O. Kanert and M. Mehring

Static Quadrupole Effects in Disordered Cubic Solids 1

F. Noack

Nuclear Magnetic Relaxation Spectroscopy 83

Contents

I. Introduction	3
II. Fundamentals	4
1. Zero Field Spectra	4
2. High Field Spectra	6
3. Transformation of the Electric Field Gradient Tensor	7
III. The Influence of the Quadrupole Perturbation on the NMR Signal .	8
1. General Theory	8
a) The Free Induction Decay	8
b) The Wide-Line Signal	11
c) The Spin Echo Signal	11
2. Dependence of Signal Parameters on the Mean Quadrupole Distortion	15
3. Effect of an External Axial Stress on the Signal Parameters	19
4. Double Resonance Experiments	22
IV. Field Gradients	30
1. General Theory	30
2. Homogeneous External Stress	32
3. Field Gradients Caused by Stress Fields of Lattice Defects	37
a) Point Defects	37
b) Dislocations	39
c) Dislocation Dipoles and Tilt Boundaries	47
4. Point Charge Effects in Non-Metallic Crystals	48
5. Field Gradients Caused by the Redistribution of Conduction-Electrons around Defects	49
6. Calculations of Gradient-Elastic Constants	53
V. Quadrupole Distribution Functions	55
1. Basic Theory	55
2. Distribution Function of Several Defects	58
a) Point Defects	58
b) Dislocation Dipoles	60
c) Dislocations	62

d) Tilt Boundaries	65
e) Comparison of the Distribution Functions	66
VI. Effect of the Defect Density on the NMR Signal	68
1. Point Defects	68
2. Dislocations	71
VII. Acknowledgments	79
VIII. References	79

Contents

1. Introduction	84
2. Theory of Nuclear Magnetic Relaxation	85
2.1. Phenomenological Concepts	85
2.2. The Two-level Relaxation Model	86
2.3. General Theory of Nuclear Magnetic Relaxation Times	91
2.4. General Theory of Relaxation Functions	114
3. Experimental Techniques and Results of Relaxation Spectroscopy	121
3.1. Description of a Variable Frequency Pulse Spectrometer	121
3.2. Experimental Results and Qualitative Discussion	125
4. Relaxation Spectroscopic Analysis	133
4.1. Computer Techniques	133
4.2. Paramagnetic Solutions	134
4.3. Protein Solutions	137
4.4. Glycerol	138
4.5. Adsorbed Water	139
4.6. Molecular Crystals and Polymeric Systems	139
4.7. Optically and X-ray Irradiated Solids	142
5. References	143
