

Contents

Foreword	ix	7. Acoustic Directionality	79
Preface	xi	8. Noise Reduction	93
Part I Basics and Overview		9. Feedback Cancellation	101
1. Acoustic Signals	3	10. Sound Classification	109
2. Hearing Impairment	19	Part III Calculations in the Digital Processor	
3. Overview of Hearing Aid Characteristics	27	11. Segment-wise Processing with Fourier Transforms	127
4. Basic Amplification Schemes	39	12. Digital Filters	133
Part II Signal Processing in Digital Hearing Aids		13. Digital Level Measurement	147
5. Static Behavior of Digital Wide Dynamic Range Compression	53	14. Autocorrelation and Prediction	159
6. Temporal Behavior of Digital Wide Dynamic Range Compression	65	15. How Everything Fits Together	179
		Index	183
