

Contents

1	Method of Coefficients: an algebraic characterization and recent applications	1
	Georgy P. Egorychev	
2	Partitions With Distinct Evens	31
	George E. Andrews	
3	A factorization theorem for classical group characters, with applications to plane partitions and rhombus tilings	39
	M. Ciucu and C. Krattenthaler	
4	On multivariate Newton-like inequalities	61
	Leonid Gurvits	
5	Niceness theorems	79
	Michiel Hazewinkel	
6	Method of Generating Differentials	127
	I-Chiau Huang	
7	Henrici's Friendly Monster Identity Revisited	155
	Peter Paule	
8	The Automatic Central Limit Theorems Generator (and Much More!)	165
	Doron Zeilberger
