

Table of Contents

Invited Talk

Toward the Concurrent Implementation of Computational Systems	1
<i>Ilies Alouini and Claude Kirchner</i>	

Logic Programming

On Negation as Instantiation	32
<i>Alessandra Di Pierro and Włodzimierz Drabent</i>	
Independence in Dynamically Scheduled Logic Languages	47
<i>María García de la Banda, Manuel Hermenegildo, and Kim Marriott</i>	
Heterogeneous Constraint Solving	62
<i>Frédéric Benhamou</i>	
A Hierarchy of Semantics for Normal Constraint Logic Programs	77
<i>François Fages and Roberta Gori</i>	

Term Rewriting

Order-Sorted Termination: The Unsorted Way	92
<i>Peter Csaba Ölveczky and Olav Lysne</i>	
Unravelings and Ultra-properties	107
<i>Massimo Marchiori</i>	
Standardization Theorem Revisited	122
<i>Taro Suzuki</i>	
Discrete Normalization and Standardization in Deterministic Residual Structures	135
<i>Zurab Khasidashvili and John Glauert</i>	

Integration of Paradigms

A Language for the Logical Specification of Processes and Relations	150
<i>Luis Caires</i>	
A Process Algebra for Synchronous Concurrent Constraint Programming .	165
<i>Luboš Brim, David Gilbert, Jean-Marie Jacquet, and Mojmir Křetínský</i>	
An Algebraic Approach to Mixins and Modularity	179
<i>Davide Ancona and Elena Zucca</i>	
A Strict Border for the Decidability of E-Unification for Recursive Functions	194
<i>Heinz Faßbender and Sebastian Maneth</i>	

Abstract Interpretation

Prime Factorizations of Abstract Domains Using First Order Logic	209
<i>Elena Marchiori</i>	
Abstractions of Uniform Proofs	224
<i>Paolo Volpe</i>	
Complementing Logic Program Semantics	238
<i>Roberto Giacobazzi and Francesco Ranzato</i>	

Lambda-Calculus and Rewriting

Meaningless Terms in Rewriting	254
<i>Richard Kennaway, Vincent van Oostrom, and Fer-Jan de Vries</i>	
Unique Normal Form Property of Higher-Order Rewriting Systems	269
<i>Ken Mano and Mizuhito Ogawa</i>	
λ -Calculi with Explicit Substitutions and Composition which Preserve β -strong Normalization (Extended Abstract)	284
<i>Maria C.F. Ferreira, Delia Kesner, and Laurence Puel</i>	

Types

Algebraic Semantics for Functional Logic Programming with Polymorphic Order-Sorted Types	299
<i>Jesús M. Almendros-Jiménez, Antonio Gavilanes-Franco, and Ana Gil-Luezas</i>	
Specifying Type Systems	314
<i>Dieter Nazareth</i>	
The Semantic Treatment of Polymorphic Specification Languages	330
<i>Dieter Nazareth</i>	

Author Index	345
