Hans Lewy: A Brief Biographical Sketch

D. Kinderlehrer xvii

[30]	A note on harmonic functions and a hydrodynamical application	1
[31]	A theory of terminals and the reflection laws of partial differential equations	4
[32]	Asymptotic developments at the confluence of boundary conditions	28
[33]	(with P. R. Garabedian and M. Schiffer) Axially symmetric cavitation flow	30
[34]	On steady free surface flow in a gravity field	73
[34A]	An introduction to Riemann's Work	75
[35]	Extension of Huyghen's principle to the ultrahyperbolic equation	82
[36]	On the local character of the solutions of an atypical linear differential equation in three variables and a related theorem for regular functions of two complex variables	85
[37]	On the relations governing the boundary values of analytic functions of two complex variables	94
[38]	An example of a smooth linear partial differential equation without solution	97
[39]	On linear difference-differential equations with constant coefficients	101
[40]	Composition of solutions of linear partial differential equations in two independent variables	118
[41]	On the reflection laws of second order differential equations in two independent variables	126
[42]	On hulls of holomorphy	148
[43]	Atypical partial differential equations	153
[44]	(with R. S. Lehman) Uniqueness of water waves on a sloping beach	44
[47]	On the definiteness of quadratic forms which obey conditions of symmetry	184
[48]	On the extension of harmonic functions in three variables	199
[49]	The wave equation as limit of hyperbolic equations of higher order	202
[50]	Sulla riflessione delle funzioni armoniche di 3 variabili	214
[51]	On a variational problem with inequalities on the boundary	216
[52]	On the nonvanishing of the jacobian of a homeomorphism by harmonic gradients ..	240
[53]	About the Hessian of a spherical harmonic	252
[54]	(with Guido Stampacchia) On the regularity of the solution of a variational inequality	255
[55]	On a minimum problem for superharmonic functions	291

[56] On a refinement of Evans' law in potential theory	293
[57] On the partial regularity of certain superharmonics	302
[58] (with Guido Stampacchia) On the smoothness of superharmonics which solve a minimum problem	305
[60] (with Guido Stampacchia) On existence and smoothness of solutions of some non-coercive variational inequalities	315
[61] On the coincidence set in variational inequalities	328
[62] On the nature of the boundary separating two domains with different regimes	333
[63] On analyticity in homogeneous first order partial differential equations	341
[64] On the boundary behavior of holomorphic mappings	346
[65] On the minimum number of domains in which the nodal lines of spherical harmonics divide the sphere	353
[67] An inversion of the obstacle problem and its explicit solution	365
[68] Expansion of solutions of t'Hooft's equation. A study in the confluence of analytic boundary conditions	376
[69] On conjugate solutions of certain partial differential equations	387
[70] Über die Darstellung ebener Kurven mit Doppelpunkten	392
[71] (with Tang Zhiyuan) On free boundary problems in two dimensions	414
[72] (with U. Dierkes and S. Hildebrandt) On the analyticity of minimal surfaces at movable boundaries of prescribed length	426
[73] On atypical variational problems	441
