

Table of Contents

1 Anatomical Aspects and Biomechanical Considerations for the Body of the Mandible, the Midface, and the Cranium	1	Mandible Combined	
<i>Maxime Champy and Patrick Blez</i>		Intraoral-Transbuccal Approach	24
Anatomical Considerations	1	Mandible Extraoral Submandibular Approach ..	25
The Mandible	1	Mid and Upper Face	29
The Midface and the Cranial Bones	2	Maxilla Intraoral Vestibular and Marginal	
Biomechanical Principles	3	Rim Approach	29
Goals	3	Lower Eyelid Approach	29
Masticatory Stress Distribution in the		Upper Lid Blepharoplasty Approach	29
Mandible	4	Brow Approach	30
Definition of an Ideal Osteosynthesis Line on		Coronal Approach	30
the Mandible	5	6 Materials and Instrumentation	32
Other Therapeutic Applications	5	<i>Leen M. de Zeeuw and Oliver Scheunemann</i>	
Biomechanics and Principles of Surgical		Introduction	32
Repair in the Midface and Cranium by		Materials	32
Microplates or Miniplates (Traumatology		Osteosynthesis Technique and	
and Deformities)	6	Equipment	32
2 Biomechanics of Fractures of the Condylar Region and Principles of Repair	8	Screws	33
<i>Christophe Meyer</i>		Plates	33
3 Sublingual Hematoma: Pathognomic of Fracture of the Mandible	10	Locking Systems	34
<i>Ingo N. Springer and Franz Haerle</i>		7 Mandibular Fractures Including Atrophied	
4 Bone Repair and Fracture Healing	12	Mandible	35
<i>Franz Haerle</i>		<i>Hans-Dieter Pape, Klaus Louis Gerlach, and</i>	
Structure of Facial Bone	12	<i>Maxime Champy</i>	
Fracture Healing	13	Introduction	35
Indirect Bone Healing (Secondary Osseous and		Technique	35
Soft-Tissue Healing)	13	Time of Treatment	35
Direct Bone Healing (Primary Osseous		Anesthesia	35
Healing)	14	Re-establishment of Occlusion	35
Pseudoarthrosis	17	Gingiva Incision	36
Cranio-maxillofacial Bone Healing	18	Miniplate Choice	36
5 Surgical Approaches	19	Miniplate Osteosynthesis	36
<i>Franz Haerle</i>		Different Areas Require	
Biomechanical Principles	19	Special Measures	37
Extraoral Incision	20	The Interforaminal Area	37
Intraoral Incisions	20	The Canine and Premolar Area	38
Mandible	23	The Molar Area and the Angle of the Mandible	38
Mandible Intraoral Vestibular Approach	23	The Ramus	40
Mandible Intraoral Marginal Rim Incision	24	Multiple Fractures	40
		Medicinal Therapy	40
		Postoperative Care	40
		Special Fracture Situations	40
		Mandible Fractures in Children	40
		The Edentulous Atrophied Mandible	41
		Defect and Comminuted Fractures	42
		Teeth in the Fracture Line	42

