Chapter 1 Cell Biology, Embryology and the Placenta	1
The Cell	1
The Genetic Code	4
Chromosome Abnormalities	11
Genetics – Single and Multiple Gene Defects	15
Fertilisation	16
Cleavage of the Embryo: The Morula and the Blastocyst ..	18
Implantation of the Blastocyst and Early Development of the Placenta and Embryo	19
Multiple Pregnancy	23
Further Development of the Embryo	24
The Placenta	25
Placental Sythesis	29
Placental Transfer	31
The Membranes	35
Amniotic Fluid (Liquor)	36
Chapter 2 Anatomy	37
Vulva	37
Vagina	39
Uterus	40
Fallopian Tubes	44
Ovaries	45
Female Urological System	46
Levator Ani Muscles (Pelvic Diaphragm)	48
Perineum	49
Peritoneum and Ligaments of the Pelvis	52
Blood Supply to the Female Pelvis	53
Lymphatic Drainage of the Female Pelvis	53
Nerve Supply to the Female Pelvis	53
Pelvic Skeleton	55

Fetal Skull	59
Microstructure and Function of the Non-pregnant Reproductive Tract	60
Embryology of the Genital System	63
Anterior Abdominal Wall	66
Chapter 3 General Physiology and Biochemistry	69
Cardiovascular System	69
Lung	75
Acid-Base Balance	78
Kidney	80
Nervous System	80
Gut and Nutrition	81
Metabolism	83
Immunology	88
Chapter 4 Endocrinology	95
Basic Concepts in Endocrinology	95
Hypothalamus	96
Anterior Pituitary	99
Posterior Pituitary	104
Breast and Lactation	105
Sex Steroids	107
Ovary	112
Testis	116
Thyroid Gland	119
Adrenal Cortex	123
Adrenal Medulla	125
Hormones Involved in Calcium Homeostasis	127
Puberty	128
Menopause	128
Initiation of Labour	129
Pineal Gland	130
Atrial Natriuretic Peptide (ANP)	130
Chapter 5 Pathology	131
Inflammation	131
Wound Healing	134
Metabolic Response to Injury	136
Shock	137
Tumours	138
Thrombosis and Embolism	147
Deposition of Salts and Pigments	150
Effects of Radiation	151
Chapter 6 Microbiology	153
Bacteria	153
Viruses	157

Rickettsial Organisms	161
Mycoplasmas (Pleuropneumonia-like Organisms)	162
Fungal Infections	162
Protozoal Infections	162
Some Characteristics of Infections at Special Sites	163
Chapter 7 Pharmacology	165
Sedative, Hypnotic and Anxiolytic Agents	165
Antipsychotic Agents	165
Antidepressive Agents	166
Analgesics	167
Antacids	168
Laxatives	168
Anti-emetics	169
Antihistamines	169
Diuretics	169
Antihypertensive Agents	169
Drugs Affecting Blood Coagulation	170
Drugs Used for Treatment of Osteoporosis	172
Chemotherapy of Infection	173
Pharmacology of Sex Steroids	177
Drugs Affecting Contraction of the Uterus	181
Anticancer Drugs (Cytotoxic Agents)	184
General Anaesthetic Agents	186
Local Anaesthetic Agents	186
Drugs of Abuse	187
General Aspects of Pharmacology in Pregnancy	188
General Aspects of Pharmacology During Breast Feeding	189
Appendix A Statistics	191
Appendix B Ultrasound	193
Index	195
