1 Anatomy and Biomechanics

1.1	Neurovascular Anatomy of the Fingers, Thumb, and Hand	1
	Vascular Anatomy of the Fingers	1
	Vascular Anatomy of the Thumb	4
	Vascular Anatomy of the Hand	6
	Practical Conclusions in Reconstructive Strategy	10
1.2	Embryological Study of the Fingertip	13
	Introduction	13

2 Vascular Rein Technique

2.1	Vascular Rein Technique: a New Method for Thumb Reconstruction	21
2.2	Anatomical Basis	22
2.3	Surgical Procedure	23
	Volar Approach	23
	Dorsal Approach	24
	Dorsal Region	24
	Distal Phalanx	26
	Donar Pulp of the Middle Finger	26
	Nail Osteofasciocutaneous Transposition	26

3 Replantation and Revascularization

3.1	Replantation	47
	Introduction	47
	Historical Review	47
	Definitions	47
	Indications	48
	Macroreplantations	48
	Microreplantations	52

	Methods and Materials	13
	Results	14
	Discussion	15
	Conclusions	17
1.3	Biomechanics of the Thumb and Fingers	18
	Biomechanics of the Thumb	18
	Biomechanics of the Fingers	19

	Sensitivity of the Neothumb	26
	Bone Graft Interposition	26
	Resurfacing the Radial Side of the Reconstructive Thumb	27
	Proximal Thumb Amputation	28
2.4	Classification of the Vascular Rein Technique ...	30
2.5	Clinical Cases	35
	Vascular Rein Technique Types I und II	35
	Variations of the Technique and Options for its Application	45

	Replantation Syndromes	60
3.2	Revascularization	62
	Revascularization of the Hand—Strategy	62
	Revascularization of the Thumb and Fingers	69
3.3	Clinical Cases	76
	Macroreplantation	76

4 Thumb Reconstruction

4.1	Classification of Thumb Amputations	79
	Reconstructive Strategy after Thumb	
	Amputations	80
4.2	Emergency Thumb Reconstruction Using	
	Microsurgical Procedures	83
	Heterotopic Replantation	83
4.3	Elective Thumb Reconstruction Using	
	Microsurgical Procedures	94
	Anatomical Basis	94
	The Gilbert Classification	94
	Toe Transfer	96
	The Toe Bank	103

5 Finger and Thumb Reconstruction

5.1	Reconstruction of the Fingertip	115
	Skin Quality	115
	Reconstructive Options for Fingertip	
	and Nail-Bed Injuries	120
	Classification and Strategy—Reconstruction	
	of Fingertip Amputations	120
	Reconstruction of Thumbtip Amputations	127
5.2	Clinical Cases	129
5.3	Digital Lengthening	140
	Phalangization	140
	Digital Lengthening by Tissue Apposition	140

6 The Reconstruction of Digital Pinch

6.1	The Reconstruction of Digital Pinch in	
	Bilateral Amputees	156
	Classification of Mutilated Hands	156
	Mutilated Hands: the Most Common Types	159
	Reconstruction of Digital Pinch (Fingers)	161
	Complex Reconstructions of Digital Pinch	162
	Complex Reconstructions after Serious	
	Mutilations: Principal Strategies	162
	Priorities for the Reconstruction of	
	Digital Pinch	162
	Surgical Strategy	163
