Metallothionein nomenclature and structure

Nomenclature of metallothionein: Proposal for a revision <i>Yutaka Kojima, Pierre-Alain Binz and Jeremias H.R. Kägi</i>	3
Metallothionein: Molecular evolution and classification <i>Pierre-Alain Binz and Jeremias H.R. Kägi</i>	7
Structural and biological studies on native bovine Cu,Zn-metallothionein-3 <i>Milan Vašák, Ralf Bogumil, Peter Faller, Daniel W. Hasler, Pierre-Alain Binz, Stefan Klauser, Arend Bruinink, John M. Charnock and C. David Garner</i>	15
Circular dichroism, emission, and exafs studies of Ag(I), Cd(II), Cu(I), and Hg(II) binding to metallothioneins and modeling the metal binding site <i>Martin J. Stillman, Anna Rae Green, Ziqi Gui, David Fowle and P. Anthony Presta</i>	23
Metallothionein structure update <i>Gülin Öz, Dean L. Pountney, Ian M. Armitage</i>	37
Simulation of Zn/Cd binding in mammalian metallothionein domains <i>C.C. Chang and P.C. Huang</i>	45
The growth inhibitory activity of metallothionein-3 correlates with its novel β domain sequence rather than metal binding properties <i>Laran T. Jensen, Jay C. Erickson, Richard D. Palmiter and Dennis R. Winge</i>	51
Recombinant synthesis and metal-binding abilities of mouse metallothionein 1 and its α - and β -domains <i>Silvia Atrian, Roger Bofill, Mercè Capdevila, Neus Cols, Pilar González-Duarte, Roser González-Duarte, Àngels Leiva, Oscar Palacios and Núria Romero-Isart</i>	55
Biochemical characterization of monomeric and dimeric cadmium-substituted metallothionein-3 <i>Peep Palumaa and Rain Lehtme</i>	63

Chemical and analytical aspects of metallothionein

Mammalian metallothionein sub-isoform separation by RP-HPLC with on-line UV and electrochemical detection <i>Guy Bordin, Fernando Cordeiro Raposo and Adela Rodriguez</i>	73
Characterisation of mammalian Cd, Zn metallothioneins using differential pulse polarography <i>Adela Rosa Rodriguez</i>	85
Comparison of CZE and MECC separations of MT isoforms <i>Vesa Virtanen and Guy Bordin</i>	93
Synthetic peptides and domains of metallothionein for structure function studies: rabbit liver peptide MT-IIA 49–61 and lobster MT β_N β_C and $\beta_{C \rightarrow N}$ domains <i>Amalia Muñoz, Frank Laib, Eugene DeRose, David H. Petering, John Ejnić and C. Frank Shaw III</i>	99
Voltammetric methods in isolation and identification of plant metallothioneins from alga <i>Chlorella</i> <i>Ivana Šestáková, Pavel Mader, Hana Vodičková and Věra Pacáková</i>	111
Characterization of isometallothioneins in Chang liver cells and the transient accumulation of metallothionein and glutathione during cell proliferation <i>Annemarie Willi and Peter E. Hunziker</i>	117
Quantification of cytosolic metallothionein contents by a developed assay system using immobilized antibody <i>Tomomi Nagashima, Masashi Okabe, Shigeru Saito, Masaaki Kurasaki, Toshitsugu Hirauchi, Shinzo Kimura and Tadashi Nioka</i>	125
Protein engineering of metallothionein to study on the metal-binding ability <i>Masaaki Kurasaki, Futoshi Yamasaki, Rie Yamaguchi, Ana Rosa Linde Arias, Masashi Okabe, Tadasu Emoto, Fumitomo Odawara, Mika Suzuki-Kurasaki, Shigeru Saito and Yutaka Kojima</i>	129
Metal binding proteins: Molecular engineering of improvements in metal specificity <i>Ian Watt and Peter Kille</i>	137
Molecular splicing of metallothionein – study on domains of metallothionein <i>Yi Xiong, Yanjiao Zhou, Yiwu Chen and Binggen Ru</i>	145

