9	Temporary Balloon Buckle without Drainage: Minimal Extraocular Surgery for Retinal Detachments with 1 Break or Breaks within 1 Clock Hour	1
9.1	Introduction	2
9.2	History	2
9.3	Principle of the Balloon Procedure	5
9.4	Instrumentation and Surgical Technique	9
9.5	Practical Tips when Starting with the Balloon Procedure	19
9.6	Indications	25
9.6.1	Small Detachment	25
9.6.2	2-Quadrant Detachment	31
9.6.3	3-Quadrant Detachment	34
9.6.4	Total Detachment in a Pseudophakic Eye	36
9.6.5	Detachment with a Break beneath a Muscle	40
9.6.6	Old Detachment	43
9.6.7	As Diagnostic Probe to Detect the Break or to Exclude the Presence of Another Break: Examples 1 to 6	47
9.6.8	To Rescue a Failing Buckle	71
9.6.9	As Late Reoperation	76
9.6.10	Staphylomatous Sclera	83
9.6.11	Detachment in a Glaucomatous Eye	85
9.6.12	Balloon-Aided Vessel-Occlusion Technique	85
9.6.13	Basic Balloon-Gas Procedure: Creating Space for an Intraocular Gas Injection	90
9.7	Results	92
9.7.1	Anatomical Results	92
9.7.1.1	First Clinical Study	92
9.7.1.2	Second Clinical Study	94
9.7.2	Functional Results	99
9.7.3	Complications	100
9.7.4	Conclusion	101
	References	104
10	Temporary Gas Tamponades without Drainage: Minimal Intraocular Surgery for Retinal Detachments	109
10.1	History	110
10.2	Sulfur Hexafluoride (SF ₆)	114
10.2.1	History	114

10.2.2	Clinical Study with Expanding-Gas Operation without Drainage	118
10.2.3	Conclusion	120
10.3	The Perfluorocarbon Gases	121
10.3.1	The Cyclo-Perfluorocarbon Gas	121
10.3.2	The Straight-Chain Perfluorocarbon Gases	122
10.3.2.1	Physical Properties	122
10.3.2.2	Complications	134
10.3.2.3	Conclusion	146
10.4	Instrumentation and Surgical Technique	148
10.4.1	Preoperative Phase	148
10.4.2	Intraoperative Phase	150
10.4.3	Postoperative Phase	157
10.5	Balloon-Gas Procedures: Basic Procedure and Extended Procedure	159
10.5.1	History	159
10.5.2	Principle of the Balloon-Gas Procedures	162
10.5.3	Instrumentation	163
10.5.4	Surgical Technique	164
10.6	Application of Expanding Gases	167
10.6.1	Large Tears and Giant Tears	167
10.6.1.1	Large Tears	170
10.6.1.2	Giant Tears and Various Gas Techniques	174
10.6.1.2.1	Lateral Giant Tear	174
10.6.1.2.2	Lateral Giant Tear with Additional Horseshoe Tears	177
10.6.1.2.3	Rolling Gas Bubble Technique	184
10.6.1.2.4	Superior Giant Tear with a Flap Overhanging the Disk	186
10.6.1.2.5	Small Gas Bubble Technique	187
10.6.1.2.6	Backward Rotation around a Small Gas Bubble	191
10.6.1.2.7	Superior Giant Tear with a Flap Overhanging the Disk and Additional Horseshoe Tears	196
10.6.1.2.8	Superior Lateral Giant Tear with Detached Horseshoe Tears and Moderate Vitreous Hemorrhage	200
10.6.1.2.9	Superior Giant Tear Posterior to Equator with Rolled-Over Posterior Flap and Detached Horseshoe Tears	204
10.6.1.2.10	Giant Tear of 350° with an Inferior Rolled-Over Posterior Flap	208
10.6.1.2.11	Forward Rotation around a Small Gas Bubble	170
10.6.2	Group of Breaks at Different Latitude	212
10.6.2.1	Group of Breaks and Posterior Hole	214

10.6.2.2	Group of Anterior and Posterior Holes Extending over 1 Quadrant	218
10.6.2.3	Conclusion	220
10.6.3	Posterior Holes	221
10.6.3.1	Fundamentals for the Gas Technique	221
10.6.3.2	Examples	228
10.6.3.3	Conclusion	170
10.6.4	Diagnostic Gas Bubble and Gas-Exchange Techniques	232
10.6.4.1	Rationale of Diagnostic Gas Bubble Technique	232
10.6.4.2	Clinical Application	235
10.6.4.3	Gas-Exchange Techniques	239
10.6.4.4	Conclusion	239
10.6.5	Clinical Study	240
10.6.5.1	Patients and Expanding-Gas Operation	241
10.6.5.2	Results	243
10.6.5.3	Complications	246
10.6.5.4	Conclusion	247
10.6.5.5	Reasons for Failure in Giant Tears	247
10.6.5.6	Conclusion	255
10.7	Pneumatic Retinopexy	256
10.8	Retrohyaloidal Gas Injection	258
10.8.1	Introduction	258
10.8.2	Technique	259
10.8.3	Patients and Results	262
10.8.4	Conclusion	263
10.9	Xenon Gas	265
10.9.1	Introduction	265
10.9.2	Clinical Study	266
10.9.3	Applications	267
10.9.4	Conclusion	267
	References	268
11	Balloon Buckle versus Pneumatic Retinopexy for Uncomplicated Retinal Detachments	271
11.1	Introduction	272
11.2	Differences between Balloon Operation and Pneumatic Retinopexy	273
11.2.1	Application	273
11.2.2	Surgical Technique	273
11.2.3	Postoperative Management	273
11.3	Clinical Studies	275
11.3.1	Results	276
11.3.2	Complications	277

11.4	Conclusion	280
11.5	Summary	285
