

Contents

I. Equations with Rapidly Oscillating Solutions

M. V. Fedoryuk

1

II. Asymptotic Expansion as $t \rightarrow \infty$ of the Solutions of Exterior Boundary Value Problems for Hyperbolic Equations and Quasiclassical Approximations

B. R. Vainberg

53

III. The Higher-Dimensional WKB Method or Ray Method. Its Analogues and Generalizations

V. M. Babich

91

IV. Semiclassical Asymptotics of Eigenfunctions

V. F. Lazutkin

133

V. The Boundary Layer

A. M. Il'in

173

VI. The Averaging Method for Partial Differential Equations (Homogenization) and Its Applications

N. S. Bakhvalov, G. P. Panasenko, and A. L. Shtaras

211
