

Contents

Part 1: Introduction to Object Orientation

1. Introduction To Object Orientation	3
1.1 Introduction	3
1.2 Programming paradigms	3
1.3 Revolution versus evolution	5
1.4 History /pedigree of object oriented languages	6
1.5 Fundamentals of object orientation	7
1.6 The four catechism of object orientation	8
1.7 Encapsulation	9
1.8 Inheritance	10
1.9 Abstraction	13
1.10 Polymorphism	14
1.11 Summary	15
1.12 Further reading	16
2. Elements of Object Orientation	17
2.1 Introduction	17
2.2 Terminology	17
2.3 Types of hierarchies in object orientation	19
2.4 Why bother?	21
2.5 The move to object technology	27
2.6 Summary	27
2.7 Exercises	28
2.8 Further reading	28
3. Constructing an Object Oriented System	29
3.1 Introduction	29
3.2 The application: windscreen wipe simulation	29
3.3 Where do we start?	30
3.4 Identifying the objects	31
3.5 Identifying the services/methods	32
3.6 Refining the objects	33
3.7 Bringing it all together	34
3.8 Summary	38
3.9 Exercises	38
3.10 Further reading	39

Part 2: The Smalltalk Language

4. An Introduction to Smalltalk	43
4.1 Introduction	43
4.2 What is Smalltalk	43

4.3 Objects in Smalltalk	44
4.4 History	45
4.5 The Smalltalk environment	47
4.6 Further reading	54
5. A Little Smalltalk	55
5.1 Introduction	55
5.2 The Workspace	55
5.3 Inspectors	56
5.4 Notifiers	57
5.5 Error processing	58
5.6 Some Smalltalk	59
5.7 Working with Smalltalk	60
5.8 Summary	65
5.9 Further reading	65
6. Smalltalk Building Blocks	66
6.1 Introduction	66
6.2 The basics of the language	66
6.3 Classes	68
6.4 Method definitions	73
7. Smalltalk Constructs	76
7.1 Introduction	76
7.2 Numbers and operators	76
7.3 Characters and strings	77
7.4 Assignments	78
7.5 Variables	80
7.6 Messages and message selectors	81
7.7 Summary	85
7.8 Further reading	85
8. An Example Smalltalk Class	86
8.1 Introduction	86
8.2 The class <i>Person</i>	86
8.3 Defining methods	88
8.4 Creating an instance	91
9. Control and Iteration	92
9.1 Introduction	92
9.2 Cascading	92
9.3 Blocks	93
9.4 Control structures	95
9.5 Summary	99
9.6 Further Reading	99
10. The Collection Classes	100
10.1 Introduction	100

10.2 The Collection class hierarchy	100
10.3 Choosing a Collection class	102
10.4 The Collection class	102
10.5 Bag	104
10.6 Set	105
10.7 OrderedCollection	106
10.8 Stack and queue classes in Smalltalk	107
10.9 Summary	109
10.10 Further reading	110
11. Further Collection Classes	111
11.1 Introduction	111
11.2 SortedCollection	111
11.3 List	112
11.4 Intervals	113
11.5 Array	113
11.6 Multi dimensional arrays	114
11.7 Dictionaries	115
11.8 Strings	116
11.9 Iterating over collections	117
11.10 Inserting into a collection	119
11.11 Conversion	120
12. An Object Oriented Organizer	122
12.1 Introduction	122
12.2 The Organizer	122
12.3 The class definition	122
12.4 The <i>initialize-release</i> protocol	123
12.5 A class side method	124
12.6 The <i>private-updating</i> protocol	125
12.7 The <i>accessing</i> protocol	126
12.8 The Financial Manager project	128
13. Streams and Files	130
13.1 Introduction	130
13.2 Streams	130
13.3 ASCII files	131
13.4 The Binary Object Streaming Service	135
13.5 Using files with the Financial Manager	138
13.6 Summary	139
14. The Magnitude Class Hierarchy	140
14.1 Introduction	140
14.2 The class Magnitude	140
14.3 The class Date	141
14.4 The class Time	142
14.5 The class Character	143
14.6 Further reading	144

15. Some More Tools of the Trade	145
15.1 Introduction	145
15.2 Errors and breakpoints	145
15.3 File in/file outs	147
15.4 Change list	149
15.5 Working with projects	150
15.6 Summary	152

