

Contents

1 PRELIMINARIES

1.1	Introduction	1
1.1.1	Motivation	1
1.1.2	Production economies and increasing returns	2
1.2	Overview	4
1.2.1	Outline of contents	4
1.2.2	Conventions	7
1.3	The setting	8
1.3.1	Commodities and prices	8
1.3.2	Agents	10
1.3.3	Economies	11
1.4	References to the literature	11

2 CONSUMERS

2.1	Introduction	13
2.2	Consumption sets	14
2.3	Preferences	15
2.3.1	Order properties	16
2.3.2	Analytical properties	17
2.3.3	Properties of non-satiation	22
2.4	The utility function	24
2.4.1	Generalities	24
2.4.2	The existence of a continuous utility function	27
2.5	Wealth restrictions	30
2.6	Consumers' behaviour	34
2.6.1	Individual demand	34
2.6.2	Aggregate consumption	40
2.7	References to the literature	41

3	PRODUCTION AND SUPPLY	
3.1	Introduction	43
3.2	Production sets	45
3.2.1	Individual production	45
3.2.2	Aggregate production	48
3.3	Efficiency, additivity, divisibility	49
3.4	Returns to scale	52
3.4.1	Definitions	52
3.4.2	Additivity, divisibility and returns to scale	54
3.5	The behaviour of competitive firms	57
3.5.1	Competitive firms	57
3.5.2	Supply	58
3.5.3	The inverse supply mapping	63
3.6	References to the literature	65
4	COMPETITIVE EQUILIBRIUM	
4.1	Introduction	67
4.2	The model	68
4.2.1	Economies and allocations	68
4.2.2	Private ownership economies	70
4.2.3	Equilibrium	71
4.3	Assumptions and consequences	72
4.4	The existence of equilibrium	75
4.4.1	A preliminary result	76
4.4.2	The existence result	77
4.4.3	Equilibrium with abstract wealth functions	79
4.5	Equilibrium and efficiency	80
4.5.1	The Pareto principle	80
4.5.2	The Two Welfare Theorems	81
4.5.3	Optimum and equilibrium	84
4.6	Abstract economies	89
4.7	References to the literature	92
5	EQUILIBRIUM WITH NON-CONVEX FIRMS	
5.1	Introduction	93
5.2	Pricing rules	95
5.2.1	The concept	95
5.2.2	Admissible pricing rules	97
5.3	The model	99
5.3.1	Description of the economy	99
5.3.2	Assumptions	100
5.3.3	Equilibrium	101

5.4 The existence of equilibrium	102
5.4.1 Two difficulties	103
5.4.2 The artificial economy	107
5.4.3 The fixed point argument	108
5.4.4 Proof of the existence theorem	109
5.5 References to the literature	111
6 MARGINAL PRICING	
6.1 Introduction	113
6.2 Preliminaries	115
6.3 Marginal pricing	122
6.3.1 Marginal pricing and the existence of equilibrium	122
6.3.2 Competitive equilibrium revisited	126
6.4 The efficiency problem	128
6.4.1 The Second Welfare Theorem	129
6.4.2 The First Welfare Theorem	133
6.4.3 The core	137
6.5 References to the literature	138
6.5.1 Marginal pricing	138
6.5.2 Efficiency	139
7 INCREASING RETURNS AND MONOPOLIES	
7.1 Introduction	141
7.2 The reference model	143
7.3 Two-part marginal pricing	145
7.3.1 Generalities	145
7.3.2 The willingness to pay model	150
7.4 The efficiency of two-part tariffs	154
7.4.1 Bad news	154
7.4.2 And good news	156
7.5 Perfect price discrimination	158
7.6 References to the literature	161
8 LOSS-FREE PRICING RULES	
8.1 Introduction	163
8.2 The reference model	164
8.3 Mark-up pricing	167
8.3.1 The average cost pricing rule	168
8.3.2 The mark-up pricing rule	169
8.4 Constrained profit maximization	170
8.4.1 Motivation	170
8.4.2 The model	171

8.4.3 The profit principle	174
8.4.4 Equilibrium	176
8.4.5 Efficiency	178
8.5 References to the literature	181
9 COMPETITION AND INCREASING RETURNS	
9.1 Introduction	183
9.2 The reference model	184
9.3 Competitive pricing	188
9.3.1 Motivation	188
9.3.2 The model	189
9.4 Classical equilibrium	191
9.4.1 Motivation	191
9.4.2 The model	192
9.4.3 The existence of equilibrium	198
9.5 References to the literature	201
10 NON-CONVEXITIES AS PUBLIC GOODS	
10.1 Introduction	203
10.1.1 Non-convexities and the public environment	204
10.1.2 Two kinds of consensus	205
10.1.3 Scope and outline of the chapter	206
10.2 The model	208
10.3 Public competitive equilibrium	210
10.4 Valuation equilibrium	212
10.5 Examples	217
10.5.1 Competitive equilibrium	218
10.5.2 Economies with public goods	219
10.5.3 Competitive pricing	219
10.6 References to the literature	219
11 INPUT-OUTPUT ANALYSIS	
11.1 Introduction	221
11.2 The linear model	226
11.2.1 An input-output model with joint production	226
11.2.2 The non-substitution theorem	230
11.2.3 Equilibrium	232
11.3 Extensions	234
11.3.1 Linear models with positive profits	235
11.3.2 Non-square linear input-output models	238
11.3.3 A non-linear input-output model	240
11.4 References to the literature	243

12 THE LIMITS OF THE ECONOMY	
12.1 Asymptotic cones	245
12.1.1 Introduction	245
12.1.2 Basic properties	246
12.2 Closed sums	252
12.3 Structural properties of the economy	255
12.3.1 The closedness of aggregate sets	255
12.3.1 The compactness of attainable allocations	256
12.4 References to the literature	258
 BIBLIOGRAPHY	 259
