

Table of Contents

1 Introduction to Learning Systems.....	1
1.1 Systems, Memory.....	1
1.2 Performance Index.....	3
1.2.1 Random Input.....	4
1.2.2 Deterministic Input.....	6
1.3 Learning Algorithms.....	6
1.4 Some Examples of Learning Systems.....	8
1.4.1 The Learning Linear Combiner.....	8
1.4.2 Neurons of Higher Order.....	8
1.4.3 The Learning Non-Linear Transformer.....	9
1.4.4 Linear and Non-Linear Learning Filters.....	10
1.4.5 Learning control systems.....	11
1.4.6 The Learning Multilayer Neural Network.....	12
1.4.7 Learning CMAC.....	13
References.....	15
2 Deterministic Algorithms.....	16
2.1 Simple Projection Algorithms in Spaces With Different Norms (Structure, Convergence, Properties).....	16
2.1.1 Construction Of Kaczmarz Algorithm.....	17
2.1.2 Convergence.....	22
2.2 Modified Projection Algorithms With a High Rate of Convergence.....	25
2.2.1 Construction.....	25
2.2.2 Transient Mode.....	28
2.2.3 Properties Of The Estimates.....	29
2.2.4 "Bad" Measurements.....	29
References.....	30
Appendix.....	31
3 Deterministic and Stochastic Algorithms of Optimisation.....	40
3.1 Deterministic Methods for Unconstrained Minimisation.....	40
3.1.1 The Gradient Algorithm.....	40
3.1.2 Convergence.....	41

3.1.3 Newton's Algorithm	42
3.1.4 Example Application.....	43
3.2 Stochastic Approximation and Recurrent Estimation.....	45
3.2.1 Random Input	45
3.2.2 Example System.....	48
References	49
4 Stochastic Algorithms: The Least Squares Method in the Non-Recurrent and Recurrent Forms and the Gauss-Markov Theorem.....	50
4.1 The Least Squares Method in Recursive and Non-Recursive Forms (The White Noise Case).....	50
4.1.1 The Least Squares Method in Non-Recursive Form	50
4.1.2 A Priori Information.....	51
4.2 The Gauss-Markov Theorem.....	54
4.2.1 Optimal Estimates.....	54
4.2.2 Connection With the Maximum Likelihood Estimates [2]	59
4.3 Example System.....	60
References	61
5 Stochastic Algorithms.....	62
5.1 Algorithms With Forgetting Factor	62
5.2 The Least Squares Method by Correlated Noise in the Non-Recursive and Recursive Forms: Connection With Decorrelation Procedures	65
5.2.1 The Arbitrary Case.....	65
5.2.2 Special Case	68
5.3 Introduction to the Kalman filter [1], [3].....	69
References	71
6 Multilayer Neural Networks.....	72
6.1 Multilayer Neural Network as a Non-Linear Transformer. The Kolmogorov and Cybenko Theorems.	72
6.1.1 Introduction	72
6.1.2 MNN Architecture	73
6.1.3 The Input-Output Mapping of a Multilayer Network of the First Order	75
6.1.4 Approximation.....	76
6.2 Learning Algorithms for Single Elements of Multilayer Neural Networks	78
6.2.1 Differentiable Activation Functions	79
6.2.2 Non-Differentiable Activation Functions	81
References	86
7 Learning Algorithms for Neural Networks.....	88
7.1 The Back-Propagation Algorithm for MNN Learning	88

7.1.1 Main Equations	88
7.1.2 Fully Connected MNNs	91
7.1.3 The Transient Sensitivity Matrix $D^{(i+1)}$ for Fully Connected MNNs of the First Order	93
7.1.4 The Transient Sensitivity Matrix $D^{(i+1)}$ for Fully Connected MNNs of the Second Order	94
7.1.5 Non-Fully Connected MNNs	96
7.2 Autonomous Algorithms for Adjusting MNNs	97
7.2.1 Introduction	97
7.2.2 Neural Networks With a Single Output	97
7.2.3 Neural Network With Many Outputs	99
References	100
 8 Identification and Control of Dynamic Systems Using Multilayer Neural Networks	101
8.1 Identification of Dynamic Systems Using Multilayer Neural Networks	101
8.1.1. Linear Systems	101
8.1.2 Non-Linear Systems	102
8.1.3 The Structure of MNNs for Identification	103
8.2 Control of Dynamic Systems Using Multilayer Neural Networks	105
8.2.1 Linear Systems	106
8.3 Control of Non-Linear Dynamic Systems Using Multilayer Neural Networks	107
8.3.1 Example use of Neural Networks for MRAC	108
References	109
 9 The Cerebellar Model Articulation Controller (CMAC)	110
9.1 Introduction to CMAC	110
9.1.1 Introduction	110
9.2 Data Storage and Learning Process in the CMAC	111
9.2.1 Introduction to the CMAC	111
9.2.2 The CMAC system	112
9.3 Albus' Learning Algorithm	113
9.4 Modified Albus' Algorithm	114
9.4.1 Modification	114
9.4.2 Special Features of the Modified Albus Algorithm	117
9.5 CMAC for Identification and Adaptive Control	118
References	118
 Index	120