8 Hooks for Intermaxillary Immobilization	44	Osteosynthesis Technique	71
<i>Hendrik Terheyden</i>		Complications	73
Introduction	44		
Immobilization by Wiring	44	14 Condylar Neck Fracture Miniplates: Intraoral Approach	74
Immobilization Using Hooks	44	<i>Klaus Louis Gerlach and Steffen Mokros</i>	
Miniscrew Hooks	44	Introduction	74
Ligatures	44	Surgical Approach	74
		Technique	75
9 Principles of Application of Lag Screws	46	Advantages of Technique	77
<i>Franz Haerle</i>			
Introduction	46	15 Condylar Neck Fractures: Delta-Shaped Plate and Endoscopic Approach	78
Toulouse Mini Lag Screw	46	<i>Guenther Lauer</i>	
Cortical Lag Screw	46	Introduction	78
True Lag Screw	48	Surgical Approach	78
Position Screw	50	Technique	79
Indications for Lag Screw Osteosynthesis	50		
Conclusion	52	16 Condylar Neck Fractures: Lag Screw Plates	85
		<i>Juergen Reuther</i>	
10 Guided Lag Screw Technique in Mandibular Fractures	53	Introduction	85
<i>Gregory C. Chotkowski</i>		Technique	85
Introduction	53		
The Surgical Technique	54	17 Osteosynthesis of Condylar Head Fractures by Retroauricular Approach	88
Stabilization of the Occlusion	54	<i>Andreas Neff</i>	
Surgical Approach	54	The Retroauricular Approach	88
Reduction	54	Osteosynthesis of Condylar Head Fractures	88
General Fixation Technique	55		
Specific Applications of the Guided Lag Screw Fixation Technique	55	18 Condylar Head Fractures: Screw and Pin Fixation	93
Complications	57	<i>Michael Rasse</i>	
		Auricular Approach	93
11 Condylar Base and Neck Fractures: What is to be Done?	58	Osteosynthesis	93
<i>Franz Haerle, Uwe Eckelt, Klaus Louis Gerlach, Guenter Lauer, Tateyuki Iizuka, Andreas Neff, Michael Rasse, Christian Krenkel, Juergen Reuther, and Christophe Meyer</i>			
		19 Midface Fractures	95
12 Condylar Neck Fractures: Lag Screws	60	<i>Klaus Louis Gerlach and Hans-Dieter Pape</i>	
<i>Uwe Eckelt</i>		Introduction	95
Introduction	60	Technique	95
Indication	60	Fractures of the Zygoma	95
Instruments	60	Le Fort I Fractures	96
Surgical Technique	62	Le Fort II Fractures	97
Removal of Osteosynthesis Material	65	Le Fort III Fractures	97
13 Condylar Neck Fracture Miniplates: Extraoral Approach	67	20 Naso-ethmoid Fractures	99
<i>Tateyuki Iizuka and Christian Lindqvist</i>		<i>Peter Ward Booth</i>	
Introduction	67	Introduction	99
Indication	67	Anatomical Considerations	99
Surgical Approaches	68	Clinical Examination	99
Surgical Technique	68	Radiological Examination	101
The Preauricular Approach	68	Treatment	101
The Retromandibular Approach	69	Surgical Exposure	101
Rhytidectomy, Face-lift Approach	70	Reduction and Stabilization	101
		Bone Grafting	102
		Detached Canthus	102

21 Panfacial Fractures: Planning an Organized Treatment	104
<i>Rudolf R. M. Bos</i>	
Introduction	104
Diagnosis	104
Treatment Planning	105
Conclusion	108
22 Osteotomies of the Mandible	109
<i>Paul J. W. Stoelinga</i>	
Sagittal Split Osteotomy	109
Introduction	109
Technique	109
Vertical Ramus Osteotomy	110
Introduction	110
Technique	111
Body (Step) Osteotomies	112
Introduction	112
Technique	113
Anterior Subapical Segmental Osteotomy	113
Introduction	113
Technique	114
Genioplasties and Midline Symphyseal Osteotomies	114
Introduction	114
Technique	114
23 Osteotomies of the Maxilla	116
<i>Paul J. W. Stoelinga</i>	
Anterior Maxillary Segmental Osteotomy	116
Introduction	116
Technique	116
Posterior Maxillary Segmental Osteotomy	116
Introduction	116
Technique	116
Le Fort I Osteotomy	117
Introduction	117
Technique	117
Quadrangular Osteotomy	117
Introduction	117
Technique	118
Le Fort II Osteotomy	119
Introduction	119
Technique	119
Le Fort III Osteotomy	120
Introduction	120
Technique	120
Osteotomies in Cleft Lip and Palate Patients	120
Introduction	121
Technique	121
24 Orthognathic Surgery Distance Screws	124
<i>Konrad Wangerin and Henning Gropp</i>	
Introduction	124
Technique	124
Clinical Diagnosis	124
Radiographic Diagnosis	124
Model Diagnosis	124
Planning	124
Simulation	124
Surgery	125
Skeletal Stability	126
25 The Adjustable Miniplate for Sagittal Split Ramus Osteotomy	129
<i>Ulrich Joos</i>	
Introduction	129
Method	129
Technique	130
26 Craniofacial Surgery	131
<i>Hermann F. Sailer</i>	
Hypertelorism	131
Correction of Craniosynostosis	132
Occipital Corrections	134
High Midface Osteotomies	134
Segmented Frontofacial Advancement Including Le Fort III Plus Le Fort I Osteotomy in Two Parts	135
27 Application of Resorbable Plates, Screws and Pins for the Treatment of Midface and Condylar Neck Fractures, and Correction of Craniosynostoses	137
<i>Klaus Louis Gerlach and Uwe Eckelt</i>	
Introduction	137
Resorb-X	137
Principles of Osteosynthesis	138
Midface Fractures	139
Condylar Neck Fractures	139
Craniosynostoses	141
28 Drill-free Screws	142
<i>Klaus Louis Gerlach and Wolfgang Heidemann</i>	
Introduction	142
Technique	142
29 Reconstructive Preprosthetic Surgery and Implantology	144
<i>John I. Cawood</i>	
Introduction	144
Anatomical Consequences of Jaw Atrophy	144
Interarch Changes	144
Muscle Changes	146
Mucosal Changes	146
Facial Changes	146
Pre-implant Surgery	146
Atrophic Maxilla	151
Class IV Maxilla	151
Anterior Maxillary Osteoplasty to Broaden the Narrow Maxillary Ridge	152
Class V Maxilla	156

