Contents

Part I Markets and Trading

Agent's Minimal Intelligence Calibration for Realistic Market Dynamics . 3
Iryna Veryzhenko, Olivier Brandouy, and Philippe Mathieu
1 Introduction 3
2 Literature Review 4
2.1 Seminal Contribution and Initial Controversy 4
3 ATOM and Real World Market 5
4 Empirical Strategy and Results 7
4.1 Data Description 7
4.2 Calibration Elements: Agent's Behavior 7
4.3 One Single Stock Detailed Results 9
4.4 Population Statistics 12
5 Conclusion 12
References 14

Trading on Marginal Information 15
Florian Hauser and Bob Kaempff
1 Introduction 15
2 Market Model 16
3 Original Fundamental Trading Strategy 17
4 Modified Fundamental Trading Strategy 19
4.1 Definition 19
4.2 Optimization for one Agent 20
4.3 Equilibrium for two Possible Trading Strategies 23
5 Conclusion 24
References 25

Stylized Facts Study through a Multi-Agent Based Simulation of an Artificial Stock Market 27
Zahra Kodia, Lamjed Ben Said, and Khaled Ghedira
1 Introduction 27

Bibliografische Informationen
http://d-nb.info/1002680530

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

2 The Micro/Macro Level of the Stock Market 28
2.1 Trader Transaction Protocol 28
2.2 New Cognitive Investor's Model 30
2.3 Social Networks and Interactions 34
3 Experiments and Results 34
4 Conclusion 37
References 37

Part II Auctions

A Variable Bid Increment Algorithm for Reverse English Auction 41
Imène Brigui-Chtioui and Suzanne Pinson
1 Introduction 41
2 Related Works 42
3 Auction Protocol 44
4 Auction Model 45
4.1 Multi-Agent Reverse English Auction Architecture 45
4.2 Preference Model 46
4.3 Aggregation Model 46
5 Anytime Counterproposal Definition 47
5.1 Propositions 48
5.2 Properties 49
6 Conclusion 50
References 51

Co-evolutionary Agents in Combinatorial Sealed-bid Auctions for Spectrum Licenses Markets 53
Asuncion Mochon, Yago Saez, Jose Luis Gomez-Barroso, and Pedro Isasi
1 Introduction 53
2 The Combinatorial First-Price Sealed-Bid Auction 54
3 The Scenarios 55
4 Bidding by Means of Agent-Based Co-Evolutionary Learning 56
5 Analysis of the Results 58
6 Conclusions and Future Work 60
References 61

The Effect of Transaction Costs on Artificial Continuous Double Auction Markets 65
Marta Posada and Cesáreo Hernández
1 Introduction 65
2 The Agent-Based CDA Market Model 66
2.1 The Institution 67
2.2 The Environment 67
2.3 Agents' Behavior 68
3 The Experiments 69
4 Measures and Main Results 70

4.1 Market Efficiency 70
4.2 Price Convergence 71
5 Conclusions 72
References 74

Part III Networks

The Rise and Fall of Trust Networks 77
Kartik Anand, Prasanna Gai, and Matteo Marsili
1 Introduction 77
2 The Model 80
2.1 Foreclosure Game 81
3 Results 82
4 Discussion 85
5 Appendix: The Algorithm 86
References 88

Simulations on Correlated Behavior and Social Learning 89
Andrea Blasco and Paolo Pin
1 Introduction 89
2 The Model 91
3 Simulations on Networks 92
4 Discussion 97
Appendix 98
References 99

Technology Shocks and Trade in a Network 101
Davoud Taghawi-Nejad
1 Introduction 101
2 The Model 102
2.1 Agents 102
2.2 Rounds and Agents' Actions 103
3 Analysis of the Agent-Based Model 109
3.1 Business Cycles 110
4 Growth in a Non-Growth Model 111
5 Conclusion 111
References 112

Part IV Management

The (Beneficial) Role of Informational Imperfections in Enhancing Organisational Performance 115
Friederike Wall
1 Introduction 115
2 Model 116
2.1 Organisational Structure 117

2.2 Informational Imperfections 118
3 Results 120
4 Interpretation 121
5 Conclusion 125
References 125

Social Interactions and Innovation: Simulation Based on an Agent-Based Modular Economy 127
Bin-Tzong Chie and Shu-Heng Chen
1 Introduction: The Purpose of this Study 127
2 Foundation of the Work 128
3 Simulation Design 130
4 Simulation Results 132
4.1 Competitiveness Dynamics: A Macroscopic View 132
4.2 Competitiveness Dynamics: A Microscopic View 133
4.3 Competitiveness Dynamics: A Mesoscopic View 134
4.4 Other Performance Criteria 136
5 Concluding Remarks 137
References 138