Metallothionein in non-mammalian tissues

Involvement of metallothionein in female squirrelfish reproduction <i>E.D. Thompson, P.-E. Olsson, G.D. Mayer, C. Haux, P. Walsh and C. Hogstrand</i>	157
Accumulation of untranslated metallothionein mRNA in antarctic hemoglobinless fish (icefish) <i>Vincenzo Carginale, Rosaria Scudiero, Antonio Capasso, Clemente Capasso, Gianluca Passaretti, Guido di Prisco, Peter Kille and Elio Parisi</i>	167
Structure and function of metallothionein isoforms in terrestrial snails <i>Reinhard Dallinger, Burkhard Berger, Peter Hunziker and Jeremias H.R. Kägi</i>	173
Functional and regulatory aspects of teleost metallothionein <i>P.-E. Olsson, M. Gerpe and P. Kling</i>	179
Metallothionein induction in mussels exposed to a metal mixture <i>M.J. Bebianno and W.J. Langston</i>	187
Synthesis and properties of class III metallothioneins of <i>Schizosaccharomyces pombe</i> in response to cadmium and zinc <i>Mary M. Lauro and Donald J. Plocke</i>	195
Phytochelatins (class III metallothioneins) and their desglycyl peptides induced by cadmium in root cultures of <i>Rubia tinctorum</i> L. <i>Tamio Maitani, Hiroki Kubota, Kyoko Sato and Takashi Yamada</i>	201
Chemical and spectroscopic properties of copper metallothionein from the copper resistant fungus <i>Beauveria bassiana</i> <i>Satomi Kameo, Peter Faller, Milan Vašák and Yutaka Kojima</i>	207

Transcription factors

Metallothionein facts and frustrations <i>Richard D. Palmiter</i>	215
Liver degeneration and embryonic lethality in mouse null mutants for the metal-responsive transcriptional activator MTF-1 <i>Çagatay Günes, Rainer Heuchel, Oleg Georgiev, Karl-Heinz Müller, Silvia Marino, Adriano Aguzzi, Horst Blüthmann and Walter Schaffner</i>	223

New insights into the mechanisms of cadmium regulation of mouse metallothionein-I gene expression <i>G.K. Andrews, D. Bittel, T. Dalton, N. Hu, W. Chu, M. Daggett, Q. Li and J. Johnson</i> ..	227
Activation of mouse metallothionein I promoter by cadmium in human neuroblastoma cells <i>Jeffrey A. Johnson, Jeffrey D. Moehlenkamp, Waihei Chu, Douglas Bittel and Glen K. Andrews</i>	233
Transcription factors involved in heavy metal regulation of the human metallothionein-II _A gene <i>Shinji Koizumi, Yasumitsu Ogra, Kaoru Suzuki and Fuminori Otsuka</i>	237
Transcriptional regulation of the gene encoding mouse metallothionein-3 and its expression in the organs of the reproductive system <i>Pierre Moffatt, Raffaella Faraonio, Olivier LaRochelle, Isabelle Delisle, René Saint-Arnaud, and Carl Séguin</i>	243
Dynamic regulation of yeast metallothionein gene transcription via metalloregulatory signaling factors <i>D.J. Thiele, M.M.O. Peña and K.A. Koch</i>	251
Metal regulation of mammalian metal responsive element (MRE) binding proteins <i>L. Gedamu, S.L.-A. Samson, S. Schieman and W. Paramchuk</i>	253
Metallothionein and hormone responsiveness <i>James Koropatnick, Janice M. DeMoor and Olga M. Collins</i>	261
Synergistic activation of mouse metallothionein-I gene by interleukin-6 and glucocorticoid <i>Norio Itoh, Keiko Kasutani, Masako Kanekiyo, Tomoki Kimura, Norio Muto and Keiichi Tanaka</i>	267
Hammerhead ribozymes mediated down-regulation of rat metallothionein mrnas expression <i>Kai-Fai Lee and Shuk-Mei Ho</i>	273
Inactivation of metal-induced metallothionein gene expression by protein kinase C inhibitor <i>Je-Hsin Chen, Chih-Wen Yu and Lih-Yuan Lin</i>	281
Cadmium-induced metallothionein expression and metallothionein mRNA in mice <i>Keiji Suzuki, Kyoumi Nakazato and Katsuyuki Nakajima</i>	287

