

Contents

1. Overview	1
<i>Klaus Bange, Wilfried Heimerl, Dieter Krause</i>	
1.1 The "Object": Amorphous Material, Glass, and Glass Ceramics	2
1.2 Qualitative Relations of Properties with Composition and Structure	8
1.3 The Importance of the Chemical Composition	11
1.3.1 Methods and Strategies	12
1.3.2 Indirect Analysis	13
1.3.3 Direct Analysis	13
1.3.4 New Developments and Future Trends	15
1.4 Methods for Structure Determination	17
1.5 Analysis of Glass Defects	20
References	26
 2. The Chemical Analysis of Glasses, Glass Ceramics, and Related Materials	 29
2.1 Sampling and Sample Preparation	29
2.1.1 Mechanical Pretreatment Before Digestion <i>Lothar Meckel</i>	29
2.1.2 Methods of Decomposing Glasses and Glass Ceramics for Analysis <i>Lothar Meckel</i>	32
2.1.3 Methods of Preparing Samples for Analysis in the Solid State <i>Hartmut Müller, Bernd Valentin</i>	39
2.2 Methods for Digested (Wet) Samples <i>Lothar Meckel</i>	42
2.2.1 Gravimetric Methods	42
2.2.2 Volumetric Methods	43
2.2.3 Molecular Absorption Spectroscopy (MAS)	44
2.2.4 Atomic Absorption Spectroscopy (AAS)	45
2.2.5 Atomic Emission Spectroscopy (AES)	47
2.2.6 Infrared (IR) Detection and Measurement of the Thermal Conductivity	48
2.2.7 Mass Spectrometry	49

3.8.4	Double-Phase Glasses and Glass Melts ($\eta > 10^7$ Pas)	284
3.8.5	Optically “Anomalous” Anisotropic Glasses and Melts	290
	References	294

4. Dynamics of the Glass Structure 313

4.1	Applying the Dynamics of the Structure to Tailor the Glass Properties <i>Ulrich Fotheringham</i>	313
4.1.1	The Original Tool Model, Derived with a Double-Well- Potential Consideration	313
4.1.2	Monitoring the Structural Dynamics via a Dynamic Measurement of the Specific Heat	317
4.1.3	The Tool–Narayanaswamy Model	327
4.1.4	Tailoring Two Exemplary Glass Properties	337
4.2	How Can Computer Simulations Contribute to the Understanding of the Dynamics of Glasses and Glass Melts? <i>Walter Kob, Kurt Binder</i>	344
4.2.1	Model and Details of the Simulation	345
4.2.2	Results	346
4.2.3	Conclusions	356
4.3	How Can Inelastic Neutron Scattering Contribute to the Understanding of the Dynamics of Glasses? <i>Ulrich Buchenau, Andreas Wischnewski</i>	357
4.3.1	Neutron Measurements	361
4.3.2	Data Analysis	363
4.3.3	Implications for Sound Wave Scattering	365
4.4	Titania-Activated Nucleation in Lithium–Aluminosilicate Glass Ceramics Investigated by Raman Spectroscopy <i>Rüdiger Sprengard</i>	366
4.4.1	Titanium Coordination in $\text{SiO}_2 \cdot n\text{LiAlO}_2$ Glass	367
4.4.2	Titanium Segregation from the Glass Network	371
4.4.3	Conclusion	378
4.5	Nucleation at Silicate Glass Surfaces <i>Stefan Reinsch, Ralf Müller</i>	379
4.5.1	Experimental Procedure	379
4.5.2	Surface Nucleation Kinetics	380
4.5.3	Surface Nucleation Sites	381
4.5.4	Benefit of a Tuneable Surface Nucleation Density	388
	References	392

5. Chemical Resistance and Corrosion, and Ion Release	399
5.1 Requirements for Different Glass Products <i>Wilfried Heimerl</i>	399
5.2 Determination Methods and Standards, and Specific Examples <i>Wilfried Heimerl</i>	400
5.3 Ionic Processes between Glasses and Solutions <i>Friedrich G.K. Baucke</i>	405
5.3.1 The Electrochemically Structured Interface Glass/Solution: Interfacial Equilibria	407
5.3.2 Interfacial Equilibria Under the Influence of Subsurface Concentration Gradients	410
5.3.3 Specific Reactions Between Glasses and Solutions: An Example	419
5.4 Development of Glasses with Improved Corrosion Resistance <i>Peter Brax</i>	422
5.4.1 Requirements Profile and Design	422
5.4.2 Chemical Stability	426
5.4.3 Coincidence, Trial and Error	435
5.5 Thermodynamics of Glass Corrosion <i>Reinhard Conradt</i>	435
5.5.1 Physical Boundary Conditions in Different Corrosion Scenarios	436
5.5.2 Discussion of Individual Corrosion Models	437
5.5.3 The Gibbs Free Energy of Hydration of Multi-Component Glasses	440
5.5.4 Surface and Subsurface Effects	444
5.5.5 Application of a Corrosion Model	444
References	447
6. Analysis and Diagnosis of Local Defects	451
6.1 Bubbles	451
6.1.1 Analysis of Gaseous Inclusions	451
6.1.2 Bubble Defect Diagnosis	465
6.2 Knots, Striae, and Stones <i>Hartmut Müller</i>	468
6.3 Glass Interaction with AZS <i>Hartmut Müller</i>	472
6.4 Microphase Separation in Glasses <i>Werner Vogel</i>	477
6.4.1 Two-Phase Glasses and Functional Change of Microphases	478
6.4.2 Multiple Phase Separation	480
6.4.3 Droplet Agglomeration after Secondary Phase Separation	483
6.4.4 Shell Formation Around Microphases	485

6.4.5	Other Practical Significances of Phase Separation Processes in Glasses	488
6.4.6	Control of Phase Separation	490
6.4.7	General Conclusions on Immiscibility Behaviour and Microstructure	490
6.5	Metal Inclusions: Platinum <i>Joseph S. Hayden, Alexander J. Marker III</i>	491
6.5.1	Sources of Platinum	492
6.5.2	Phosphate Laser Glass Melting Experiments	493
6.5.3	Summary and Conclusions	495
6.6	Platinum Particle Detection in Phosphate Laser Glasses <i>John H. Campbell, James F. Kimmons, Sheldon Schwartz</i> ...	496
6.6.1	Basis for Platinum Particle Detection: Laser-Induced Damage	498
6.6.2	Description of the Pt-Inclusion Inspection System	505
6.6.3	Inclusion Test Specification and Procedures	508
6.6.4	Past System Operational Experience and Current Status	510
