100

4 Hardware implementation of the strip-method 114
4.1 Implementation of the strip-method with usage of magnetic recording – reproducing instruments 114
4.2 Implementation of the strip-method with a cyclic matrix 117

Bibliografische Informationen

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

4.3 The device for equalization of the signal variance 119
4.4 Devices for introducing information redundancy 120

Conclusion 127

Appendix Hadamard matrices and the matrices close to them 129
A.1 Hadamard matrices 129
A.2 Shortened Hadamard matrices 133
A.3 Conference-matrices 134
A.4 Optimal matrices of the odd order (M-matrices) 138
A.5 Algorithm for determining optimal matrices 143
A.6 Characteristics of optimal matrices 147
