

Contents

Introduction	1
1 Gas Filled Detectors <i>Claude Stéphan</i>	11
2 Scintillation Detectors <i>Klaus D. Hildebrand</i>	59
3 Semiconductor Detectors <i>J. P. Ponpon</i>	87
4 Track Detectors and Soleno applied for Cluster Radioactivities <i>E. Hourany, I. H. Plonski and D. N. Poenaru</i>	117
5 New Generation of Gamma-Detector Arrays <i>Rainer M. Lieder</i>	137
6 Modern Electron and Positron Spectrometers – Selected Aspects of a Broad Field <i>H. Bokemeyer, J. van Klinken and P. Salabura</i>	189
7 Neutron Detectors <i>Gudmar Grosshög</i>	235
8 Neutrino Detectors <i>J. L. Vuilleumier, G. Zacek</i>	271
9 Fragment Multi-Detector for the Study of Hot and Dense Nuclear Matter Produced in Relativistic Heavy-Ion Reactions <i>J. P. Coffin</i>	309
10 Production and Use of Radioactive Beams <i>Isao Tanihata</i>	343
11 In-Flight Separation of Heavy Ion Beams <i>Gottfried Münzenberg</i>	375

12	The Measurement of Nuclear Lifetimes	425
	<i>Klaus-Peter Lieb</i>	
13	Particle Identification Using Detector Telescopes	489
	<i>Françoise Pougheon</i>	
14	Particle Decay Study of Oriented Nuclei	497
	<i>J. Wouters</i>	
15	Fission Fragment Mass, Charge and Energy Distributions	535
	<i>Hans Otto Denschlag</i>	
16	Statistical Fluctuations in Nuclear Processes	583
	<i>Mircea Penția</i>	
	Authors' and Editors' Addresses	637
	Index	641