Threshold Rule and Scaling Behavior in a Multi-Agent Supply Chain 139
Valerio Lacagnina and Davide Provenzano
1 Introduction 139
2 The Model 141
2.1 The Network Structure 141
2.2 Capital Flows 143
2.3 From Bankruptcy to Rebirth 144
3 Simulation Results 145
3.1 Parameters Choice 145
3.2 Firm Size Distribution 145
4 Conclusions 148
References 150

Part V Industry Sectors

Information and Search on the Housing Market: An Agent-Based Model 153
John Mc Breen, Florence Goffette-Nagot, and Pablo Jensen
1 Introduction 154
2 Model 155
3 Results 157
3.1 Landlords' Information Level 158
3.2 Dynamically Varying the Discount Rate 160
4 Conclusion 163
5 Appendix: Initialisation 164
References 164

Adaptation of Investments in the Pharmaceutical Industry 165
Tino Schütte
1 Introduction 165
2 Modeling product market competition 166
2.1 Modeling the Supply Side 167
2.2 Modeling the Demand Side 169
2.3 Statistical Variables 170
2.4 Model Validation 170
3 Simulating Investment Adjustments 171
3.1 Success of Strategies: Innovative Firms 173
3.2 Success of Strategies: Imitative Firms 174
4 Conclusions 175
References 176

An Agent-Based Information Management Model of the Chinese Pig Sector 177
Sjoukje A. Osinga, Mark R. Kramer, Gert Jan Hofstede, Omid Roozmand, and Adrie J.M. Beulens
1 Introduction and Background Literature 177
2 Problem Definition 179
3 Methodology 181
4 Simulation Experiments and Results 183
5 Conclusions and Discussion 187
References 187

Part VI Macroeconomics

Wealth Distribution Evolution in an Agent-Based Computational Economy 191
Victor Romanov, Dmitry Yakovlev, and Anna Lelchuk
1 Introduction 191
2 Equilibrium Wealth Distribution Models 192
3 Model Architecture 194
4 Agent Job Placement 196
5 Customer Behavior 197
6 Stock Market Functioning 198
7 Enterprise Investment Strategy 199
8 Results 199
References 201

Endogenous Credit Dynamics as Source of Business Cycles in the EURACE Model 203
Andrea Teglio, Marco Raberto, and Silvano Cincotti
1 Introduction 203
2 The Model 205
2.1 Goods and Labor Markets 205

2.2 Credit and Financial Markets 207
3 Results 208
4 Concluding Remarks 212
References 213

Reinforcement Learning of Heterogeneous Private Agents in a Macroeconomic Policy Game 215
Mahdi Hemmati, Masoud Nili, and Nasser Sadati
1 Introduction 215
2 Inflation-Unemployment Game with Heterogeneous Agents 217
2.1 The Model with Homogeneous Agents 217
2.2 Incorporation of Heterogeneous Agents 218
3 Modeling of Learning Private Agents 220
3.1 Why Reinforcement Learning? 220
3.2 Overview of Reinforcement Learning 221
3.3 Structure of our RL Agents 222
4 Simulation Results 223
5 Conclusion 224
References 225

Part VII Demographics and Culture

Towards an Agent-Based Model of the Economic Development Process: The Dynamics of the Fertility Rate 229
Gianfranco Giulioni and Edgardo Bucciarelli
1 Introduction 229
2 The Evolution of the Total Fertility Rate in Developed Countries 231
3 The Household's Problem 232
3.1 Analytical Insights 232
3.2 Numerical Investigation 234
4 The Agent-Based Model 235
5 Conclusions 237
References 239

An Agent-Supported Simulation of Labour and Financial Markets for Migration Processes 241
Nancy Ruiz, Vicente Botti, Adriana Giret, Vicente Julian, Oscar Alvarado, Victor Perez, and Rosa M. Rodriguez
1 Introduction 242
2 Labour and Financial Market Models 243
2.1 Labour Market 244
2.2 Financial Market 245
3 Agent-Supported Simulation Architecture 245
3.1 Agent-Supported Labour Market 246
3.2 Agent-Supported Financial Market 247
4 ARGOS: An Agent-based Demonstrator 248

5 Experimentation 249
6 Conclusions 251
References 252

Sensitivity Analysis of an Agent-Based Model of Culture's Consequences for Trade 253
Saskia L.G.E. Burgers, Gert Jan Hofstede, Catholijn M. Jonker, and Tim Verwaart
1 Introduction 253
2 Trading Agents with Cultural Background 255
3 Sensitivity Analysis Approach 256
4 Results 258
4.1 Probability that Transactions Occur 258
4.2 Sensitivity Analysis 260
4.3 Differences between Cultures 262
4.4 Aggregate and Individual Level 263
5 Conclusion 263
References 264
