

Contents

I General Methods of Control and Automation

Decision Support via Fuzzy Technology H.-J. ZIMMERMANN	3
Principles of Adaptive Neural Networks for Control R. ECKMILLER	11
Artificial Intelligence and Expert Systems D.M. GABA	22

II Assessment and Evaluation of Signals and Measurements

a) Anaesthesia Machine Monitoring

Which Monitoring Qualities Ensure Proper Machine Function? H. FRANKENBERGER	39
Reliability, Testability, Alarms, and the Fail-Safe Concept J.S. GRAVENSTEIN	47
The Differences Between Closed-circuit, Low-flow, and High-flow Breathing Systems: Controllability, Monitoring, and Engineering Aspects L.H.D.J. BOOIJ and J.G.C. LEROU	60

b) Therapeutic Monitoring of Patients

Does the EEG Measure Therapeutic Opioid Drug Effect? V. BILLARD and S.L. SHAFER	79
Somatosensory Evoked Potentials: Objective Measures of Antinociception in the Anaesthetized Patient? E. KOCHS	96

Do Auditory Evoked Potentials Assess Awareness? D. SCHWENDER, S. KLASING, C. MADLER, E. PÖPPEL, and K. PETER	107
--	-----

Should Neuromuscular Transmission Be Monitored Routinely During Anaesthesia? J. VIBY-MOGENSEN	119
---	-----

III Control and Automation of Artificial Ventilation

Pulmonary Function and Ventilatory Patterns During Anaesthesia P. KÖNIG, F. DONALD, and P.M. SUTER	127
--	-----

What Can and What Should Be Controlled During Artificial Ventilation? H.J. BENDER	140
---	-----

Closed-Loop Control of Artificial Ventilation D.R. WESTENSKOW	149
--	-----

IV Control and Automation of Drug Delivery

a) Volatile Anaesthetics

Adaptive Closed-Loop Control of End-Tidal Concentrations of Volatile Agents D.R. WESTENSKOW	155
---	-----

Fuzzy Control of Arterial Blood Pressure by Volatile Anaesthetics A.M. ZBINDEN, M. DERIGHETTI, S. PETERSEN, and P. FEIGENWINTER.	158
---	-----

Model-based Adaptive Control of Volatile Anaesthetics by Quantitative EEG H. SCHWILDEN and J. SCHÜTTLER	163
---	-----

b) Intravenous Anaesthetics

The Target of Control: Plasma Concentrations or Drug Effect P.S.A. GLASS	177
---	-----

Open-Loop Control Systems and Their Performance for Intravenous Anaesthetics J.W. SEAR	185
--	-----

Feedback Control of Intravenous Anaesthetics by Quantitative EEG J. SCHÜTTLER and H. SCHWILDEN	194
Adaptive Control of Intravenous Anaesthesia by Evoked Potentials G.N.C. KENNY and D.A. RAY.	208
<i>c) Neuromuscular Blocking Agents and Vasoactive Drugs New Drug-Delivery Devices</i>	
Model-based Adaptive Control of Neuromuscular Blocking Agents K.T. OLKKOLA	223
Supervisory Adaptive Control of Arterial Blood Pressure by Vasoactive Agents N. TY SMITH, J.F. MARTIN, J. MANDEL, A.M. SCHNEIDER, and M.L. QUINN	234
New Drug-Delivery Devices for Volatile Anaesthetics E.-G. SCHARMER	242
New Drug-Delivery Systems for Intravenous Anaesthetics P.S.A. GLASS, J.R. JACOBS, and T. QUILL.	252
V Nonmedical Aspects of Automated Control: Requirements and Liability for Automated Systems	
The Technical Point of View U. BOVENKAMP and H. JUNKER	265
Regulatory Aspects E. TSCHÖPE.	269
The Manufacturer's Point of View B. HERMANRUD	273
Subject Index	277
