

CONTENTS

1. Introduction	1
2. Basic Mechanisms in Inflammation/Wound Healing	5
3. Basic Mechanisms in Antigen-Specific Immunity/Graft Rejection	27
Introduction	27
Antigen Presentation	29
Activation of T and B Lymphocytes	33
Effector Phase; Graft Rejection	42
4. Role of Cytokines in the Ovary	47
Introduction	47
Morphology of the Ovary	52
Hormonal Regulation of Ovarian Function	57
Role of Cytokines/Growth Factors in Folliculogenesis	59
Inflammatory Model for Follicular Development	78
5. Role of Cytokines in the Menstrual Cycle	83
Introduction	83
Uterine Cellularity	94
Hormonal Regulation of Uterine Cyclicity	103
6. Role of Cytokines in Mating	113
Introduction	113
Cellular Response to Mating	115
Molecular Basis for Mating-Associated Cellular Changes	118
Functional Effect of Acute Inflammatory Response	121
7. Role of Cytokines in Implantation	123
Introduction	123
Pre-Implantation Uterine Cellularity	128
Endocrine Regulation of Uterine Receptivity	135
Paracrine Regulation of Uterine Receptivity	137
Post-Implantation Uterine Cellular Events	157
Summary	165
8. Role of Cytokines in Placental Development	169
Introduction	169
Uterine Cellularity	171
Role of Local Messengers in Regulating Placental/Fetal Growth	183
Immunology of Placental Development	186

9. Molecular Control of Parturition	189
10. Antibody Responses to Fetal Antigens	199
Immune Responses	199
Antibody Transport	204
Removal of Anti-Fetal Antibody in the Placenta	207
11. Cell-Mediated Immune Responses to Fetal Antigens	213
Immune Responses	213
Fetal Antigens	216
Immune Protection of the Fetus	218
12. Immune Responses/Growth Factors/Cytokines as Mediators of Reproductive Disease	223
Immune Responses in Spontaneous Abortions	223
General Summary	235
Index	239