Part 3: Object Oriented Design

16. Object Oriented Analysis and Design	155
16.1 Introduction	155
16.2 The Unified Modeling Language	155
16.3 Object oriented design methods	156
16.4 Object Oriented Analysis	156
16.5 The Booch method	157
16.6 The Object Modeling Technique	158
16.7 The Objectory method	160
16.8 The Fusion method	162
16.9 Summary	163
17. The Unified Modeling Language	164
17.1 Introduction	164
17.2 The UML infrastructure	165
17.3 Use case diagrams	166
17.4 The object model	167
17.5 Packages	174
18. UML: Dynamic Modeling and Deployment	176
18.1 Introduction	176
18.2 Dynamic modeling facilities	176
18.3 Deployment diagrams	183
18.4 Summary	183
19. The Object Modeling Technique	184
19.1 Introduction	184
19.2 The OMT methodology	184
19.3 Analysis phase	185
20. More Object Modeling Technique	196
20.1 Introduction	196
20.2 Dynamic models	196
20.3 Design phase	201
20.4 Implementation phase	206
20.5 Summary	207

21. Frameworks and Patterns for Object Oriented Design	208
21.1 Introduction	208
21.2 Patterns and frameworks	208
21.3 An introduction to HotDraw	213
21.4 Where do you start?	215
21.5 BoxDrawFigure	217
21.6 Summary	220

Part 4: Testing and Style

22. Testing Object Oriented Systems	223
22.1 Introduction	223
22.2 Why is testing object oriented systems hard?	224
22.3 Inheritance	226
22.4 Abstract superclasses	228
22.5 Encapsulation	228
22.6 Polymorphism	231
22.7 Additional Smalltalk specific features	232
22.8 Summary	233
22.9 Further reading	233

23. Method and Class Testing	234
23.1 Introduction	234
23.2 Object integration testing	237
23.3 System testing	238
23.4 Self testing	238
23.5 Summary	239
23.6 Further reading	239

24. Smalltalk Style Guidelines	240
24.1 Introduction	240
24.2 Variables	240
24.3 Classes	243
24.4 Methods	247
24.5 Naming message protocols	250
24.6 Further reading	251

Part 5: Graphical Interfaces in Smalltalk

25. The Perform and Dependency Mechanisms	255
25.1 Introduction	255
25.2 The Perform mechanism	255
25.3 The Dependency mechanism	257
25.4 Summary	265

26. The Model-View-Controller Architecture	266
26.1 Introduction	266
26.2 The MVC architecture principles	266
26.3 The MVC with the statement model	273
26.4 Views and subviews	275
26.5 The controller hierarchy	277
26.6 Summary	278
26.7 Further reading	278
27. Graphical User Interface Construction Tools	279
27.1 Introduction	279
27.2 What is a user interface builder?	279
27.3 VisualWorks window painting tools	280
27.4 Window specification and creation	284
27.5 Application models versus domain models	285
27.6 Defining a window's functionality	286
27.7 Initialization	288
27.8 Resource Finder	289
27.9 ValueHolders	290
27.10 The <i>onChangeSend:to:</i> message	291
27.11 Visual reuse	292
27.12 Method of working with the UI builder	294
27.13 Summary	295
28. A Visual Organizer	296
28.1 Introduction	296
28.2 VisualOrganizer class	297
28.3 The AddressBook class	300
28.4 Summary	305
28.5 The visual Financial Manager application	306
29. Using a View Within a Window	307
29.1 Introduction	307
29.2 The custom view widget	308
29.3 The structure of the application	309
29.4 The interactions between objects	311
29.5 The classes involved	314
29.6 Add a <i>delete widget</i> option	322
29.7 Summary	322
29.8 Further reading	322
Part 6: Further Smalltalk	
30. Memory Management and Garbage Collection	325
30.1 Introduction	325
30.2 Why have automatic memory management?	325
30.3 VisualWorks memory management	326
30.4 Garbage collection and memory compaction	327

30.5 Placing objects in PermSpace	328
31. Concurrency in Smalltalk	330
31.1 Introduction	330
31.2 Concurrent processes	330
31.3 Processes in Smalltalk	331
31.4 A concurrent Smalltalk example	334
31.5 Further reading	338
32. The Metaclass Framework	339
32.1 Introduction	339
32.2 What are classes?	340
32.3 Classes and metaclasses	341
32.4 ClassDescription and Behavior	343
32.5 The metaclass concept goes recursive!	345
32.6 Further reading	348
Part 7: The Future	
33. The Future for Object Technology	351
33.1 Introduction	351
33.2 The Smalltalk language	351
33.3 Object oriented development toolkits	354
33.4 The internet and objects	355
33.5 Object oriented databases	356
33.6 Smalltalk as a training environment	357
33.7 Object technology: the next five years	358
Appendix A: The Smalltalk Language Syntax	359
Bibliography	369
Index	375