Class VI Maxilla	156	Distraction in Orthognathic Surgery	181
Atrophic Mandible	158	Mandibular Retrognathia	181
Class II and Class III Mandible	158	Maxillary Retrognathia	184
Class IV Mandible	159	Transversal Mandibular Deficiency	186
Class V Mandible	159	Transversal Maxillary Deficiency	188
Class VI Mandible	159	Combinations	189
Oral Rehabilitation	159	Conclusion	189
30 Bone Graft and Membrane Stabilization in Implantology	160	36 Microsurgical Anastomosis of the Fibula Bone ..	191
<i>Franz Haerle and Hendrik Terheyden</i>		<i>Friedrich W. Neukam, Rainer Schmelzeisen, and Emeka Nkenke</i>	
Introduction	160	Introduction	191
Technique	160	Anatomical Considerations	191
31 Alveolar Bone Distraction	162	Preoperative Diagnostics for Graft Shaping	192
<i>Johannes Hidding and Joachim E. Zoeller</i>		Technique	192
Introduction	162	Graft Fixation	193
Technique	162	37 Microsurgical Anastomosis of the Scapula Bone ..	196
Clinical Aspects	164	<i>Rainer Schmelzeisen and Friedrich W. Neukam</i>	
Complications	164	Introduction	196
Conclusion	164	Anatomical Considerations	196
32 Mandible Alveolar Bone Reconstruction by Endodistraction	166	Harvesting	196
<i>Christian Krenkel</i>		Indications	196
Introduction	166	Mandibular Reconstruction	197
Materials and Method	166	Reconstruction of the Maxilla and Midface	198
Indications	168	Conclusion	201
Discussion	168	38 Titanium Plate Removal: Yes or No?	202
Summary	169	<i>Hendrik Terheyden and Maxime Champy</i>	
33 Mesh Fixation of Bone	170	Introduction	202
<i>Bodo Hoffmeister</i>		Corrosion and Metal Release from Titanium	
Introduction	170	Plates	202
Indications	171	Toxicity and Accumulation in the Body	202
Traumatology	171	Inflammatory Response	203
Orthognathic Surgery	172	Sensitivity to Titanium	203
Surgical Applications	172	Carcinogenity	204
Conclusion	173	Infection	204
34 Mandibular Reconstruction with Free, Nonvascularized Bone Grafts	174	Diagnostic and Therapeutic Radiation Scattering	204
<i>Hans-Dieter Pape and Klaus Louis Gerlach</i>		Stress Shielding	204
Introduction	174	Conclusion and Ethical Considerations	204
Technique	174	39 Complications: Causes and Management.	205
35 Intraoral Distraction Osteogenesis of the Mandible and the Maxilla	177	<i>Klaus Louis Gerlach, Hans-Dieter Pape, and Maxime Champy</i>	
<i>Konrad Wangerin, Henning Gropp, Winfried Kretschmer, and Werner Zoder</i>		Introduction	205
Introduction	177	Suture Dehiscences	205
Mandibular Distraction in Congenital Malformation or Acquired Deficiency	177	Infection	205
Body Deficiency	178	Osteomyelitis	205
Ramus Deficiency	180	Delayed Union (Pseudarthrosis, Fibrous Union) ..	206
Combinations	181	Malocclusion	206
		Damage to Dental Roots	206
		Damage to the Inferior Alveolar Nerve	206
		Angle Fractures: One or Two Plates?	207
		References	209
