Nomenclature	10
Abstract	14
Zusammenfassung	15
1 Introduction	16
1.1 Motivation	16
1.2 Research goal and research strategy	17
1.3 Structure of the thesis	18
2 Literature review and theoretical background	19
2.1 Additive manufacturing technology	19
2.2 Powder Bed Fusion (PBF)	22
2.3 Powder Bed Fusion with Laser Beam (PBF-LB)	24
2.4 Steel applied on Powder Bed Fusion with Laser Beam (PBF-LB)	25
2.5 Carbon-bearing work steel applied on Laser Powder Bed Fusion (PBF-LB)	28
3 Experimental procedure	41
3.1 Machine for PBF-LB manufacturing	41
3.2 Powder for PBF-LB process and powder evaluation	43
3.3 Sample preparation and observation	46
3.4 Mechanical properties tests	48
4 Investigation of the feasibility of hot work steel manufactured by PBF-LB and the influence of machine settings	51
4.1 Preheating test	51
4.1.1 Design of the experiments	51
4.1.2 Results of experiments	52
4.1.3 Discussion of the results	56
4.2 Laser interaction test	60

4.2.1	Design of the experiments.....	60
4.2.2	Results of the experiment.....	62
4.2.3	Discussion of results.....	63
4.3	Parameter optimization.....	69
4.3.1	Design of experiment.....	69
4.3.2	Results of experiment.....	70
4.3.3	Discussion of results.....	71
4.4	Conclusion of the chapter.....	73
5	Investigation of the reproducibility of hot work steel manufactured by PBF-LB under machine factors.....	75
5.1	Post-heat treatment.....	75
5.1.1	Design of experiment.....	75
5.1.2	Results of experiments.....	76
5.1.3	Discussion of the results.....	78
5.2	Machine condition.....	80
5.2.1	Design of experiment.....	80
5.2.2	Results of experiment.....	81
5.2.3	Discussion of result.....	82
5.3	Powder sensitivity.....	83
5.3.1	Design of experiments.....	84
5.3.2	Results of experiments.....	86
5.3.3	Discussion of results.....	87
5.4	Conclusion of the chapter.....	91
6	Principle of Defects in PBF-LB process.....	92
6.1	Laser-settings-dependent defects.....	92
6.1.1	Design of experiments.....	92
6.1.2	Results of experiments.....	93
6.1.3	Discussion of the results.....	95

6.2	Material-dependent defects.....	99
6.2.1	Design of experiments.....	99
6.2.2	Result of experiments.....	100
6.2.3	Discussion of results.....	102
6.3	Conclusion of the chapter.....	119
7	Combination with the monitoring system.....	120
7.1	Recognition of various defects under monitoring system.....	123
7.1.1	Design of experiments.....	123
7.1.2	Results of experiments.....	126
7.1.3	Discussion of results.....	128
7.2	Assembly from discrete points into a continuous whole.....	133
7.2.1	Design of experiments.....	135
7.2.2	Results of experiments.....	136
7.2.3	Discussion of result.....	137
7.3	Conclusion of the chapter.....	140
8	Conclusion and Outlook.....	141
9	Appendix.....	143
9.1	Lists of test points in Response Surface during Parameter optimization:.....	143
9.2	Lists of test points in Response Surface to the geometry of melt pool in multi-laser tracks scanning:.....	146
9.3	Lists of test points in Response Surface to real-time monitoring system:.....	147
	List of figures.....	154
	List of tables.....	165
	Reference.....	167
