Preface	IX
----------------------	-----------

Mechanisms of oxidative stress

Chemistry of dioxygen and its activated species <i>J.-L. Pierre</i>	1
Biological sources of reduced oxygen species <i>V. Nivière and M. Fontecave</i>	11
Nitric oxide: Chemistry and biology <i>C. Garrel and M. Fontecave</i>	21
Pro-oxidant and antioxidant effects of nitric oxide <i>N. Hogg</i>	37
Oxidative damage to DNA <i>J. Cadet, M. Berger, B. Morin, S. Raoul and J.R. Wagner</i>	51
Oxidation of low density lipoprotein (LDL) by cells <i>S. Parthasarathy</i>	65

Oxidative stress in clinical situation

Free radicals and antioxidants in human diseases <i>J. Pincemail</i>	83
How to demonstrate the occurrence of an oxidative stress in human? <i>A.E. Favier</i>	99

New developments in ESP and spin-trapping

EPR evidence of generation of superoxide anion radicals ($O_2^{\cdot -}$) by irradiation of a PDT photosensitizer: Hypericin <i>C. Hadjur and A. Jeunet</i>	119
--	-----

Nitrone spin traps as reagents for the study of oxidative modification of low density lipoproteins: Implications for atherosclerosis <i>C.E. Thomas</i>	127
--	-----

Ascorbate radical: A valuable marker of oxidative stress <i>G.R. Buettner and B.A. Jurkiewicz</i>	145
--	-----

Determination of lipid peroxidation-derived products

Lipid hydroperoxide analysis by reverse-phase high-performance liquid chromatography with mercury cathode electrochemical detection <i>W. Korytowski and A.W. Girotti</i>	165
--	-----

Determination of primary and secondary lipid peroxidation products: Plasma lipid hydroperoxides and thiobarbituric acid reactive substances <i>C. Coudray, M.J. Richard and A.E. Favier</i>	185
--	-----

Measurement of low-density lipoprotein oxidation <i>I. Hininger, A. David, F. Laporte, A.-M. Roussel, T. Foulon, P. Groslambert and A. Hadjian</i>	201
---	-----

Evaluation of DNA damages

Determination of 8-oxo-purines in DNA by HPLC using amperometric detection <i>T. Douki, M. Berger, S. Raoul, J.-L. Ravanat and J. Cadet</i>	213
--	-----

Measurement of one of the features of apoptosis: DNA fragmentation <i>J. Mathieu, S. Ferlat, D. Ferrand, S. Platel, B. Ballester, J.C. Mestries, Y. Chancerelle and J.F. Kergonou</i>	225
--	-----

Measurement of plasma sulfhydryl and carbonyl groups as a possible indicator of protein oxidation <i>P. Faure and J.-L. Lafond</i>	237
---	-----

Measurement of oxidized nucleobases and nucleosides in human urine by using a GC/MS assay in the selective ion monitoring mode <i>M.-F. Incardona, F. Bianchini, A.E. Favier and J. Cadet</i>	249
--	-----

Miscellaneous techniques

Methodological and practical aspects for <i>in vitro</i> studies of oxidative stress on cell culture models (toxicity and protection) <i>M.J. Richard and P. Guiraud</i>	261
Detection and production of nitric oxide <i>C. Garrel, J.-L. Decout and M. Fontecave</i>	277
Salicylate hydroxylation products assay as a marker of oxidative stress in man: A sensitive HPLC-electrochemical method <i>C. Coudray, M. Talla, S. Martin, M. Fatôme and A.E. Favier</i>	291
Subject index	309
