

Contents

Preface	ix
Participants	xi
<i>Bernhard Beckermann and Edward B. Saff</i>	
The sensitivity of least squares polynomial approximation	1
<i>Claude Brezinski and Michela Redivo-Zaglia</i>	
Transpose-free look-ahead algorithms for Lanczos' method	21
<i>Daniela Calvetti, Lothar Reichel, and Fiorella Sgallari</i>	
Applications of anti-Gauss quadrature rules in linear algebra	41
<i>Sven Ehrlich</i>	
Stieltjes polynomials and the error of Gauss-Kronrod quadrature formulas	57
<i>Hans-Jürgen Fischer</i>	
Fast solution of confluent Vandermonde-like linear systems using polynomial arithmetic	79
<i>Erich Fuchs</i>	
On discrete polynomial least-squares approximation in moving time windows	93
<i>Laura Gori and Elisabetta Santi</i>	
Quadrature rules based on s -orthogonal polynomials for evaluating integrals with strong singularities	109
<i>David B. Hunter and Geno Nikolov</i>	
Gegenbauer weight functions admitting L_2 Duffin and Schaeffer type inequalities	121
<i>Dirk P. Laurie</i>	
Questions related to Gaussian quadrature formulas and two-term recursions	133
<i>Shikang Li</i>	
Construction and computation of a new set of orthogonal polynomials	145
<i>Giorgio Mantica</i>	
Fourier transforms of orthogonal polynomials of singular continuous spectral measures	153
<i>Hrushikesh N. Mhaskar and Jürgen Prestin</i>	
On a sequence of fast decreasing polynomial operators	165

<i>Gradimir V. Milovanović</i>	
Müntz orthogonal polynomials and their numerical evaluation	179
<i>Knut Petras</i>	
Positivity of Gauss-Kronrod formulae for a certain ultraspherical weight function	195
<i>Michael-Ralf Skrzipek</i>	
A Christoffel-Darboux-type formula for Szegő polynomials and polynomial evaluation	203
<i>Kurt Suchy</i>	
Applications of tensor-valued tri-variate Hermite polynomials and spherical harmonics in the kinetic theory of gases	217
<i>Galliano Valent</i>	
Indeterminate moment problems and a conjecture on the growth of the entire functions in the Nevanlinna parametrization	227
<i>J. André C. Weideman</i>	
Spectral methods based on nonclassical orthogonal polynomials	239
Author index	253
Subject index	257
