

Table of Contents

Recent Advances in Declarative Networking	1
<i>Boon Thau Loo, Harjot Gill, Changbin Liu, Yun Mao, William R. Marczak, Micah Sherr, Anduo Wang, and Wenchao Zhou</i>	
Make Things Now! Pragmatic Functional Programming in Haskell	17
<i>Don Stewart</i>	
A Declarative Approach for Software Modeling	18
<i>Mayer Goldberg and Guy Wiener</i>	
Contracts and Specifications for Functional Logic Programming	33
<i>Sergio Antoy and Michael Hanus</i>	
The Environment as an Argument: Context-Aware Functional Programming.....	48
<i>Pedro M. Martins, Julie A. McCann, and Susan Eisenbach</i>	
Weighted-Sequence Problem: ASP vs CASP and Declarative vs Problem-Oriented Solving	63
<i>Yuliya Lierler, Shaden Smith, Mirosław Truszczyński, and Alex Westlund</i>	
Practical and Methodological Aspects of the Use of Cutting-Edge ASP Tools	78
<i>Marcello Balduccini and Yuliya Lierler</i>	
Efficient Tabling of Structured Data Using Indexing and Program Transformation	93
<i>Christian Theil Have and Henning Christiansen</i>	
Optimizing Inequality Joins in Datalog with Approximated Constraint Propagation	108
<i>Dario Campagna, Beata Sarna-Starosta, and Tom Schrijvers</i>	
Symbolic Execution of Concurrent Objects in CLP	123
<i>Elvira Albert, Puri Arenas, and Miguel Gómez-Zamalloa</i>	
A Segment-Swapping Approach for Executing Trapped Computations	138
<i>Pablo Chico de Guzmán, Amadeo Casas, Manuel Carro, and Manuel V. Hermenegildo</i>	

Palovca: Describing and Executing Graph Algorithms in Haskell	153
<i>Michael Lesniak</i>	
LEARNPADS ⁺⁺ : Incremental Inference of Ad Hoc Data Formats	168
<i>Kenny Q. Zhu, Kathleen Fisher, and David Walker</i>	
The Kennedy-Warren Algorithm Revisited: Ordering Attribute Grammars	183
<i>Jeroen Bransen, Arie Middelkoop, Atze Dijkstra, and S. Doaitse Swierstra</i>	
Distributed Policy Specification and Interpretation with Classified Advertisements	198
<i>Nicholas Coleman</i>	
Handshaking in Kansas Lava Using Patch Logic	212
<i>Andy Gill and Bowe Neuenschwander</i>	
Virtualizing Real-World Objects in FRP	227
<i>Daniel Winograd-Cort, Hai Liu, and Paul Hudak</i>	
Resource-Safe Systems Programming with Embedded Domain Specific Languages	242
<i>Edwin Brady and Kevin Hammond</i>	
Node-Based Connection Semantics for Equation-Based Object-Oriented Modeling Languages	258
<i>David Broman and Henrik Nilsson</i>	
A Declarative Specification of Tree-Based Symbolic Arithmetic Computations	273
<i>Paul Tarau</i>	
Typing the Numeric Tower	289
<i>Vincent St-Amour, Sam Tobin-Hochstadt, Matthew Flatt, and Matthias Felleisen</i>	
Author Index	305