Role of metallothionein in reproduction, development and cell proliferation

The nuclear-cytoplasmic presence of metallothionein in cells during differentiation and development <i>M. George Cherian, John C. Lau, Margarita D. Apostolova and Lu Cai</i>	291
Metallothionein and male genital organs <i>Chiharu Tohyama, Junko S. Suzuki, Hisao Nishimura, and Noriko Nishimura</i>	295
Induction of metallothionein-like cadmium binding protein in testis and its protective role against cadmium toxicity <i>H. Ohta, H. Tanaka, S. Asami, Y. Seki and H. Yoshikawa</i>	301
Zinc homeostasis during pregnancy in metallothionein-null mice on a low zinc diet <i>A.M. Rofo, J.C. Philcox, M. Sturkenboom and P. Coyle</i>	309
Restriction of cadmium transfer to egg from laying hen exposed to cadmium: Involvement of metallothionein in the ovaries <i>Shin Sato, Masashi Okabe, Tadasu Emoto, Masaaki Kurasaki and Yutaka Kojima</i>	315
Metallothionein expression during wool follicle development in foetal sheep <i>Hisao Nishimura, Noriko Nishimura, Chiharu Tohyama, Graham R. Cam and David L. Adelson</i>	321
A role of hepatic metallothionein on mercury distribution in fetal guinea pigs after in utero exposure to mercury vapor <i>Minoru Yoshida, Hiroshi Satoh and Yawara Sumi</i>	325
Cell differentiation alters metallothionein expression in avian growth plate chondrocytes <i>Glenn R. Sauer, Licia N. Y. Wu, Daotai Nie and Roy E. Wuthier</i>	333
 Metallothionein in brain disease	
Metallothionein in oxidate stress of Parkinson's disease <i>Manuchair Ebadi, Midori Hiramatsu, M.V. Ramana Kumari, Ruyi Hao and Ronald F. Pfeiffer</i>	341
Metallothionein-1,2 and heme oxygenase-1 are expressed in damaged brain regions following chemically-induced seizures <i>Mitchell R. Emerson, Robert S. Cross, Shaohua Jin, Fred E. Samson and Thomas L. Pazdernik</i>	351

Molecular cloning and expression of the metallothionein (MT)-I and MT-III in brain lesions of dogs <i>Akinori Shimada, Seiji Kojima, Takashi Uemura, Yoshiaki Yamano, Kinji Kobayashi, Takehito Morita and Takashi Umemura</i>	359
Liver and brain metallothionein regulation in transgenic mice overexpressing interleukin-6 and in mice carrying a null mutation in the interleukin-6 gene <i>Juan Hidalgo, Javier Carrasco, Joaquín Hernández, Mercedes Giralt, Amalia Molinero, Berta González, Horst Bluethmann and Iain L. Campbell</i>	363
Effects of capsaicin on metallothionein (MT) mRNA in sensory neurons: Possible role of MT-III in nociception <i>Yongjiu Cai, Rubén A. Velázquez and Alice A. Larson</i>	371
Metallothionein expression in the mammalian brain <i>Adrian K. West, Adele F. Holloway, Fiona A. Stennard and Janine M. Miller</i>	377
Induction of metallothionein-I (MT-I) mRNA in primary astrocyte cultures is mediated by hypotonicity <i>M. Aschner, and D.R Conklin</i>	383
Metallothionein in the cerebral cortex of rats showing hereditary high ability in sidman avoidance test <i>H. Aikawa, T. Yoshida, H. Ohta and Y. Seki</i>	389
Role of metallothionein in copper metabolism, diabetes and autoimmune disease	
Roles of metallothionein in the cytotoxicity of copper in the liver of LEC rats <i>Kazuo T. Suzuki, Ming Rui, Jun-ichi Ueda and Toshihiko Ozawa</i>	397
Fate of copper and metallothionein in the liver of LEC rats <i>Dominik Klein, Josef Lichtmannegger, Ulrich Heinzmann, Josef Müller-Höcker and Karl H. Summer</i>	403
Relationship between Cu metabolism hereditary disorders and distribution of Cu-metallothionein in kidneys <i>Masashi Okabe, Shigeru Saito, Mika Suzuki-Kurasaki, Takeshi Saito, Akira Hata, Fumio Endo, Koji Nagano, Ken-ichi Urakami, Ichiro Matsuda and Masaaki Kurasaki</i>	413

