

TABLE OF CONTENTS

INTRODUCTION

M. A. Arbib and E. G. Manes, Basic concepts of category theory applicable to computation and control	1
B. D. O. Anderson, A control theorist looks at abstract nonsense	35
M. A. Arbib and E. G. Manes, A categorist's view of automata and systems	51

SUBMITTED ABSTRACTS

S. Alagić, Categorical theory of tree processing	65
B. D. O. Anderson, M. A. Arbib and E. G. Manes, Realization of multilinear and multidecomposable machines	73
M. A. Arbib and E. G. Manes, Fuzzy morphisms in automata theory	80
M. A. Arbib and E. G. Manes, Time-varying systems	87
E. S. Bainbridge, Addressed machines and duality	93
J. L. Baker, Factorization of Scott-style automata	99
D. B. Benson, An abstract machine theory for formal language parsers	106
R. W. Brockett and A. S. Willsky, Some structural properties of automata defined on groups	112
L. Budach, Automata in additive categories with applications to stochastic linear automata	119
R. M. Burstall and J. W. Thatcher, The algebraic theory of recursive program schemes	126
L. A. Carlson, Realization is continuously universal	132
H. Ehrig, W. Kühnel and M. Pfender, Diagram characterization of recursion	137
H. Ehrig and H.-J. Kreowski, Power and initial automata in pseudoclosed categories	144
J. A. Goguen, Semantics of computation	151
F. J. Helton and J. W. Helton, Scattering theory and non linear systems	164
H.-J. Hoehnke, Synthesis and complexity of logical systems	170
G. Hotz, Strukturelle Verwandtschaften von semi-Thue-Systemen	174
E. W. Kamen, Control of linear continuous-time systems defined over rings of distributions	180

W. Merzenich, Cellular automata with additive local transition	186
J. Meseguer and I. Sols, Automata in semimodule categories	193
E. T. Onat and J. A. Geary, Representation of a class of nonlinear systems	199
J. Rissanen and B. F. Wyman, Duals of input/output maps	204
M. Wand, An algebraic formulation of the Chomsky hierarchy	209
M. Wand, On the recursive specification of data types	214
B. F. Wyman, Linear systems over rings of operators	218
A. W. Wymore, The tricotyledon theory of system design	224
