Historical Introduction 1

The Era Before James Marion Sims 1

James Marion Sims (1813–1883) and the First Fistula Hospital 22

The Post-Sims Era 65

Fistula Surgeons in the Modern Era 102

The Hamlins of Ethiopia and the Second Fistula Hospital 110

The Incidence, Etiology and Pathology of Obstetric Fistula 120

Incidence 120

Etiology 121

i) Spontaneous Development 121

ii) Fistulae Due to Trauma 127

iii) Social Factors 129

iv) Traditional Genital Tract Injury and Mutilation 131

v) The Influence of Bilharzia 135

vi) Social Consequences of Genital Fistula 136

Pathology of Obstetric Fistula 138

i) Pressure Necrosis 138

ii) Healing Phase 140

iii) Associated Diseases and Conditions 143

Management of Urinary Fistulae 145

Clinical Features 145

i) Classification 145

ii) Symptoms 148

iii) Diagnosis and Investigation	149
Fistulae Involving the Urinary System—Clinical Groups	153
Surgical Correction	153
i) Prophylaxis	153
ii) Difficulties Associated with Urinary Fistulae	155
iii) Methods Available for Surgical Correction	156
Cauterization	156
Vaginal Surgery	156
Abdominal Surgery—the Transvesical Extraperitoneal Approach	157
Transvesical Intraperitoneal Approach	161
Combined Abdomino-Vaginal Approach	165
Colpocleisis	168
Transplantation of Ureters	169
Unorthodox Approaches	170
iv) Choice of Surgical Approach	172
Principles of Vaginal Closure	173
1. Immediate Preoperative Requirements	173
2. Adequate Exposure	174
3. Assessment Under Anesthesia	177
4. Mobilization	177
5. Excision of Scar Tissue	181
6. Care of the Ureters	182
7. Bladder Wall Closure	183
8. Grafting	192
9. Closing the Vaginal Skin	199
10. Vaginal Pack	202
11. Postoperative Management	202
Complications	224
<i>Recto-Vaginal Fistula</i>	229
Introduction	229
Etiology	229
Clinical Features	231
Surgical Correction	232