Zincsulphate protects from streptozotocin-induced diabetes mellitus in mice: A function of metallothionein? <i>Patricia Ohly, Zhiyong Wang, Claudia Dohle, Josef Abel and Helga Gleichmann</i>	421
MT does not protect endocrine cell damage induced by alloxan in pancreas of mice <i>Takeshi Minami, Hidenori Tanaka, Yuko Okazaki, Setsuko Tohno and Yoshiyuki Tohno</i>	429
Plasma MT levels in diabetic and renal failure patients <i>Takeshi Minami, Setsuko Tohno, Yoshiyuki Tohno, Noriko Otaki, Masami Kimura and M. George Cherman</i>	433
Metallothionein-mediated alterations in autoimmune disease processes <i>M.A. Lynes, C.A. Richardson, R. McCabe, K.C. Crowthers, J.C. Lee, J. Youn, I.B. Schweitzer and L.D. Shultz</i>	437
Dietary zinc, photoimmunosuppression and metallothionein (MT) <i>Vivienne E. Reeve, Noriko Nishimura, Meira Bosnic, Andy K.H. Choo and Anna E. Michalska</i>	445
 Role of metallothionein in Cd-induced nephrotoxicity and bone loss	
Metallothionein-null mice are susceptible to chronic CdCl ₂ -induced nephropathy: Cd-induced renal injury is not necessarily mediated by CdMT <i>Curtis D. Klaassen, Jie Liu, Yaping Liu and Sultan S. Habeebu</i>	453
Cellular metallothionein: Properties of apometallothionein and the comparative toxicity of Cd ²⁺ and Cd-metallothionein <i>David H. Petering, Munira Dughish, Meilin Huang, Susan Krezoski, Sara Krull, Donna Lewand, Amalia Muñoz, Lifan Ren, Sudha Venkatesh, Samuel Blumenthal and C. Frank Shaw III</i>	459
Zinc-induced protection against cadmium-metallothionein nephrotoxicity depends on glutathione status <i>Zahir A. Shaikh, Weifeng Tang and Selma Sadovic</i>	467
Mechanism of improved cadmium-induced renal dysfunction after cessation of cadmium exposure <i>Kazuo Nomiya, Hiroko Nomiya and Naoki Kameda</i>	471
The role of metallothionein in cadmium-induced bone resorption <i>Maryka H. Bhattacharyya, Carmen A. Blum and Allison K. Wilson</i>	473

Metallothionein induction in human proximal tubular cell cultures – lack of protection against heavy metal toxicity <i>Adrian T. Miles, Vicente Rodilla, Antony G. Breen, John Beattie, William Jenner and Gabrielle M. Hawksworth</i>	477
Relationship of metallothionein to cadmium and to zinc in human liver and kidney <i>Arata Teranishi, Ruriko Ninomiya, Naoko Koizumi</i>	485
Apoptosis of human kidney 293 cells is promoted by polymerized Cd-metallothionein <i>Tetsuo Hamada, Akihide Tanimoto, Takakazu Sasaguri, Nobuyuki Arima, Shohei Shimajiri, Ryuji Nakano and Yasuyuki Sasaguri</i>	489
Role of metallothionein in oxidative stress	
Subcellular localization mediated functioning of metallothionein: Protection against oxygen radicals and anticancer agents <i>Elizabeth S. Woo, Bruce R. Pitt and John S. Lazo</i>	499
Obesity and hyperleptinemia in a colony of metallothionein (-I and -II) null mice <i>John H. Beattie, Anne M. Wood, April M. Newman, Ian Bremner, K.H. Andy Choo, Anna E. Michalska, Jackie S. Duncan and Paul Trayhurn</i>	505
Cardiac protection by metallothionein against ischemia-reperfusion injury and its possible relation to ischemic preconditioning <i>Y. James Kang and Ju-Feng Wang</i>	511
Metallothionein and its importance relative to glutathione in cardiac protection against doxorubicin toxicity <i>Guang-Wu Wang, Hui-Yun Wu and Y. James Kang</i>	517
Metallothionein metal composition is a determinant of its induction of the mitochondrial permeability transition <i>Cuthbert O. Simpkins, Tracy Lloyd, Sai Li and Samuel C. Balderman</i>	523
Protective effect of metallothionein on DNA damage induced by hydrogen peroxide and ferric ion-nitritotriacetic acid <i>Kyong-Son Min, Kayo Nishida, Yukiko Nakahara and Satomi Onosaka</i>	529
Effect of metallothionein on cardiac reperfusion injury in rats <i>Seiki Minamide, Masashi Okamoto, Fumio Naganuma, Katsuyuki Nakajima and Tadashi Suzuki</i>	535

