

Contents

State Vector Reduction in Relativistic Quantum Mechanics: An Introduction	
Heinz-Peter Breuer and Francesco Petruccione	1
Quantum Measurements, Open Systems and Dynamical Entropy	
Robert Alicki	31
EEQT – A Way Out of the Quantum Trap	
Philippe Blanchard and Arkadiusz Jadczyk	57
Stochastic Unraveling of Relativistic Quantum Measurements	
Heinz-Peter Breuer and Francesco Petruccione	81
Some Lessons from Relativistic Reduction Models	
GianCarlo Ghirardi	117
Effective Theories of Coupled Classical and Quantum Variables	
Jonathan J. Halliwell	153
Are There Unsolved Problems in the Interpretation of Quantum Mechanics?	
Roland Omnès	169
Collapse Models	
Philip Pearle	195
Subject Index	235
