1	Introduction	3
2	Rational matrices and vector spaces	14
2.1	Algebraic preliminaries	14
2.2	Euclidean domains of rational functions	16
2.3	Pole/zero structure of a rational matrix	17
2.4	Wiener-Hopf structure of a rational matrix	23
2.5	Minimal basis of a rational vector space	29
2.6	Preliminary results for matrix pencils	32
3	Representations of linear time-invariant systems	40
3.1	Dynamical systems	40
3.2	AR representations	44
3.3	ARMA representations	49
3.4	First-order representations	56
3.5	Systems with split external variables	58
3.5.1	Relation $(F, G, H_y, H_u) \leftrightarrow (E, A, B, C, D)$	60
3.5.2	Relation $(F, G, H_y, H_u) \leftrightarrow (E, A, B, C)$	65
3.5.3	Relation $(E, A, B, C, D) \leftrightarrow (E, A, B, C)$	67
4	Minimality and transformation groups	71
4.1	Minimality of a P representation	71
4.1.1	Results under strong external equivalence	72
4.1.2	Results under weak external equivalence	78
4.2	Minimality of a D representation	79
4.2.1	Results under strong external equivalence	80
4.2.2	Results under weak external equivalence	87
4.3	Minimality of a DZ representation	90
4.3.1	Results under strong external equivalence	90
4.3.2	Results under weak external equivalence	93
4.4	Minimality of a DP representation	94
4.4.1	Results under strong external equivalence	95
4.4.2	Results under weak external equivalence	95
4.5	Transformation groups	96

4.5.1	Results for minimal P representations	97
4.5.2	Results for minimal D representations	100
4.5.3	Results for minimal DZ representations	103
4.5.4	Results for minimal DP representations	104
5	Realization in minimal first-order form	106
5.1	Realization in pencil form: the abstract procedure	108
5.2	The pencil realization in terms of a discrete-time behavior .	111
5.3	Choosing bases	116
5.3.1	Realization in dual pencil form	127
5.3.2	Realization in descriptor form	131
5.4	Connections with the Fuhrmann realization	138
6	Structural invariants	144
6.1	Observability indices	144
6.1.1	Results for P representations	145
6.1.2	Results for DP representations	149
6.1.3	Results for D representations	151
6.2	Controllability indices	153
6.2.1	Results for DP representations and P representations	156
6.2.2	Results for D representations	160
6.3	The input-output structure	162
6.3.1	Results for P representations	167
6.3.2	Results for DP representations	177
6.3.3	Results for D representations	179
7	Conclusions	186
	Bibliography	188
	Index	195