Susceptibility to metals and radical-inducing chemicals of metallothionein-null mice <i>Masahiko Satoh and Chiharu Tohyama</i>	541
Metallothionein-I/II knockout mice are sensitive to acetaminophen-induced hepatotoxicity <i>Jie Liu, Yaping Liu, Curtis D. Klaassen, Stacey E. Shehin-Johnson, Angela Lucas and Steven D. Cohen</i>	547
Effect of oxidative stress and bioavailable zinc on metallothionein in cultured human retinal pigment epithelial cells (RPE) <i>David J. Tate, Jr., Michael V. Miceli and David A. Newsome</i>	553
Specific binding sites of metallothionein on endothelium of small vessels in myocardium <i>Shi Cheng, Ge Shujun, Zhong Chongxia, He Qihua and Hou Lin</i>	561
Metallothionein and carcinogenesis	
Further studies on the role of metallothionein in the antitumor effects of cadmium <i>Michael P. Waalkes, Takeaki Nagamine, Hideaki Shimada, Bhalchandra A. Diwan, Timothy P. Coogan, Noriyuki Shiraishi, M. George Cherian and Robert A. Goyer</i>	569
Effects of metallothionein expression on development of drug resistance <i>Toby G. Rossman and Ekaterina I. Goncharova</i>	573
A chemical mechanism for inactivation of anticancer drugs by metallothionein <i>Catherine Fenselau, Miquel D. Antoine, Daniele Fabris, Yetrib Hathout, Tao He and Joseph Zaia</i>	577
The possible role of metallothionein in cancer therapy by copper acetate <i>Qing Huai, Xingwang Fang, Jilan Wu, Wenqing Wang, Guojian Huang and Shu Zhou</i>	581
Interaction of metallothionein with the carcinogenic metals Ni(II), Cr(VI) and As(III) <i>Dean E. Wilcox, Laura L. Bennett, Elizabeth H. Cox, George Halebian, Brian T. Hill, Eric P. Kowack, Xiaoyan Liu, Jane S. Merkel, Amy E. Palmer, Matthew C. Posewitz, Joann E. Roy and Karen E. Wetterhahn</i>	585
A novel metallothionein gene therapy approach for chemo- and radio-protection <i>Tupur Husain, Asim B. Abdel-Mageed, Alan M. Miller, Laura S. Levy and Krishna C. Agrawal</i>	595

Metallothionein immunostaining as a prognostic indicator in canine mammary tumours <i>I. Carmen Fuentealba and Julia E. Mullins</i>	601
Metallothionein isoform gene expression in four human bladder cancer cell lines <i>Scott H. Garrett, Seema Somji, John H. Todd, Donald A. Sens, Donald L. Lamm and Mary Ann Sens</i>	607
The suppression of metallothionein synthesis inhibits the growth of leukemia P388 cells <i>Atsushi Takeda, Harumi Hisada, Shoji Okada, John E. Mata, Patric L. Iversen and Manuchair Ebadi</i>	613
Metallothioneins as biomarkers	
Identification and characterisation of metallothioneins from environmental indicator species as potential biomonitors <i>Ceri A. Morris, Stephen Stürzenbaum, Beate Nicolaus, A. John Morgan, John L. Harwood and Peter Kille</i>	621
Assessment of metal exposure of marine edible mussels by means of a biomarker <i>Biserka Raspor, Jasenka Pavičić, Sonja Kozar, Željko Kwokal, Marina Paić, Nikša Odžak, Irena Ujević and Zorana Kljaković</i>	629
Metallothionein level estimation in the bioassay method for water quality assessment in freshwater reservoirs polluted by waste waters <i>Dasha A. Avramova, Boris I. Synsynys, Valentina A. Romantsova and Gennady M. Rott</i>	633
Subject index	641
