Contents

1 Algorithmic Difficulties Since the 1950s 1
1.1 Short Summary of Early Approaches: Mathematical Difficulties 1
1.2 Combinatorial Complexity and Logic 3
1.3 Logic, Aristotle, Alexander the Great, and the Mind 4
1.4 Problems 7
1.5 Literature for Further Reading 12

2 Dynamic Logic 15
2.1 Similarity Measure between Models and Data 15
2.2 DL Process from Vague to Crisp 18
2.3 Mutual Information Similarity for Approximate Models 21
2.4 Number of Models 22
2.5 Convergence, Difficulties, and Solutions 25
2.6 Problems 28
2.7 Literature for Further Reading 29

3 Classical Algorithms of Electrical Engineering and Signal Processing 31
3.1 Detection, Pattern Recognition and Data Mining 31
3.1.1 Models for Detection, Example 1 32
3.1.2 Detection, Example 1 33
3.1.3 Detection of Moving Objects, Example 2 35
3.2 Clustering 37
3.2.1 The Problem and DL Equations 37
3.2.2 DL Clustering, Example 1 40
3.3 Tracking 44
3.3.1 Historical Introduction with a Moral: DL Trackers Are Optimal 44
3.3.2 DL Equations 45
3.3.3 Tracking Example 47
3.3.4 Feature Tracking 48
3.4 Swarm Intelligence and Sensor Fusion 49
3.4.1 Historical Introduction 49
3.4.2 Concurrent Localization, Data Association, Navigation, and Fusion for a Swarm of Flying Sensors 50
3.5 Prediction 58
3.5.1 Linear Regression 58

Bibliografische Informationen
http://d-nb.info/1013145704

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

3.5.2 Example of Linear Regression 60
3.5.3 DL Regression in Clutter 61
3.5.4 Example of DL Regressions in Clutter 63
3.5.5 Multiple DL Regressions 65
3.6 Financial Prediction 65
3.6.1 Testing Procedure 66
3.6.2 Three-Process Model for Financial Prediction 68
3.6.3 Portfolio Optimization 70
3.7 Situational Awareness, Context Understanding 70
3.7.1 DL for Learning Situations 70
3.7.2 Example of Situation Learning 72
3.8 Problems (*Master Thesis Level, †PhD Thesis Level) 77
3.9 Literature for Further Reading 79
3.9.1 Clustering 79
3.9.2 Tracking 79
3.9.3 Swarm Intelligence and Sensor Fusion 80
3.9.4 Situations and Contexts 80

4 Emerging Areas 81
4.1 Fundamental Mind Mechanisms 82
4.2 Dynamic Logic and Cognition 83
4.2.1 Dynamic Logic, Concepts, Hierarchy, and Unconscious 83
4.2.2 Imagination and Intuition 86
4.2.3 The Knowledge Instinct and Emotions 87
4.2.4 Aesthetic Emotions and the Beautiful 90
4.3 Natural Language Learning 93
4.3.1 Linguistic Theories Since the 1950s 93
4.3.2 DL for Learning Language 95
4.3.3 Search Engines for the Internet with Elements of Learning Understanding 96
4.4 Integration of Language and Cognition 96
4.4.1 Language and Cognition 96
4.4.2 Dual Model 97
4.4.3 Experimental Evidence, Answers and Questions 98
4.4.4 Dual Hierarchy 99
4.4.5 Cognitive Linguistics and Dynamic Logic 102
4.4.6 Evolutionary Linguistics and Dynamic Logic 105
4.4.7 Contents of Language Faculty 106
4.4.8 Experimental Evidence and Future Research 107
4.5 Symbols: Grounded, Perceptual, and Amodal 111
4.5.1 A Bit of History 111
4.5.2 DL of PSS: Perceptual Cognition, Simulators, Symbols, and Signs 112
4.5.3 Other PSS Operations: Concepts, Productivity, Grounding, and Binding 114
4.5.4 Perceptual Symbols vs. Amodal Signs 116

4.5.5 Experimental Evidence and Future Research 118
4.6 Future Man-Machine Systems 119
4.6.1 Cooperative and Interactive Systems 119
4.6.2 Semantic Web 120
4.7 Emotional Intelligence and Love from the First Sight 120
4.7.1 Emotions 120
4.7.2 Intelligence 122
4.7.3 Emotional Intelligence 124
4.7.4 Love from the First Sight, Divorce, and Other Miseries 125
4.8 Emotionality of Languages and Meanings 126
4.8.1 Primordial Undifferentiated Synthesis of Psyche 127
4.8.2 Language and Differentiation of Emotion, Voicing, Cognition, and Behavior 127
4.8.3 Grammar, Language Emotionality, and Meanings 128
4.9 Hierarchical Evolving Systems, the Beautiful and Sublime 130
4.9.1 Hierarchical Model of Cognition 130
4.9.2 The Mean Field Hierarchical Dynamics 131
4.10 Evolution of Cultures 134
4.11 Emotional Sapir-Whorf Hypothesis 139
4.11.1 Determinants of Cultural Evolution 139
4.11.2 Predictive Cultural Models 140
4.11.3 Experimental Evidence and Future Research 141
4.12 Music: Its Function in Cognition and Evolution 141
4.12.1 An Unsolved Mystery 141
4.12.2 2,500 Years of Western Music and Pre-scientific Theories (from Pythagoras to the 18th c.) 142
4.12.3 Whence Beauty in Sound? 144
4.12.4 Current Theories of Musical Emotions 147
4.12.5 Differentiation and Synthesis 152
4.12.6 Differentiated Knowledge Instinct and Musical Emotions 153
4.12.7 Empirical Evidence and Tests 156
4.12.8 Summary and Further Directions 165
4.13 Problems (* Indicates MS Level Problems; † Indicates PhD Level Problems) 168
4.14 Literature for Further Reading 169
4.14.1 Section 4.1, Fundamental Mind Mechanisms 169
4.14.2 Section 4.2, Dynamic Logic and Cognition 170
4.14.3 Section 4.3, Natural Language Learning 170
4.14.4 Section 4.4, Integration of Language and Cognition 171
4.14.5 Section 4.5, Symbols: Grounded, Perceptual, and Amodal 171
4.14.6 Section 4.6, Future Man-Machine Systems 171
4.14.7 Section 4.7, Emotional Intelligence and Love from the First Sight 172
4.14.8 Section 4.8, Emotionality of Languages and Meanings 172
4.14.9 Section 4.9, Hierarchical Evolving Systems, the Beautiful and Sublime 172

4.14.10 Section 4.10, Evolution of Cultures 172
4.14.11 Section 4.11, Emotional Sapir-Whorf Hypothesis 172
4.14.12 Section 4.12, Music: Its Function in Cognition and Evolution 173

5 Epilogue Future Research Directions 175
5.1 Dynamic Logic: Mathematics, Engineering, and the Mind Summary 175
5.2 Consciousness 176
5.3 Reductionism 178
5.4 Making a Scientific Revolution 179
5.5 Science and Religion 181
5.5.1 Why Adam Was Expelled from Paradise, Cognitive Science View 181
5.5.2 Religion from Scientific Point of View 183
5.6 Problems (*MS Level Problems; †PhD Level Problems) 185
5.7 Literature for Further Reading 185
