Preface	VII	2.2.9	Tension pneumothorax	123
Notice	VIII	2.2.10	Pneumomediastinum	130
1 Introduction	1	2.2.11	Hemomediastinum	138
1.1 Characteristics of a diagnostic radiographic study	2	2.2.12	Iatrogenic injury	142
1.2 Importance of radiographic quality	3	2.2.13	Tracheal/bronchial foreign bodies	165
1.3 Use of correct radiographic technique	4	2.2.14	Tracheal injury	178
1.4 Use of a grid technique	4	2.2.15	Esophageal foreign bodies	180
1.5 Selection of intensifying screens	4	2.2.16	Esophageal injury	188
1.6 Radiographic viewing	4	3 Radiology of Abdominal Trauma		
1.7 Radiographic contrast	5	3.1 Introduction	198	
1.8 Film density versus tissue density	5	3.1.1 The value of abdominal radiology	198	
1.9 More about "density"?	5	3.1.2 Indications for abdominal radiology	198	
1.10 The art of radiographic evaluation	6	3.1.3 Radiographic evaluation of abdominal radiographs	198	
1.11 Methods of radiographic evaluation	6	3.1.4 Radiographic features in abdominal trauma	199	
1.12 Preparing the radiological report	6	3.1.4.1 Peripheral soft tissue trauma	200	
1.13 Terms to understand in radiology	7	3.1.4.2 Fractures	200	
2 Radiology of Thoracic Trauma		3.1.4.3 Peritoneal fluid	200	
2.1 Introduction	10	3.1.4.4 Peritoneal air	201	
2.1.1 Value of thoracic radiology	10	3.1.4.5 Retroperitoneal fluid	201	
2.1.2 Indications for thoracic radiology	10	3.1.4.6 Retroperitoneal air	202	
2.1.3 Patient positioning	10	3.1.4.7 Organ enlargement	202	
2.1.4 Radiographic evaluation of thoracic studies	10	3.1.4.8 The pelvis	202	
2.1.5 Radiographic features in thoracic trauma	12	3.1.5 Use of contrast studies in the traumatized abdomen	202	
2.1.5.1 Disruption of the thoracic wall	12	3.1.5.1 Urinary tract trauma	202	
2.1.5.2 Pleural space	12	3.1.5.2 Gastrointestinal tract trauma	203	
2.1.5.3 Pneumothorax	12	Gastric foreign bodies	203	
2.1.5.4 Pleural fluid	14	3.2 Case presentations	203	
2.1.5.5 Diaphragmatic rupture	14	3.2.1 Gastric foreign bodies and dilatation	204	
2.1.5.6 Damage to lung parenchyma	15	3.2.2 Small bowel foreign bodies	208	
2.1.5.7 Mediastinal injury	18	3.2.3 Peritoneal fluid	215	
2.1.5.8 The heart	19	3.2.4 Inguinal hernias	220	
2.1.5.9 The esophagus	19	3.2.5 Renal, ureteral, and urinary bladder injury	230	
2.2 Case presentations	19	3.2.6 Urethral injury	246	
2.2.1 Thorax wall injury	20	3.2.8 Postsurgical problems	266	
2.2.2 Paracostal hernia	46	4 Radiology of Musculoskeletal Trauma and Emergency Cases		
2.2.3 Pleural fluid	52	4.1 Introduction	270	
2.2.4 Lung injury	64	4.1.1 The order of case presentation	272	
2.2.5 Pulmonary hematoma	86	4.1.2 Type of information gained by a radiographic evaluation of the skeleton in the trauma patient	272	
2.2.6 Interstitial nodules	89			
2.2.7 Diaphragmatic hernia	91			
2.2.8 Pleural air	108			

4.1.3	Indications for radiography in suspected musculoskeletal trauma	273	4.2.2.4	Malunion fractures	418
4.1.4	Factors influencing radiographic image quality	273	4.2.2.5	Non-union or delayed union fractures	440
4.1.5	Enhancement of the diagnostic quality of a musculoskeletal	274	4.2.2.6	Traumatic injuries to growing bones	448
4.1.6	Use of sequential radiographic studies	275		Physeal growth injuries	448
4.2	Case presentations	276	4.2.2.7	Apophyseal fractures	466
4.2.1	Radiographic features of appendicular skeletal injury	276		Radiographic changes of osteomyelitis	470
4.2.1.1	Fracture classification	276	5	Radiographic Features of Soft Tissue Injuries	
4.2.1.2	Orthopedic fixation devices	276	5.1	Introduction	487
4.2.1.3	Post-traumatic aseptic necrosis	277	5.2	Case presentations	487
4.2.1.4	Disuse osteoporosis (osteopenia)	277	6	Radiographic Features of Gunshot Injuries	
4.2.1.5	Forelimb injury	277	6.1	Introduction	492
	Scapula and shoulder joint	277	6.2	Case presentations	493
	Humerus and elbow joint	289	7	Radiographic Features in Cases of Abuse	
	Radius and ulna	294	7.1	Introduction	523
	Forefoot	302	7.2	Case presentations	523
4.2.1.6	Pelvic limb injury	319	8	Poisoning	
	Pelvis	319	8.1	Case presentations	539
	Hip Joint	340	8.1.1	Rodenticide poisoning	539
	Femur	360	8.1.2	Herbicide poisoning	552
	Stifle joint	365			
	Tibia	369			
	Hindfoot	382			
4.2.2	Radiographic features of axial skeleton injuries	387			
4.2.2.1	Disruption of the thoracic wall	388			
4.2.2.2	Head	392			
4.2.2.3	Spine	395			
	Cervical vertebrae	396			
	Thoracic vertebrae	398			
	Lumbar vertebrae	408
