Preface	VII
1 Elliptic Curves, the Finiteness Theorem of Shafarevič	1
1.1 Elliptic Curves over $\mathbb{C}$	1
1.2 Elliptic Curves over Arbitrary Fields	4
1.2.1 Reduction of Elliptic Curves	6
1.2.2 Two Finiteness Theorems of Number Theory	6
1.2.3 SHAFAREVIČ's Finiteness Theorem	7
1.2.4 Basic References	9
2 Picard Curves	11
2.1 The Moduli Space of PICARD Curves	11
2.2 The Relative SCHOTTKY Problem for PICARD Curves	17
2.2.1 The JACOBI Map	19
2.2.2 RIEMANN's Period Relations	19
2.2.3 The Effective SCHOTTKY-TORELLI Problem for PICARD Curves	21
2.3 Typical Period Matrices	22
2.3.1 G -typical Bases of $H_1(\mathbb{Z})$	23
2.3.2 Period Matrices of G -typical Bases	25
2.4 Metrization	26
2.5 Arithmetization	29
2.6 A Retrospect to Elliptic Curves	31
2.7 Rough Solution of the Relative SCHOTTKY Problem for PICARD Curves	33
3 Uniformizations and Differential Equations of Euler-Picard Type	39
3.1 Ball Uniformization of Algebraic Surfaces	39
3.2 Special Fuchsian Systems and GAUSS-MANIN Connection	45
3.3 PICARD Modular Forms	52
3.4 PICARD Modular Forms as Theta Constants	59
4 Algebraic Values of Picard Modular Theta Functions	65
4.1 Introduction	65
4.2 Complex Multiplication on Abelian Varieties	67
4.3 Types of Complex Multiplication	69
4.4 Transformation of Constants	75
4.5 SHIMURA Class Fields	77
4.6 Moduli Fields	79
4.7 The Main Theorem of Complex Multiplication	81
4.8 SHIMURA Class Fields by Special Values	83
4.9 Special Points on SHIMURA Varieties of $U(2, 1)$	87

5 Transcendental Values of Picard Modular Theta Constants	101
5.1 Transcendence at Non-Singular Simple Algebraic Moduli	101
5.2 Transcendence at Non-Singular Non-Simple Algebraic Moduli	109
5.3 Some More History	114
6 Arithmetic Surfaces of Kodaira-Picard Type and some Diophantine Equations	119
6.1 Introduction	119
6.2 Arithmetic Surfaces and Curves of KODAIRA-PICARD Type	119
6.3 Heights	120
6.4 Conjectures of VOJTA and PARSHIN's Problem	125
6.5 KUMMER Maps	127
6.6 Proof of the Main Implication	128
7 Appendix I	
A Finiteness Theorem for Picard Curves with Good Reduction	133
7.1 Some Definitions and Known Results	133
7.2 Affine Models of n -gonal Cyclic Curves	134
7.3 Normal Forms of PICARD Curves	135
7.4 Conditions for Smoothness	138
7.5 Projective Isomorphism Classification in Characteristic > 3	139
7.6 Minimal Normal Forms for PICARD Curves	140
7.7 Good Reduction of PICARD Curves	141
8 Appendix II	
The Hilbert Problems 7, 12, 21 and 22	145
8.1 Irrationality and Transcendence of Certain Numbers	145
8.2 Extension of KRONECKER's Theorem on Abelian Fields	145
8.3 Proof of the Existence of Linear Differential Equations Having a Prescribed Monodromic Group	147
8.4 Uniformization of Analytic Relations by Means of Automorphic Functions	148
Basic Notations	149
Bibliography	151
Index	157
