

Table of Contents

1	Introduction	1
1.1	Distribution of Precambrian Crust in China	1
1.2	Precambrian Tectonic Cycles and Precambrian - Classification Scheme	3
1.3	Precambrian Tectonic Framework of China	10
2	Archean Crust	15
2.1	Characteristics of Early Precambrian Evolution	15
2.2	Distribution and General Features	19
2.3	Granulite-Gneiss Terrane	21
2.3.1	Some Classical Key Regions	21
2.3.2	Rock Assemblages	28
2.3.3	Metamorphism	36
2.3.4	Deformation Patterns	38
2.4	Gneiss Domes	41
2.5	Ductile Shear-Zones	42
2.5.1	Geochronology	43
2.5.2	Tectonic Framework	46
2.6	Greenstone Belts	48
2.6.1	Typical Greenstone Belts	50
2.6.2	Rock Assemblages and Sequences	81
2.6.3	Metamorphism	82
2.6.4	Deformation Styles	83
2.6.5	Tectonic Setting	83
2.6.6	Geochronology	85
3	Early Proterozoic Crust	87
3.1	Distribution and General Features	87
3.2	Rifting, Reworking and Marginal Accretion of the North China Craton	90
3.2.1	Liao-Ji Mobile Belt	90
3.2.2	Qinglong Mobile Belt	94
3.2.3	Shanxi-Henan Rifted Province	102
3.2.4	Yinshan-Yanshan Mobile Belt	117

X Table of Contents

3.2.5	Qinling-Dabie Mobile Belt.....	119
3.2.6	Dunhuang-Longshoushan Mobile Belt	129
3.3	Tarim Protoplatform.....	131
3.3.1	Tianshan-Beishan-Qilian Mobile Belt.....	132
3.3.2	Kunlun Mobile Belt.....	140
3.4	Formation and Accretion of the Yangtze Protoplatform.....	144
3.4.1	Emergence of Yangtze Protoplatform.....	144
3.4.2	Southern Sichuan-Central Yunnan Mobile Belt.....	148
3.5	Petrotectonic Assemblage	149
3.6	Metamorphism	152
3.7	Tectonics	153
3.8	Post-orogenic Granites and Basic Dyke Swarms	155
3.9	Stromatolites and Microfossils.....	157
4	Mid-Late Proterozoic (Pre-Sinian) Crust	161
4.1	Distribution and General Features.....	161
4.2	Aulacogens and Depression Belts in the North China Protoplatform	163
4.2.1	The Yanshan Aulacogen	163
4.2.2	Xiong'er-Hangao Aulacogen and Qinling-Dabie Block	172
4.2.3	The Jiaoliao-Xuhuai Depression Belt (North China Protoplatform).....	181
4.2.4	The Chartai Aulacogen and Bayan Obo Geocline	182
4.2.5	Depression Belts in the Western North China Protoplatform	188
4.2.6	Gravity Tectonics in the Wulashan Group.....	189
4.3	Tarim Protoplatform and Its Surrounding Mobile Belts	194
4.4	Tectonic Regime of the Yangtze Protoplatform and Cathaysia	197
4.4.1	The Trench-Arc-Basin System around the Yangtze Protoplatform	198
4.4.2	Cathaysia.....	222
4.4.3	Large Fault Systems	226
4.4.4	Tectonic Deformation Style	231
4.5	Basic Characteristics of the Northern Margin of Gondwana	240
4.6	Paleomagnetic Evidence	241
4.7	Characteristics of Supracrustal Rocks.....	244
4.7.1	Quartzite (Quartz Sandstone)-Shale-Carbonate Association	245
4.7.2	Bimodal Volcanic-Clastic Rock Association	246
4.7.3	Sandstone-Shale-(Silicalite)-Carbonate Flysch Association	246
4.7.4	Ophiolite (Komatiite)-Flysch Association and Calc-Alkaline Volcanic-Flysch Association.....	247
4.8	Anorogenic Magmatism.....	248
4.8.1	Anorthosite and Rapakivi Granite Events in North China Protoplatform	248
4.8.2	Basic Dyke Swarms	250
4.9	Fossils and Stromatolites.....	254
4.9.1	Stromatolites	259
4.10	Tectonic Framework	260

5	Sinian Crust	263
5.1	Distribution and General Features.....	263
5.2	Sinian Crust in South China	263
5.2.1	Yangtze Platform	265
5.2.2	North Margin of the Yangtze Platform	270
5.2.3	Mobile Belts of the Southeast Margin of the Yangtze Platform	271
5.2.4	Cathaysia	276
5.3	Margin of the North China Platform	277
5.3.1	Jiaoliao-Xuhuai Depressed Belt	277
5.3.2	Aulacogens and the Depression Belt on the South Margin of the North China Platform	279
5.3.3	Depression Belt on the West Margin of the North China Platform.....	281
5.4	Sinian Crust of the Tarim Platform	281
5.5	High Himalayas Mobile Belt.....	284
5.6	Paleomagnetic Evidence	284
5.7	Characteristics of Sinian Glaciation	288
5.8	Paleontology and Stromatolites.....	291
5.8.1	Evolution of Phytosphere and Appearance of Metazoa	291
5.8.2	Stromatolites	292
6	Concluding Remarks.....	295
6.1	Endogenous and Exogenous Processes in Crustal Evolution.....	295
6.1.1	Magmatism.....	295
6.1.2	Deposition	296
6.1.3	Geothermal Regimes	296
6.1.4	Development of Life Forms Related to Atmospheric Evolution.....	299
6.2	A Summary of Development in Precambrian Crustal Evolution	300
	References.....	305
	Subject Index.....	321
